Paper, Board and Pulps 1984 stuff preparation for paper and paperboard making is devoted to stuff preparation for paper and paperboard making topics covered include the composition and structure of papermaking fibers and their effect on the beating process stuff chest design and agitation equipment esparto printings and beating machinery both the basic concepts involved and their practical realization are addressed this volume is comprised of 14 chapters and begins with a historical background on beating followed by a discussion on fiber structure and composition to give an idea of how beating equipment and techniques were evolved and to supply a basis for an understanding of the beating techniques described in the text subsequent chapters deal with stuff chest design and agitation equipment esparto printings beating machinery rag papers manilas and electrical insulating papers and boards and newsprint and mechanical printings chipboard and other papers made from waste paper are also considered the final chapter focuses on instrumentation and automatic control in papermaking this book is intended primarily for the younger members of the papermaking industry to those thinking of entering the industry and to those employed on the commercial side and in associated industries a very didactic and systematic

Stuff Preparation for Paper and Paperboard Making 2013-10-22 this book discusses all the main types of packaging based on paper and paperboard it considers the raw materials and manufacture of paper and paperboard and the basic properties and features on which packaging made from these materials depends for its appearance and performance the manufacture of twelve types of paper and paperboard based packaging is described together with their end use applications and the packaging machinery involved the importance of pack design is stressed and how these materials offer packaging designers opportunities for imaginative and innovative design solutions environmental and waste management issues are addressed in a separate chapter the book is directed at those joining companies which manufacture packaging grades of paper and paperboard companies involved in the design printing and production of packaging and companies which manufacture inks coatings adhesives and packaging machinery it will be essential reading for students of packaging technology

Technology and Labor in Pulp, Paper, Paperboard and Selected Converting Industries 1994 scientists from academic and the paper industry compile as many aspects of testing properties of paper as possible into a broad reference to help people who plan specify and evaluate the physical and mechanical testing of paper material take advantage of the many developments in recent years an initial essay in each volume discusses the independent invention and widespread use of paper in mesoamerica beginning sometime before ad 660 the two volumes are paged and indexed separately but do not seem to be topically distinct the first edition handbook of physical and mechanical testing of paper and paperboard appeared in 1983 the second contains 30 chapters a third of which are new and the others substantially revised updated and expanded c book news inc

Pulp, Paper and Board Industry Report 1951 pulp and paper industry energy conservation presents a number of energy efficient technologies and practices that are cost effective and available for implementation today emerging energy efficient technologies and future prospects in this field are also dealt with qualitative and quantitative results data on energy savings for various steps of pulp and paper making process are presented there is no specific book on this topic this will be a comprehensive reference in the field thorough and in depth coverage of energy efficient technologies and practices in paper and pulp industry presents cost effective and available for implementation today technologies discusses biotechnological processes especially enzymatic processes in the pulp and paper industry to reduce the energy consumption and improve the

product quality presents qualitative and quantitative results data on energy savings for various steps of pulp and paper making process

Pulp, Paper, and Board; Quarterly Industry Report 1976 this pioneering 1997 study examines the economic development of the british paper industry between 1860 and 1914 an era in which it is often claimed that the origins of britain s relative economic decline are first witnessed for paper making this was also a period in which an array of important new forces including inter alia the development of new raw materials and the move to ever larger scales of production came on the scene gary bryan magee looks at the effect of these changes and assesses how effectively the industry coped with the new pressures drawing upon an extensive range of quantitative and archival sources from britain america and other countries along the way dr magee addresses issues central to the understanding of industrial competitiveness such as technological change entrepreneurship productivity trade policy and industrial relations
