## Clinical Application of Urologic Catheters, Devices and Products

2022-06-16

this state of the art text describes the science behind the system and drug dependent components of pbpk models its applications in translational and regulatory science e g guiding drug discovery and development and supporting precision medicine initiatives to incorporate state of the art knowledge each chapter is written by leaders in the field and illustrated by clear case studies connecting basic and applied science this book explores the potential of pbpk modeling for improving therapeutics and is designed for a wide audience encompassing graduate students as well as biopharmaceutics scientists and clinical pharmacologists features 1 provides a basic understanding of the physiologically based pharmacokinetic modeling and its applications 2 assists the reader in understanding product performance to allow for rapid product development and establish bioequivalence 3 well constructed content and added value of real examples 4 illustrates how using available resources via modeling and simulation leads to a reduction in the costs related to drug development which directly affects the costs to patients

# Cross-Cultural Design. Applications in Business, Communication, Health, Well-being, and Inclusiveness

this issue will address health care issues and clinical implications of rural and other medically underserved priority populations the agency for health care research and quality identified priority populations to include rural residents racial and ethnic minorities low income groups women children older adults and other individuals who may require chronic care the editors identified a need for articles focusing on priority populations to help further understand health implications of health disparities among specific populations a main focus is on identifying useful clinically focused strategies to address racial ethnic and socioeconomic differences that are relevant and influence overall healthcare access and quality of life the articles will provide clinicians and other consumers of nursing clinics of north america with a diverse and unique perspective on an array of clinically relevant and population focused topics some example topics included are tailoring interactive multimedia to improve diabetes self management addressing mental and physical health among older adults using mobile devices to access evidence based information in a rural

setting identifying family history and development of risk factors for diabetes among underserved preschool children addressing smoking cessation cancer screening issues cardiovascular health and obesity

## Comprehensive Materials Processing

2024-07-15

today's manager must understand and apply the latest thinking on the crucial management functions planning organizing directing and controlling moreover not only must managers understand the research based foundations underlying this thinking they must also know how to leverage the new technologies and incorporate them into it thierauf's new book guides managers through the technology managerial function interface explains latest research and its applications and then provides managers their external auditors and consultants with a unique questionnaire to help them assess the performance of their groups and their own managerial effectiveness with illustrations checklists guidelines and unusual clarity of presentation not only will thierauf's book help managers and those they report to understand better their day to day tasks but it will also shed new light on the technologies themselves and their inevitable work impacts

## **The Art and Science of Physiologically-Based Pharmacokinetics Modeling**

2013-06-21

this book is focused on the basics of applying thermochronology to geological and tectonic problems with the emphasis on fission track thermochronology it is conceived for relatively new practitioners to thermochronology as well as scientists experienced in the various methods the book is structured in two parts part i is devoted to the fundamentals of the fission track method to its integration with other geochronologic methods and to the basic principles of statistics for fission track dating and sedimentology applied to detrital thermochronology part i also includes the historical development of the technique and thoughts on future directions part ii is devoted to the geological interpretation of the thermochronologic record the thermal frame of reference and the different approaches for the interpretation of fission track data within a geological framework of both basement and detrital studies are discussed in detail separate chapters demonstrate the application of fission track thermochronology from various perspectives e.g. tectonics petrology stratigraphy hydrocarbon exploration geomorphology with other chapters on

the application to basement rocks in orogens passive continental margins and cratonic interiors as well as various applications of detrital thermochronology
