sixth century bc sappho s prediction came true fragments of work by the earliest woman writer in western literate history have in fact survived into the twenty first century but not without peril sappho s writing remains only in fragments partly due to the passage of time but mostly as a result of systematic efforts to silence women s voices sappho s hopeful boast captures the mission of this anthology to gather together women engaged in the art of persuasion across differences of race class sexual orientation historical and physical locations in order to remember that the rhetorical tradition indeed includes them available means offers seventy women rhetoricians from ancient greece to the twenty first century a room of their own for the first time editors joy ritchie and kate ronald do so in the feminist tradition of recovering a previously unarticulated canon of women s rhetoric women whose voices are central to such scholarship are included here such as aspasia a contemporary of plato s margery kempe margaret fuller and ida b wells added are influential works on what it means to write as a woman by virginia woolf adrienne rich nancy mairs alice walker and hélène cixous public manifestos on the rights of women by hortensia mary astell maria stewart sarah and angelina grimké anna julia cooper margaret sanger and audre lorde also join the discourse but available means searches for rhetorical tradition in less obvious places too letters journals speeches newspaper columns diaries meditations and a fable rachel carson s introduction to silent spring also find places in this room such unconventional documents challenge traditional notions of invention arrangement style and delivery and blur the boundaries between public and private discourse included too are writers whose voices have not been heard in any tradition ritchie and ronald seek to unsettle as they expand the women s rhetorical canon arranged chronologically available means is designed as a classroom text that will allow students to hear women speaking to each other across centuries and to see how women have added new places from which arguments can be made each selection is accompanied by an extensive headnote which sets the reading in context the breadth of material will allow students to ask such questions as how might we define women s rhetoric how have women used and subverted traditional rhetoric a topical index at the end of the book provides teachers a guide through the rhetorical riches available means will be an invaluable text for rhetoric courses of all levels as well as for women s studies courses peter lombard is best known as the author of a celebrated work entitled book of sentences which for several centuries served as the standard theological textbook in the christian west it was the subject of more commentaries than any other work of christian literature besides the bible itself the book of sentences is essentially a compilation of older sources from the scriptures and augustine down to several of the lombard s contemporaries such as hugh of saint victor and peter abelard its importance lies in the lombard s organization of the theological material his method of presentation and the way in which he shaped doctrine in several major areas despite his importance however there is no accessible introduction to peter lombard s life and thought available in any modern language this volume fills this considerable gap philipp w rosemann begins by demonstrating how the book of sentences grew out of a long tradition of christian reflection a tradition ultimately rooted in scripture which by the twelfth century had become ready to transform itself into a theological system turning to the sentences rosemann then offers a brief exposition of the lombard s life and work he proceeds to a book by book examination and interpretation of its main topics including the nature and attributes of god the trinity creation angelology human nature and the fall original sin christology ethics and the sacraments he concludes by exploring how the sentences helped shape the further development of the christian tradition from the twelfth century through the time of martin luther provides instruction in using the commands features and applications of wordperfect 8 learn how to turn raw data into rich interactive web
