Strengthening the Global Nuclear Safety Regime 2006

the existing global nuclear safety regime is functioning at an effective level today however its impact on improving safety could be enhanced this publication recommends action in a range of areas

Nuclear Science Abstracts 1973

responding to climate change is a global challenge with significant implications for small developing countries debate on how trade policy can mitigate the effects of climate change has so far centred on developed countries and the large emerging economies especially china brazil and india but what are the implications for small and vulnerable economies sves least developed countries ldc and small island developing states sids these countries are the most vulnerable to the effects of climate change but they are least equipped to deal with changes in trade policy trade climate change and sustainable development examines the opportunities and multiple large scale challenges they face in adapting key trade sectors to the impact climate change addressing climate change measures and furthering their own trade capacity and competitiveness in the global market this book is the result of a joint project between the commonwealth secretariat and the international centre for trade and sustainable development geneva it will be of interest to policy makers and anyone who wants to gain a clear understanding of the implications of climate change on the economies of smaller developing states book publisher website

Nuclear Science Abstracts 1971

based on in depth interviews with policy participants this study illuminates in detail the dynamics by which the u s government has tried to reflect the dramatically altered international arena in its nuclear policies book jacket
