fluent in japanese sheftall was the only westerner to ever sit face to face with these men and hear their stories the result is a fascinating journey into the lives indoctrination and mindsets of the kamikaze through the eyes of participants who are now lost to time after the turn of the 20th century the leadership of imperial japan looked at ways to increase the size and economic power of the empire these ideals were also in the forefront of the competing european nations and america quickly realizing their military forces would require substantial enlargement to apply adequate political pressure the japanese government undertook a major directional change in policy the japanese navy and air force were enlarged and reorganized along european lines these expansionist policies soon raised the ire of the competing nations japan had always been looked down upon as a second class nation and this attitude stung many young japanese officers and bureaucrats into action by the end of the first world war japan had already obtained overseas bases in the pacific as war reparations the ija and ijn sought to improve these bases for a future conflict with other nations path of a ghost primarily looks at the lives of three young men serving the empire each man would follow his own path along the way achieving success in his chosen field of participation just before the end of the second world war the paths of all three men would cross post war political plotting and subversive actions lead japan down an unenviable path where foreign soldiers control part of japan the tensions between nations boil over leading to a final battle that would forever affect world politics this book second in a series follows on from project z air war japan 1946 mark lewis has been employed all of his working life in the packaging industry in a laboratory environment he has interests in military history aviation competition photography and martial arts mark has studied judo kendo aikido and is currently studying tai chi as an avid modeller he has written articles and book reviews on aviation and modelling subjects his main area of interest is ww2 aircraft which has led to his first book project z by writing the air war japan 1946 series he hopes to stimulate interest in japanese wartime aviation from the very earliest days of organized warfare combatants have wanted to develop weapons with more firepower this has inevitably led to a wide variety of repeating weapons capable of a degree of sustained fire without reloading based largely upon new research this book explores the history of repeating and multi fire weapons beginning with the chinese repeating crossbow in the 4th century bce and ending with the world s most common firearm the kalashnikov ak 47 the author describes the potency of the machine gun in world war i the development of the semiautomatic pistol and the role of the submachine gun in improving the effectiveness of the infantryman a firearms expert traces the history of the one hand gun from its 14th century origins surveying changing technology techniques and design midwest book review ideally suited for both attack and self defense handguns have gotten smaller and deadlier but the earliest pistols had a tendency to misfire this was cured by the cap lock which proved a massive success in the american civil war with hundreds of thousands of cap lock revolvers used on each side self contained metal case cartridges were to bring a fundamental change to handgun design not only by allowing the introduction of revolvers that ejected automatically or were easily reloaded but also by paving the way for the automatic pistol world war i provided the handgun with a proving ground at the end of the hostilities with so much surplus weaponry work on the handgun could have ceased instead a new developmental phase was begun by the nations that had emerged from the crumbling imperial empires during world war ii the efficiency of well established designs was confirmed and new designs such as the walther p 38 showed their potential the emergence of the submachine gun in 1945 reduced the status of the handgun but only temporarily the need for efficient self defense shows no signs of lessening and the rise in shooting for sport particularly with the revolver has sharpened the quest for efficiency the never ending search for advanced production techniques shows that the handgun has as much a future in the twenty first century as it had in the heyday of the wild west or in the trenches of passchendaele if you are seeking a comprehensive reference for collectible gun values the gun trader s guide is the only book you need included are extensive listings for handguns the coffee cart girl

after the turn of the 20th century the leadership of imperial japan looked at ways to increase the size and economic power of the empire these ideals were also in the forefront of the competing european nations and america quickly realizing their military forces would require substantial enlargement to apply adequate political pressure the japanese government undertook a major directional change in policy the japanese navy and air force were enlarged and reorganized along european lines these expansionist policies soon raised the ire of the competing nations japan had always been looked down upon as a second class nation and this attitude stung many young japanese officers and bureaucrats into action by the end of the first world war japan had already obtained overseas bases in the pacific as war reparations the ija and ijn sought to improve these bases for a future conflict with other nations path of a ghost primarily looks at the lives of three young men serving the empire each man would follow his own path along the way achieving success in his chosen field of participation just before the end of the second world war the paths of all three men would cross post war political plotting and subversive actions lead japan down an unenviable path where foreign soldiers control part of japan the tensions between nations boil over leading to a final battle that would forever affect world politics this book second in a series follows on from project z air war japan 1946

a firearms expert traces the history of the one hand gun from its 14th century origins surveying changing technology techniques and design midwest book review ideally suited for both attack and self defense handguns have gotten smaller and deadlier but the earliest pistols had a tendency to misfire this was cured by the cap lock which proved a massive success in the american civil war with hundreds of thousands of cap lock revolvers used on each side self contained metal case cartridges were to bring a fundamental change to handgun design not only by allowing the introduction of revolvers that ejected automatically or were easily reloaded but also by paving the way for the automatic pistol world war i provided the handgun with a proving ground at the end of the hostilities with so much surplus weaponry work on the handgun could have ceased instead a new developmental phase was begun by the nations that had emerged from the crumbling imperial empires during world war ii the efficiency of well established designs was confirmed and new designs such as the walther p 38 showed their potential the emergence of the submachine gun in 1945 reduced the status of the handgun but only temporarily the need for efficient self defense shows no signs of lessening and the rise in shooting for sport particularly with the revolver has sharpened the quest for efficiency the never ending search for advanced production techniques shows that the handgun has as much a future in the twenty first century as it had in the heyday of the wild west or in the trenches of passchendaele

this volume brings together essays that individually and collectively address the force of the literary text with regard to problematic identities they work out of shared concerns with literary representations of this issue in different regions nations and communities that often prove divided they pursue questions related to textual identity where the literary text itself is contested internally or in its generic and historical relations in sum these studies actively test identity as social or literary concept discovering in difference the very condition of a useful if paradoxical sense of personal or textual coherence what happens to us when we move between different cultures or different societies defined in geographical or historical terms what happens to texts and textual practices in these same circumstances what happens to us when we are obliged to adapt to a new social order homi bhabha speaks of cultural difference as calling into play what he calls cultural translation what happens to identity the narrative that fashions a continued sense of self in this case difference raised to alterity demands that we accord functional and philosophical value not just to other aspects but also to the aspect of the other at the level of personal or textual agency however difference contests and threatens to subvert stable selfhood composing a scene of conflict even so it often proves to be instrumental in recharging a sense of the cultural valence of the literary text not least by virtue of its political implications in this regard the border where difference materialises has considerable presence in contributions to this volume prompting appreciation of texts that work on or travel across such borders however haphazardly and dangerously but also those that compose border textualities
