collins provides a thorough history of the new nineteenth century material and goes on to examine the theories on its architectural expression focussing on determining role of the reinforced concrete frame he argues that perret provides the first rational and effective expression of classical principles in modern construction published in 1959 and out of print since 1975 this new edition of concrete includes a foreword by kenneth frampton a scholarly introduction by réjean legault and several additional essays on perret by peter collins from the foreword by kenneth frampton concrete remains a valuable historical text that in many respects has never been given its due it is an unmatched pioneering history of the development of reinforced concrete up to 1914 it records and analyses the densely articulated if provincial english debate with respect to the aesthetic challenge posed by the increasing popularity of concrete from around 1870 onwards finally until very recently it was the only readily available monograph on auguste perret in english in this regard it is particularly valuable as a thorough and perceptive assessment of perret s life and career one that still stands as a point of departure for all current attempts to situate this seminal architect within the wider trajectory of twentieth century culture this book is about the role played by architects engineers and planners in transforming france during the three post war decades of growing prosperity a period when modernisation was a central priority of the state promising a way forward from the shame of defeat in 1940 to a place at the centre of the new europe the first part of the book examines the scale of transformation showing how architecture and urbanism both served the cause of modernisation and shaped the identity of the new france mainstream modernism was co opted to the service of the state from major public buildings to gaullist plans for the transformation of paris to establish the city as the capital of europe by contrast the second part of the book explores the critique of state sponsored modernisation by radical architects from le corbusier to the young turks of the 1960s such as georges candilis and the students who attacked the banality of mainstream modernism and its inability to address the growing problems of france s cities following may 1968 the beaux arts was closed the grand prix de rome symbol of the old order abolished for a while the establishment might continue as before but progressive architecture was set on a new course beautifully illustrated and written to be accessible to all the book sets the discussion of architecture and urbanism in its social political and economic contexts as such it will appeal both to students and scholars of the and mission early in their history brazilians began to puzzle over their surroundings and their relation to them the eighteenth century produced an entire school of nativistic writers who with the advent of independence became fiery nationalists still pursuing introspective studies of their homeland throughout the nineteenth century the intellectuals of brazil determined to define their nation its character and its aspirations in this now well established tradition josé honório rodrigues confronts the questions of who and what the brazilian is what brazil stands for where it has been and where it is going this study originally published in portuguese as aspirações nacionais was especially timely at a period when strong feelings of nationalism led brazilians to seek to define their own image and when the revolution of rising expectations disposed them to determine what goals they were seeking and how far they were on the road to achieving them in order to understand and explain his nation rodrigues poses two questions what are the national characteristics and what are the national aspirations both questions are complex but the reader will find well reasoned answers with a wealth of information on growth and development and abundant statistics to substantiate these answers this book tells the story of a unique scientific and human adventure following the life and science of the recent financial crisis has sparked debates surrounding the nature and role of accounting in informing capital markets and regulatory bodies about the financial performance and position of a firm these debates have drawn attention to the broader implications of accounting for the economy and society accounting and business economics brings together leading international scholars to examine the current state of accounting theory and its fundamental connection with the economics and finance of firms viewing the business entity from not only accounting but also national economic social political juridical anthropological and moral points of view the recent rise in europe of extreme right wing political parties along with outbreaks of violent nationalist fervor in the former communist bloc has occasioned much speculation on a possible resurgence of fascism at the polemical level fascism has become a generic term applied to virtually any form of real or potential violence while among marxist and left wing scholars discredited interpretations of fascism as a product of late capitalism are revived empty of cognitive significance these formulas disregard the historical and philosophical roots of fascism as it arose in italy and spread throughout europe in giovanni gentile philosopher of fascism a james gregor returns to those roots by examining the thought of italian fascism s major theorist in gregor s reading of gentile fascism was and remains an anti democratic reaction to what were seen to be the domination by advanced industrial democracies of less developed or status deprived communities and nations languishing on the margins of the great powers sketching in the political background of late nineteenth century italy industrially backward and only recently unified gregor shows how gentile supplied fascism its justificatory rationale as a developmental dictatorship gentile s actualism as his philosophy came to be identified absorbed many intellectual currents of the early twentieth century including nationalism syndicalism and futurism and united them in a dynamic rebellion against new perceived hegemonic impostures of imperialism the individual was called to an idealistic ethic of obedience work self sacrifice and national community as gregor demonstrates it was a paradigm of what we can expect in the twenty first century s response on the part of marginal nations to the globalization of the industrialized democracies gregor cites post maoist china nationalist russia africa and the balkans at the development stage from which fascism could grow the f cultural and intellectual dynamism often stand in close relationship to the expression of viewpoints and positions that are in tension or even conflict with one another this phenomenon has a particular relevance for early modern europe which was heavily marked by polemical discourse the dimensions and manifestations of this streitkultur are being explored by an international network funded by the leverhulme trust united kingdom the present volume contains the proceedings of the network s first colloquium which focused on the forms of renaissance conflict and rivalries from the perspectives of history language and literature tendo como ponto de partida o solo comum da teoria os textos reunidos apontam para as áreas mais diversas como a didática a historiografia do cinema a teoria cultural os estudos sobre memória e também sobre religião entende se que além das questões que constituem a teoria da história como campo metateórico há por assim dizer questões intrateóricas concernentes aos dilemas bastante específicos de cada campo de pesquisa em teoria da história e história da historiografia o fator em comum dos textos apresentados pode ser delineado em torno da preocupação com a afirmação do campo teórico como instância diversificada em que se busca a um só tempo o embasamento teórico e o horizonte metodológico que o cotidiano de pesquisa não permite perder de vista arrivò il cestino pieno di frutta e margherita allungò la mano verso una pesca ma la pasionaria ritrasse di scatto il cestello albertino tentò di intervenire a favore di sua madre ma la pasionaria scosse il capo e andò a nascondere il cestello nella credenza guareschi questo libro come dice guareschi nella prefazione è un gran fritto misto di roba che l'autore ha scribacchiato un po dappertutto tra il 1938 e il 1948 è appunto il guareschi tipo famiglia quello che ha tutto il suo mondo racchiuso fra le pareti domestiche si tratta di semplici cronache familiari inframezzate da riflessioni e storie strampalate che a volte fanno ridere a volte riflettere in queste pagine la forte vena umoristica e l'acuto spirito di osservazione di guareschi gli permettono di scherzare con affettuosa attenzione sui lati ridicoli della vita di famiglia questo volume che inaugura la pubblicazione in formato elettronico delle opere complete di bruno leoni include tutte le 408 recensioni scritte per la rivista il politico nel corso di un decennio 1950 1959 a sorprendere non è soltanto l'elevato numero di recensioni ma anche la diversità degli argomenti trattati dalla Iron and Steamship Archaeology Success and Failure on the ss Xantho the Springer Series in Underwater Archaeology

psichiatria all arte dalla religione alla letteratura dall archeologia alle civiltà orientali dalla storia all architettura oltre naturalmente alla politica all economia e al diritto si tratta di un testo utile per due motivi in particolare da un lato per capire meglio il pensiero di leoni poiché in queste recensioni i suoi riferimenti culturali vengono esplicitati e si chiarisce bene quale fosse la sua concezione della politica della filosofia e della società dall altro esso consente di farsi un idea sugli argomenti di cui non si discuteva in italia negli anni cinquanta il politico fondato dallo stesso leoni nel 1950 fu infatti un mirabile tentativo di innovare la cultura italiana e in queste recensioni che sono per la maggior parte di libri stranieri I autore suggerisce traduzioni e propone idee e argomenti in italia allora poco conosciuti o spesso conosciuti male le recensioni non sono mai banali e anzi vi emerge con chiarezza quali siano le valutazioni le idee e in generale il pensiero di leoni fare esplorazioni in campi così diversi e saperne trarre vantaggio nell elaborazione di idee nel proprio settore di ricerca richiede indubbiamente un'intelligenza e una cultura fuori dall ordinario ma questo era il suo approccio metodologico le scienze umane gli apparivano intimamente connesse e solo da una loro trattazione comune era convinto di poter trovare la soluzione ai problemi sociali o que fazemos realmente quando propomos uma interpretacao particular para um texto literario e o que se segue desta pergunta a teoria da literatura do seculo xx procurou responder a estas indagacoes por meio de uma robusta grelha de argumentos e justificacoes apesar da generosidade e das boas intencoes essas solucoes afastaram se progressivamente de uma nocao ampla de interpretacao procurar perceber o que falhou e como e um dos objetivos deste ensaio outro por certo bem mais dificil e o de tentar imaginar uma alternativa epistemologicamente mais util hermeneuticamente mais satistatoria literariamente mais capaz writing architecture in modern italy tells the history of an intellectual group connected to the small but influential italian einaudi publishing house between the 1930s and the 1950s it concentrates on a diverse group of individuals including bruno zevi an architectural historian and politician giulio carlo argan an art historian italo calvino a fiction writer giulio einaudi a publisher and elio vittorini and cesare pavese both writers and translators linking architectural history and historiography within a broader history of ideas this book proposes four different methods of writing history defining historiographical genres modes and tones of writing that can be applied to history writing to analyze political and social moments in time it identifies four writing genres myths chronicles history and fiction which became accepted as forms of multiple postmodern historical stories after 1957 an important contribution to the architectural debate writing architecture in modern italy will appeal to those interested in the history of architecture history of ideas and architectural education o objetivo desta obra é apresentar uma visão geral das principais correntes de pensamento da antropologia social e cultural do século xix até o presente os autores apresentam as origens o contexto e a relevância contínua das ideias que transformaram as ciências humanas e sociais e também a maneira como nos entendemos e as sociedades em que vivemos this work covers various topics relating to palaeontology la producción industrial en masa constituye efectivamente la característica dominante de la civilización moderna civilización realmente sin antecedentes históricos de la que es quizás su mejor característica y hacia la que tienden aun cuando por caminos diversos todos los países por esto la producción industrial en masa es el punto de donde mejor se captan por un lado las transformaciones que caracterizan nuestra época y por otro los diálogos de esta que encuentran en ella una premisa común y cuyo incremento es por lo demás deseado por todos este es también el punto de vista que permite captar mejor las peculiaridades del mundo moderno los problemas que se plantean en el derecho moderno son en realidad los que surgen de una producción industrial en masa y las dificultades nacen a menudo de la discordancia entre una realidad económica caracterizada por la producción industrial en masa y categorías jurídicas elaboradas con anterioridad no sólo la elaboración tradicional del derecho romano y la de la common law sino también la elaboración de la codificación napoleónica y de la pandectística son anteriores a la producción industrial en masa en realidad incluso la elaboración de la codificación napoleónica y de la pandectística se refiere a una sociedad artesana y mercantil más que industrial a la importancia predominante de las rentas de capital respecto de las rentas de trabajo y de actividad a la sociedad que encontramos descrita en las novelas de balzac y de stendhal y que ignoraba todavía electricidad automóviles máquinas de escribir y los mismos ferrocarriles reconozco que me he sentido fuertemente atraido por el neopositivismo y por la filosofía analítica durante los años en que comencé a ocuparme con continuidad de teoría general del derecho y de metodología de la ciencia jurídica a recibir la influencia de tales corrientes de pensamiento me encontraba por lo demás predisputado por un radical aborrecimiento de los discursos demasiado generales sobre el ser y el no ser y por la necesidad de permanecer con los pies en la tierra y de moverme si era necesario moverse dando un paso cada vez del neopositivismo he sacado el gusto por el rigor conceptual de la filosofía analítica he aprendido cuán grande es la importancia de las cuestiones de palabras especialmente en el procedimiento intelectual propio de los juristas que es la interpretación por lo demás por la misma razón por la que no me he identificado con ningún ismo dominante en la filosofía italiana después del idealismo fue la vez del existencialismo y del marxismo no me he considerado nunca un neopositivista ni tampoco un filósofo analítico en el sentido estricto de la palabra cae de su peso que quien prefiere el paciente trabajo del análisis a la construcción de las grandes síntesis se mueve en pequeños espacios tan pequeños como para no conseguir recorrer incluso en el curso de toda una vida todo el territorio para cultivar un campo inmenso como es el del derecho en todos sus aspectos sería necesario poseer un potente tractor mientras que el único instrumento que he llegado a manejar son las tijeras del jardinero norberto bobbio

the recent rise in europe of extreme right wing political parties along with outbreaks of violent nationalist fervor in the former communist bloc has occasioned much speculation on a possible resurgence of fascism at the polemical level fascism has become a generic term applied to virtually any form of real or potential violence while among marxist and left wing scholars discredited interpretations of fascism as a product of late capitalism are revived empty of cognitive significance these formulas disregard the historical and philosophical roots of fascism as it arose in italy and spread throughout europe in giovanni gentile philosopher of fascism a james gregor returns to those roots by examining the thought of italian fascism s major theorist in gregor s reading of gentile fascism was and remains an anti democratic reaction to what were seen to be the domination by advanced industrial democracies of less developed or status deprived communities and nations languishing on the margins of the great powers sketching in the political background of late nineteenth century italy industrially backward and only recently unified gregor shows how gentile supplied fascism its justificatory rationale as a developmental dictatorship gentile s actualism as his philosophy came to be identified absorbed many intellectual currents of the early twentieth century including nationalism syndicalism and futurism and united them in a dynamic rebellion against new perceived hegemonic impostures of imperialism the individual was called to an idealistic ethic of obedience work self sacrifice and national community as gregor demonstrates it was a paradigm of what we can expect in the twenty first century s response on the part of marginal nations to the globalization of the industrialized democracies gregor cites post maoist china nationalist russia africa and the balkans at the development stage from which fascism could grow the f

religione alla letteratura dall archeologia alle civiltà orientali dalla storia all architettura oltre naturalmente alla politica all economia e al diritto si tratta di un testo utile per due motivi in particolare da un lato per capire meglio il pensiero di leoni poiché in queste recensioni i suoi riferimenti culturali vengono esplicitati e si chiarisce bene quale fosse la sua concezione della politica della filosofia e della società dall altro esso consente di farsi un idea sugli argomenti di cui non si discuteva in italia negli anni cinquanta il politico fondato dallo stesso leoni nel 1950 fu infatti un mirabile tentativo di innovare la cultura italiana e in queste recensioni che sono per la maggior parte di libri stranieri l autore suggerisce traduzioni e propone idee e argomenti in italia allora poco conosciuti o spesso conosciuti male le recensioni non sono mai banali e anzi vi emerge con chiarezza quali siano le valutazioni le idee e in generale il pensiero di leoni fare esplorazioni in campi così diversi e saperne trarre vantaggio nell elaborazione di idee nel proprio settore di ricerca richiede indubbiamente un'intelligenza e una cultura fuori dall ordinario ma questo era il suo approccio metodologico le scienze umane gli apparivano intimamente connesse e solo da una loro trattazione comune era convinto di poter trovare la soluzione ai problemi sociali

la producción industrial en masa constituye efectivamente la característica dominante de la civilización moderna civilización realmente sin antecedentes históricos de la que es quizá su mejor característica y hacia la que tienden aun cuando por caminos diversos todos los países por esto la producción industrial en masa es el punto de donde mejor se captan por un lado las transformaciones que caracterizan nuestra época y por otro los diálogos de esta que encuentran en ella una premisa común y cuyo incremento es por lo demás deseado por todos este es también el punto de vista que permite captar mejor las peculiaridades del mundo moderno los problemas que se

plantean en el derecho moderno son en realidad los que surgen de una producción industrial en masa y las dificultades nacen a menudo de la discordancia entre una realidad económica caracterizada por la producción industrial en masa y categorías jurídicas elaboradas con anterioridad no sólo la elaboración tradicional del derecho romano y la de la common law sino también la elaboración de la codificación napoleónica y de la pandectística son anteriores a la producción industrial en masa en realidad incluso la elaboración de la codificación napoleónica y de la pandectística se refiere a una sociedad artesana y mercantil más que industrial a la importancia predominante de las rentas de capital respecto de las rentas de trabajo y de actividad a la sociedad que encontramos descrita en las novelas de balzac y de stendhal y que ignoraba todavía electricidad automóviles máquinas de escribir y los mismos ferrocarriles cuyas redes sólo se difunden a mediados del siglo xix tullio ascarelli
