how we can achieve healthy growth more regenerative than destructive restoring equity rather than exacerbating inequalities in tomorrow s economy per espen stoknes reframes the hot button issue of economic growth going beyond the usual dialectic of pro growth versus anti growth stoknes calls for healthy growth healthy economic growth is more regenerative than destructive repairs problems rather than greenwashing them and restores equity rather than exacerbating global inequalities stoknes a psychologist economist climate strategy researcher and green tech entrepreneur argues that we have the tools to achieve healthy growth but our success depends on

transformations in government practices and individual behavior Stokes provides a compass to guide us toward the mindset mechanisms and possibilities of healthy growth

The Bangladesh Journal of Agricultural Economics

1998

Tanzania's bank-dominated financial sector is small, concentrated, and at a relatively nascent stage of development. Financial services provision is dominated by commercial banks, with the ten largest institutions being preeminent in terms of mobilizing savings and intermediating credit. Medium to small banks rely systematically more on costlier short-term interbank financing and institutional deposits and have markedly higher operating costs. These structural features underpin financial stability challenges which are significant. Bank asset quality has deteriorated sharply in recent years and underprovisioning is significant, belying the apparently comfortable capital cushions. Credit growth has fallen precipitously, corporate debt loads have risen, and their cash flows are weak. Dollarization of bank balance sheets raises the possibility of solvency stress under shocks being exacerbated by funding liquidity pressures, especially at smaller banks.

Patient Safety and Quality Improvement in Healthcare

2020-12-15

The 30-volume set comprising the LNCS books 12346 until 12375 constitutes the refereed proceedings of the 16th European Conference on Computer Vision (ECCV 2020) which was planned to be held in Glasgow, UK, during August 23–28, 2020. The conference was held virtually due to the COVID-19 pandemic. The 1360 revised papers presented in these proceedings were carefully reviewed and selected from a total of 5025 submissions. The papers deal with topics such as computer vision, machine learning, deep neural networks, reinforcement learning, object recognition, image classification, image processing, object detection, semantic segmentation, human pose estimation, 3D reconstruction, stereo vision, computational photography, neural networks, image coding, image reconstruction, object recognition, motion estimation.

IC Master

2001

A call to action for the creative class and labor movement to rally against the power of big tech and big media. Corporate concentration has breached the stratosphere as have corporate profits. An ever-expanding constellation of industries are now monopolies where sellers have excessive power over buyers or monopsonies where buyers hold the whip hand over sellers or both. In chokepoint capitalism, scholar Rebecca Giblin and writer and activist Cory Doctorow argue we're in a new era of chokepoint capitalism with exploitative businesses creating insurmountable barriers to competition that enable them to capture value that should rightfully go to others. All workers are weakened by this, but the problem is especially well illustrated by the plight of creative workers from Amazon's use of digital rights management and bundling to radically change the economics of book publishing to Google and Facebook's siphoning away of ad revenues from news media and the big three record labels use of inordinately long contracts to up their own margins at the cost of artists. Chokepoints are everywhere. By analyzing book publishing and news, live music, and music streaming, screenwriting, radio, and more, Giblin and Doctorow deftly show how powerful corporations construct anti-competitive flywheels designed to lock in users and suppliers, make their markets hostile to new entrants, and then force workers and suppliers to accept unfairly low prices. In the book's second half, Giblin and Doctorow then explain how to batter through those chokepoints with tools ranging from transparency rights to collective action and ownership, radical interoperability, contract terminations, job guarantees, and minimum wages for creative work. Chokepoint capitalism is a call to workers of all sectors to unite to help smash these chokepoints and take back the power and profit that's being heisted away before it's too late.
