in their book gresley s silver link the authors analyzed the evolution of the a4s gresley s and their service up to gresley s death in 1941 this book takes this compelling story from the early years of the war up to their demise in the 1960s after four years of service pulling the lner s most prestigious trains the a4s took on a more utilitarian role and for six years worked hard to support britain s war effort from this they emerged bowed but unbeaten although in an extremely jaded condition once restored they took up where they had left off in 1939 and did exceptional service for the rest of their days with the help of previously unpublished material the authors analyze the second phase of the a4s careers first as lner engines then from 1948 under british railways management without a diesel or electric fleet of engines to replace them they entered a second golden age of fast running in the 50s then in the swinging sixties they faced as some thought a premature end as part of a much delayed modernisation programme until withdrawn

from service they continued to astound their footplate crew and performed exceptionally well even when maintenance standards had slipped and their condition had deteriorated they were thoroughbreds and have become a fitting memorial to the master engineers who produced and sustained them for 30 years or more

this book puts forward an institutional explanation of the recent dynamics of foreign direct investment fdi in china it argues that the concentration of fdi in the chinese manufacturing economy since the beginning of this century is largely the result of china s entrepreneurial urban growth strategy which was in turn motivated by the overall political and fiscal structures of china and was facilitated by urban land use under the manipulation of municipalities by identifying the interactions between cross border capital flow national regulations and local responses this book not only provides a fresh understanding of china s fdi pattern from an urban perspective that has been rare among publications on similar topics but also sheds light on the drivers underlying china s rapid economic growth and its implications for sustainable development it also stands as a useful reference for other countries and regions that plan to launch their own state led development projects
