primal emotions such as love and fear are associated with ancient parts of the psyche social emotions such as guilt and pride evolved among social primates evolutionary psychologists consider human emotions to be best adapted to the life our ancestors led in nomadic foraging bands in the tradition of darwin basic emotions theorists have proposed that certain emotions are innate in part because they are expressed the same in people around the world tomkins 1962 ekman 1977 1992 izard 1971 1992 plutchik 1980 buck 1981 these innate emotions are said to be mediated by affect programs in the brain emotions arise from activations of specialized neuronal populations in several parts of the cerebral cortex notably the anterior cingulate insula ventromedial prefrontal and subcortical structures such as the amygdala ventral striatum putamen caudate nucleus and ventral tegmental area in 1872 darwin published the expression of the emotions in man and animals in which he argued that all humans and even other animals show emotion through remarkably similar behaviors for the history of emotions is a field of historical research concerned with human emotion especially variations among cultures and historical periods in the experience and expression of emotions beginning in the 20th century with writers such as lucien febvre and peter gay an expanding range of methodological approaches is being applied scope scholarly debates about the nature of human emotion traditionally pit biological and cultural influences against one another although many existing theories acknowledge the role of culture the nature of feelings evolutionary and neurobiological origins antonio damasio gil b carvalho nature reviews neuroscience 14 143 152 2013 cite this article 30k accesses 658 jonathan h turner part of the book series handbooks of sociology and social research hssr 4 citations abstract humans are in essence evolved apes carrying the genome that we shared our common ancestor with present day great apes chimpanzees gorillas and orangutans when they are disrupted we find the origins of emotional disorders 1 seeking how the brain generates a euphoric and expectant response 2 fear how the brain responds to the threat of physical danger and death 3 rage sources of irritation and fury in the brain 4 lust how sexual desire and attachments are elaborated in the brain the emotions humans experience today emerged or were naturally selected in our evolutionary history as rapid information processing systems that helped us deal with the environment and events that occurred that is emotions evolved to help us cope with events and situations that had consequences for our immediate welfare on the origins of human emotions a sociological inquiry into the evolution of human affect jonathan h turner doi org 10 1515 9780804764360 cite this share this overview contents about this book language and culture are often seen as unique characteristics of human beings on the origins of human emotions a sociological inquiry into the evolution of human affect january 2000 authors jonathan turner university of california riverside from a sociological perspective that is informed by evolutionary biology primatology and neurology the book examines the current neurological bases of our emotional repertoire and their anthropology language and culture are often seen as unique characteristics of human beings in this book the author argues that our ability to use a wide array of emotions evolved long before spoken language and in fact constituted a preadaptation for the speech and culture that developed among later hominids the archaeology of mind presents an affective neuroscience approach which takes into consideration basic mental processes brain functions and emotional behaviors that all mammals share to locate the neural mechanisms of emotional expression and reveals for the first time the deep neural sources of the authors values and basic emotional feeli a brief history of the emotional brain the rise and fall of the limbic system theory the words we use to describe our emotions affect how we feel says historian tiffany watt smith and they ve often changed sometimes very dramatically in response to new cultural expectations and ideas take nostalgia for instance first defined in 1688 as an illness and considered deadly today it s seen as a much less serious affliction on the origins of human emotions a sociological inquiry into the evolution of human affect i jonathan h turner p em includes bibliographical
