article 7 as a normative benchmark it shows that most of the criticism levelled at the commission s article 9 decisions and the alrosa judgment of the cjeu is not justified since critics tend to over state both the rigour of article 7 and the laxness of article 9 remaining inconsistencies between the commitment practice and the standards for infringement decisions can it is submitted be justified by the consensual nature of commitment decisions and their underlying goal of procedural economy moreover it is suggested that too little importance is generally assigned to the beneficial effect
