a geo big year pandemic retirement is for the birds
this book recounts a year long birding quest across
pennsylvania in 2021 the quest was to see at least 67
bird species in each of the state s 67 counties during
the quest year the author now professor of geography
emeritus from penn state university coped with the
process of retiring after 42 years in academia and the
challenges that the covid 19 pandemic posed for safe
travel the book chronicles the birding experiences and
birds seen as well as the travel and retirement
challenges the story told chronologically is focused on
the search for birds it includes an account of what
birds were seen or not seen in specific counties and
specific sites within those counties it also recounts
the quest itself as it unfolded written by a geographer
places visited are also highlighted the narrative
conveys the adventure of experiencing the mix of both
popular and seldom visited places these places were
mostly rural and included state and county parks game
lands wildlife refuges trails and forests across the
state together with less attractive places for humans
that still attract birds such as cemeteries retention
ponds and county dumps the book includes 471 black and
white figures most of which are photo composites of
birds seen and or of the places visited in total the
471 figures consist of more than 600 photos of birds
plus more than 300 other images that include landscape
non bird c 19/20
