Politics and Letters 1981 we have recently lived through the turmoil of a global financial crisis that originated in the united states and despite the platitudes of neo liberal ideology nation states were deeply involved in managing this crisis if the state is again a preeminent actor in the global economy then state theory and the problem of the state should also return to the forefront of political theory toward a critical theory of states is an intensive analysis of the 1970s debate between state theorists ralph miliband and nicos poulantzas including its wider impact on marxist theories of the state in subsequent decades clyde w barrow makes unique arguments and contributions to this continuing discussion in state theory and lays the foundation for more theoretically informed empirical and historical research on the state in the age of globalization he argues that by merely moving past the poulantzas miliband debate as some have recommended scholars have abandoned much that is valuable in understanding the state particularly the need to comprehend the contemporary transformation of the state form and the state apparatuses as part of the new conditions of globalization and transnational capital accumulation building upon themes of state restructuring found in poulantzas and miliband barrow establishes the outlines of an approach that integrates the thought of both to propose a synthetic understanding of the new imperialism

A Companion to Public Philosophy 2022-04-19 the essays collected in posting the male examine representations of masculinity in post war and contemporary british literature focussing on the works of writers as diverse as john osborne joe orton james kelman ian rankin carol ann duffy alan hollinghurst ian mcewan graham swift and jackie kay the collection seeks to capture the current historical moment of crisis at which masculinity loses its universal transparency and becomes visible as a performative gender construct rather than denoting just one fixed polarised point on a hierarchised axis of strictly segregated gender binaries masculinity is

revealed to oscillate within a virtually limitless spectrum of gender identities characterised not by purity and self containment but by difference and alterity as the contributors demonstrate rather than a gender in crisis millennial manhood is a gender in transition patriarchal strategies of man making are gradually being replaced by less exclusionary patterns of self identification inspired by feminism men have begun to recognise themselves as gendered beings and as a result masculinity has been set in motion

Toward a Critical Theory of States 2016-05-12 over the last 20 years and especially over the last decade the international expansion of money and commodities and the international relocation of production have grown tremendously as a result there now exists a real contradiction in accumulation although global in orientation it remains structured by the nation state conventional economic literature generally explains the international economy as exogenous to the national economy though the former does influence the latter national economy and policy remain discrete conversely there is a developing literature on globalism that explores the tendency for international capital to eradicate national differences even to overpower nation states however neither interpretation adequately considers the contradictions for national policy that have accompanied the internationalization of capital in this volume dick bryan examines the influence of the international economy upon domestic accumulation describing the process as the expression of the contradiction between the international scope of accumulation and the national scope of its regulation developing a theoretical framework for understanding the contradiction within marxist political economy he addresses the theory of value on an international scale as well as theories of global restructuring and crisis these issues are then applied to those domestic policies such as monetary policy and balance of payments that interrelate with the international economy the author argues that the conventional theories informing these approaches have consistently failed to recognize the contradictions in international accumulation national economic management has as a result reverted to explicit class politics attempting to solve domestic economic problems by targeting the living standards of labor

The Palgrave Handbook of Literature and the City 2017-02-17 baudrillard is widely recognised as a powerful new force in cultural and social criticism and is often referred to as the high priest of postmodernism this study presents a detached assessment of his social thought and his reputation challenging the way his work has been received in postmodernism and proposing a new reading of his contribution to social theory using many sources currently available only in french mike gane provides the keys to understanding baudrillard s project and reveals the extent and scope of baudrillard s challenge to modern social theory and cultural criticism he looks at the sources of baudrillard s ideas analysing how baudrillard has turned these sources against themselves he describes baudrillard s dramatic encounter with critical marxist theory and psychoanalysis showing how baudrillard s post marxist writings define through the exploration of fatal theory a new episode in cultural history a period of cultural implosion this balanced account of baudrillard s social theory emphasises the originality of his work and argues that his significance can only be understood by grasping the paradoxes of his project baudrillard s work is poetic yet at the same time critical and fatal

Comparing the Literatures 2022-02-08 this analysis of the political economy of growth in the era of deng xiaoping takes issue with the growth accounting methodologies and market centred explanations which characterize so much of the literature on transition era china by adopting an approach which echoes the pioneering work of chalmers johnson alice amsden and robert wade on other east asian economies and which makes full use of the rich statistical materials that have become available since 1978 this book shows that chinese growth was driven by a combination of state led industrial policy and the favourable infrastructural legacies of the maoist era and in giving due weight to the sheer complexity of the growth process by looking in detail at the experience of four very different chinese regions it avoids over simplistic macroeconomic generalization nevertheless even this type of approach is inadequate because it fails to explain why industrial policy has been so much more successful in china than in other countries this book therefore goes beyond the development state approach to argue that state autonomy in china reflected the remarkably equal distribution of income and wealth at the end of the 1970s and paradoxically the destruction of party structures and institutions during the cultural revolution the policy implications are stark the chinese experience demonstrates that industrial policy and state spending on physical and social infrastructure can produce rich rewards conversely slavish reliance on foreign direct investment and trade are likely to limit the pace of growth but attempts to replicate china s success in latin america sub saharan africa and south asia will fail because their governments will not resist rent seeking by classes and interest groups moreover as the state becomes weaker in the wake of the re emergence of a powerful capitalist class even chinese growth may prove unsustainable

Baudrillard (RLE Social Theory) 2014-08-21 christopher pierson assesses the evidence of terminal decline but finds rather a whole series of deep seated challenges to traditional forms of socialist and social democratic thinking above all these problems are to be found in the political economy of social democracy and its commitment to incremental change in the context of an increasingly globalized market economy the latter chapters of the book are devoted to an assessment of market socialism one of the most vigorous and innovative attempts to seek to recast socialist aspirations under these quite changed circumstances in essence market socialism represents an attempt to reconcile new forms of social ownership with the seeming

ubiquity of the market having outlined this position pierson carefully and systematically critiques it and in the process develops a set of distinctive arguments about the nature of social ownership the potential of the labor managed economy and the appropriate forms for an extension of economic democracy

A Reply to the Calumnies of the Edinburgh Review Against Oxford 2017-11-15 Terry Eagleton is the foremost Marxist cultural theorist of our time in the first book-length study of this highly influential figure David Alderson provides detailed discussions of Eagleton's Marxism and his engagements with postmodernism as well as an evaluation of his interventions in Irish studies each of the chapters in this important intervention in current theoretical debates offers accessible contextualization of the key issues and provides detailed analyses of Eagleton's literary criticism Alderson shows that the complex relations between nature, culture and ideology, body, subjectivity and authority are at the heart of Eagleton's ethical and political concerns he goes on to demonstrate that these relations inform the theorist's critical examinations of such literary works as *Wuthering Heights* and *The Merchant of Venice* and his treatment of W. B. Yeats and Oscar Wilde

The Protest Makers 2013-09-03 No discipline has been more uniformly derided for a longer period than metaphysics of the ancient and medieval sciences now in disrepute even astrology and alchemy get better press the most devastating and currently the most influential attack on metaphysics has come from a broad spectrum of thinkers including Kierkegaard, Nietzsche, Heidegger, Arendt, Levinas, Derrida and Milbank who have argued that metaphysics is the root of modern nihilism and totalitarianism Anthony Mansueto puts this claim to the test developing a historical sociology of metaphysics that analyzes the social basis and political valence of metaphysical systems Mansueto does this globally and cross-culturally engaging not only the Hellenic tradition and its extension into medieval Christendom and Dar al-Islam but also the Indian and Chinese traditions specifically Mansueto argues that far from representing the roots of nihilism or modern state terror metaphysics emerges and continues to be necessary as a way to ground meaning and value in societies especially in market societies in which these have become problematic metaphysics tends to restrain exploitation and to encourage the redirection of surplus toward activities that promote development of human capacities knowing God the journey of the dialectic concludes with an outline of a new dialectical metaphysics that reconciles a Buddhist metaphysics of interdependence in the Hua Yen tradition with a historicized metaphysics of *esse* yielding results that look startlingly like the Dao Xue or Neo-Confucianism of Song China Mansueto shows how such a metaphysics can ground meaning and value while answering postmodern concerns to safeguard difference

On the Currency of Egalitarian Justice, and Other Essays in Political Philosophy

2011-01-03 with the help of discourse analysis and ideology critique ellen wesemüller establishes a theoretical framework to analyze african nationalism in apartheid and post apartheid south africa following the constructivist school of thought the study adopts the assumption that nations are imagined communities which are built on invented traditions it shows that historically and analytically there are two distinct concepts of nationalism constitutional and ethnic nationalism these concepts can be retraced in south africa where they form the central antagonism of black political thought the study of post apartheid african nationalism is placed in its historical perspective by focusing on the major milestones of african national congress discourse before and during apartheid it demonstrates that throughout its history the anc was characterized by the rivalry between concepts of constitutional and ethnic nationalism while the former concept found its counterpart in charterism the latter was adopted by african nationalism though the anc in its majority embraced charterism it continually played with the appeal of an exclusive racial nationalism the theoretical and historical contextualization of the book allows for the investigation of the various dimensions of current anc discourse on african nationalism wesemüller analyses different concepts of nationalism employed by the anc and compares these models to those discussed in academic literature she concludes that in post apartheid south africa the historical dichotomy of africanist and charterist nationalism persists within the anc while early concepts of nationalism like mandela s rainbow nation and mbeki s i am an african paid tribute to charterism the discourses on the african renaissance and mbeki s two nation address at least leave openings for africanist interpretations furthermore the analysis shows that nationalism is not only a product of discourse but also one of material conditions the study provides evidence that it is not only the anc that hijacks african nationalism in order to mobilize their electorate and push through unpopular policy choices also there are compelling material reasons for some south africans to adopt a nationalist agenda this is demonstrated by the new black bourgeoisie that mediates the gap between rich and poor as well as black and white african nationalism in this regard serves to legitimate domination and existing relations of inequality it affirms an african elite while neither uplifting the majority of african poor nor threatening the material privileges of white south africans lastly ellen wesemüller gives an outlook on the political implications of a resurrected nationalism the effects can be analyzed according to the two promises of nationalism superiority over outsiders and equality between insiders superiority in post apartheid south africa is established over other african countries immigrants and inner south african groups that are considered foreign
