Mastering the Art of Planning

2015-11-13

this book provides practical insights and tips for new planning graduates and early career professionals on how to remain focussed on planning principles in the face of the political community and process pressures experienced in planning practice it bridges the gap between urban planning as taught in universities and as practised in the real world with all the complications and subtleties of dealing successfully with differing personalities representing competing interests the content is drawn from the wisdom of scores of seasoned planning professionals who have generously shared their career learnings for the benefit of those who follow in their footsteps mastering the art of planning allows its readers to absorb learnings from others and hopefully to avoid making the same mistakes the use of humour and storytelling lends a personal touch to the learning experience that resonates with the reader this invaluable book will undoubtedly help anyone who reads it to grow as a professional

Growth and Development Planning in India

2020-11-30

the debate around growth has been an important feature of economic planning in india since independence this book deals with the wide range of issues related to the country s growth and development between 1951 and 2011 covering the 11 five year plans formulated and implemented during this period as well as in the decade after that the author traces the changing nature of planning over time from rigid state control on economic activities to reliance on market based planning in the time of economic reforms he has dealt with the transition from growth measures in the 1970s to the use of a mix of growth and redistribution in the 1980s and the economic reforms and liberalization measures from 1991 onwards and the inclusive growth we have seen in the twenty first century the central theme of the book is to analyse the role that planning played in maximizing the rate of economic growth and in improving the living

National Planning In The United States

2014-06-03

this book is about an art in which the netherlands excels strategic planning foreign observers will need little convincing of the merits of dutch planning they will want to know whether routine explanations small country industrious disciplined people hardened by the perennial fight against the sea hold any water and they will want to know where to look for the bag of tricks of dutch planners dutch readers need to be convinced first that planning in the netherlands is indeed effective before contemplating how this has come about our message for both is that to the extent that dutch planners do live in what others are inclined to see as a planners paradise it is a paradise carefully constructed and maintained by the planners themselves this smacks of bernard shaw describing a profession as a conspiracy

2023-08-19 12/36 fundamentals of risk management by paul hopkin

against laity however all knowledge and all technologies are socially constructed meaning that they are the products of people or groups pursuing often conflicting aims and coming to arrangements about what is to pass as true and good so this takes away the odium of dutch planners having their own agenda positioning ourselves we are in the business of interpreting dutch planning and at the same time committed to improving it this makes us part of the situation which we describe this situation is characterized by the existence of two divergent traditions urban design and the social science discipline called planologie

risk management
by paul hopkin

states victoria australia and british columbia
canada comparing the experiences of four
indigenous communities who are challenging and
renegotiating land use planning in these
places the book breaks new ground in our
understanding of contemporary indigenous land
justice politics it is the first study to
grapple with what it means for planning to
engage with indigenous peoples in major cities
and the first of its kind to compare the
underlying conditions that produce very
different outcomes in urban and non urban
planning contexts in doing so the book exposes
the costs and limits of the liberal mode of
recognition as it comes to be articulated
through planning challenging the received
wisdom that participation and consultation can
solve conflicts of sovereignty this book lays
the theoretical methodological and practical
groundwork for imagining what planning for
coexistence might look like a relational
decolonizing planning praxis where self
determining indigenous peoples invite settler
colonial states to their planning table on
their terms
