in an ever changing and exclusive me world it is increasingly difficult to find people that would be our permanent group of friends it is hard to even imagine a squad that won't change members every so often but what if you aren't the type to move out of your comfort zone what if it is hard for you to make new friends are you going to just do things on your own or are you going to suffer in silence around people who don't really get you the answer is neither you have to find a way to be able to gain the kind of friendships that would be lasting and meaningful you have to find make and grow your tribe first you need to figure out what a tribe means in this day and age the traditional meaning is a group of dwellers who grew up together in the same culture and speak a similar language but that is not the kind of tribe that we are going to talk about here you have to expand the meaning of that word and go ahead and identify the kind of people whom you want to have in your life there are a lot of challenges involved in bringing people into your life there would be some heartbreak when you have to let people go too but all the experiences that you would have would give you a solid group of people who would be there willing to grow old with you and share their lives with you and it would be all worth all the effort you put into it

nancy tatom ammerman examines the stories americans tell of their everyday lives from dinner table to office

and shopping mall to doctor s office about the things that matter most to them and the routines they take for granted and the times and places where the everyday and ordinary meet the spiritual in addition to interviews and observation ammerman bases her findings on a photo elicitation exercise and oral diaries offering a window into the presence and absence of religion and spirituality in ordinary lives and in ordinary physical and social spaces the stories come from a diverse array of ninety five americans both conservative and liberal white protestants african american protestants catholics jews mormons wiccans and people who claim no religious or spiritual proclivities across a range that stretches from committed religious believers to the spiritually neutral ammerman surveys how these people talk about what spirituality is how they seek and find experiences they deem spiritual and whether and how religious traditions and institutions are part of their spiritual lives

shadow tribe offers the first in depth history of the pacific northwest s columbia river indians the defiant river people whose ancestors refused to settle on the reservations established for them in central oregon and washington largely overlooked in traditional accounts of tribal dispossession and confinement their story illuminates the persistence of off reservation native communities and the fluidity of their identities over time cast in the imperfect light of federal policy and dimly perceived by non indian eyes the flickering presence of the columbia river indians has followed the treaty tribes down the difficult path marked out by the forces of american colonization based on more than a decade of archival research and conversations with native people andrew fisher s groundbreaking book traces the waxing and waning of columbia river indian identity from the mid nineteenth through the late twentieth centuries fisher explains how despite policies designed to destroy them the shared experience of being off the reservation and at odds with recognized tribes forged far flung river communities into a loose confederation called the columbia river tribe environmental changes and political pressures eroded their autonomy during the second half of the twentieth century yet many river people continued to honor a common heritage of ancestral connection to the columbia resistance to the reservation system devotion to cultural traditions and detachment from the institutions of federal control and tribal governance at times their independent and uncompromising attitude has challenged the sovereignty of the recognized tribes earning columbia river indians a reputation as radicals and troublemakers even among their own people shadow tribe is part of a new wave of historical scholarship that shows native american identities to be socially constructed layered and contested rather than fixed singular and unchanging from his vantage point on the columbia fisher has written a pioneering study that uses regional history to broaden our understanding of how indians thwarted efforts to confine and define their existence within narrow reservation boundaries

if his sense of justice had led him to fine discrimination in these matters the native american would long ago have made an attack on the national capitol so wrote indian inspector and former agent for the sioux james mclaughlin in 1910 long used as a source for scholarship on the battle of the little bighorn mclaughlin s classic memoir is a fascinating read acquainted with all of the major native american personalities of the late 19th century red cloud sitting bull crazy horse gall rain in the face etc mclaughlin had opportunities to question them at length about their involvement in custer s last battle though more recent research has brought into question some of the indian accounts in this book many of them stand and the first person perspectives are invaluable in addition mclaughlin s many years of contact with the sioux made him an admiring and honest friend he advocated for policies that were fair to the indians and like many others of the period saw westward expansion as an irreconcilable force that was overwhelming the native americans while not supporting their extraordinarily difficult transition to a new way of life if you buy this book only for the custer material it s worth the price of admission but the work is much richer than that

How to Find Your Tribe

for three fascinating disturbing years writer patricia hersch journeyed inside a world that is as familiar as our own children and yet as alien as some exotic culture the world of adolescence as a silent attentive partner she followed eight teenagers in the typically american town of reston virginia listening to their stories observing their rituals watching them fulfill their dreams and enact their tragedies what she found was that america s teens have fashioned a fully defined culture that adults neither see nor imagine a culture of unprecedented freedom and baffling complexity a culture with rules but no structure values but no clear morality codes but no consistency is it society itself that has created this separate teen community resigned to the attitude that adolescents simply live in a tribe apart adults have pulled away relinquishing responsibility and supervision allowing the unhealthy behaviors of teens to flourish ultimately this rift between adults and teenagers robs both generations of meaningful connections for everyone s world is made richer and more challenging by having adolescents in it
