The Political Economy of Independence in Europe

2020-04-15

this book examines secessionism separatism and calls for independence in the european union in recent history and within an economic context it contributes to the deeper understanding of factors influencing the individual decision making processes around secession using economic analysis to answer a set of simple questions about who the secessionists are what they really want what their incentives are and why it is easier to declare their secessionist tendencies than to vote for secession this a highly topical theme given the secessionist referenda in catalonia scotland ukraine kosovo and the united kingdom and this book offers a unique contribution to the debate it is based on an exclusive survey carried out among members of the pro independence parties and movements across 17 european countries and 56 european regions it uses the instruments of the political economy of conflict to reveal the importance of romantic and economic factors influencing the drive towards secession secessions have been regarded as a purely romantic phenomenon that cannot be rationalised whereas this book connects the

sensibility of romantic factors such as language religion or ethnicity with the sense of economic factors through its rational economic approach furthermore it applies the standard methodology of microeconomic analysis to discover the impact of individual pro secessionist factors an integral part of the text presents a brief historic overview uncovering the lesser known path dependency the book will find an audience among researchers scholars and students of economics and political science as well as policy makers and professionals engaged with a secessionist agenda

Politics in Captivity

2024-07-02

from the 1811 german coast slave rebellion to the 1971 attica prison uprising from the truancy of enslaved women to the extreme self discipline exercised by prisoners in solitary confinement black americans have through time resisted racial regimes in extraordinary and

everyday ways though these acts of large and small scale resistance to slavery and incarceration are radical and transformative they have often gone unnoticed this book is about black rebellion in captivity and the ways that many of the conventional well worn constructs of academic political theory render its political dimensions obscure and indiscernible while hannah arendt is an unlikely theorist to figure prominently in any discussion of black politics her concepts of world and worldlessness offer an indispensable framework for articulating a theory of resistance to chattel and carceral captivity politics in captivity begins by taking seriously the ways in which slavery and incarceration share important commonalities including historical continuity in zuckerwise s account of this commonality the point of connection between enslaved and incarcerated people is not exploited labor but rather resistance the relations between the rebellions of both groups appear in the writings of muhammed ahmad angela davis george jackson ruchell magee and assata shakur a genre zuckerwise calls black carceral political thought the insights of these thinkers and activists figure into zuckerwise s analyses of largescale uprisings and quotidian practices of resistance which she conceives as acts of world building against conditions of forced worldlessness in a moment when a collective racial reckoning is underway when critical race theory is a target of the right when prison abolition has become more prominent in mainstream political discourse it is now more important than ever to look to historical and contemporary practices of resistance to white domination
