introduction to both phonetics and phonology as applied to the teaching of  
pronunciation to english language learners section 1 selectively covers the  
main areas of phonetics and phonology without going into any area in more depth  
than the average english language teacher requires or that the average english  
language teacher trainee can handle section 2 focuses on practical issues  
related to learners and how they learn languages and what represents good  
practice in terms of classroom activities for pronunciation including aspects  
such as targets motivation and priorities the chapters end with activities to  
help the reader understand concepts section 3 provides innovative sample  
activities which put into practice the theoretical points covered in the first  
two sections answers to the various exercises recommended further reading both  
print and non print a glossary of technical phonetic terms and a bibliography  
of works on pronunciation teaching the text is accompanied by a companion  
website with audio recordings of model pronunciations and audio material

**ACCA Options P5 Advanced Performance Management Study Text 2014** the essential guide by one of america s leading doctors to how digital technology enables all of us to take charge of our health a trip to the doctor is almost a guarantee of misery you ll make an appointment months in advance you ll probably wait for several hours until you hear the doctor will see you now but only for fifteen minutes then you ll wait even longer for lab tests the results of which you ll likely never see unless they indicate further and more invasive tests most of which will probably prove unnecessary much like physicals themselves and your bill will be astronomical in the patient will see you now eric topol one of the nation s top physicians shows why medicine does not have to be that way instead you could use your smartphone to get rapid test results from one drop of blood monitor your vital signs both day and night and use an artificially intelligent algorithm to receive a diagnosis without having to see a doctor all at a small fraction of the cost imposed by our modern healthcare system the change is powered by what topol calls medicine s gutenberg moment much as the printing press took learning out of the hands of a priestly class the mobile internet is doing the same for medicine giving us unprecedented control over our healthcare with smartphones in hand we are no longer beholden to an impersonal and paternalistic system in which doctor knows best medicine has been digitized topol argues now it will be democratized computers will replace physicians for many diagnostic tasks citizen science will give rise to citizen medicine and enormous data sets will give us new means to attack conditions that have long been incurable massive open online medicine where diagnostics are done by facebook like comparisons of medical profiles will enable real time real world research on massive populations there s no doubt the path forward will be complicated the medical establishment will resist these changes and digitized medicine inevitably raises serious issues surrounding privacy nevertheless the result better cheaper and more human health care will be worth it provocative and engrossing the patient will see you now is essential reading for anyone who thinks they deserve better health care that is for all of us
