~~that creativity in the world of work is a joint outcome~~
of three interdependent forces individual thinking
group processes and organizational environment part i
explores basic cognitive mechanisms that underlie
creative thinking and includes chapters that discuss
cognitive foundations of creativity a cognitive network
model of creativity that explains how and why creative
solutions form in the human mind and imports a ground
breaking concept of creativity templates to the study
of creative idea generation in negotiation context the
second part is devoted to understanding how groups and
teams in organizational settings produce creative ideas
and implement innovations finally part iii contains
three chapters that discuss the role of social
organizational context in which creative endeavors take
place the book has a strong international mix of
scholarship and includes clear business implications
based on scientific research it weds the disciplines of
psychology cognition and business theory into one text
