## **The Organ, Its History and Construction**

1855

Joseph Jongen was director of the Brussels Conservatoire from 1925 to 1939. He was first and foremost a composer and yet his career as an organist and composer of organ music was remarkable. His *Sonata Eroica* has become one of the enduring works of the repertoire and the *Symphonie concertante* commissioned by Rodman Wanamaker for the organ of the Philadelphia Store has been considered the finest of all twentieth-century organ concertos. This is the first book ever to appear about Joseph Jongen in any language. It is based on twenty years of research by its author, John Scott Whiteley. Part I traces Jongen's life and achievements as an organist from his earliest training in Franck's birthplace Liège to his exile in England and his final years in Brussels during which time he headed the team that designed the organ for Belgian Radio. Part II is a guide to the organ music from the points of view of both performer and musicologist. Appendices provide a catalogue of works, a numbering system for his works without opus numbers, specifications of the organs he played, and lists of variant readings in his manuscripts. This book is indispensable for serious students of the organ, the Romantic organ repertoire, and European music of the early twentieth century.

## **The Multi-Organ Donor: A Guide to Selection, Preservation and Procurement**

2018-11-30

This book addresses organ transplantation from a psychoanalytical perspective where other authors consider topics of informed consent, scarcity, and organ trade. Zwart explores the ways in which the practice fundamentally challenges our basic experience and image of the body, revolving around issues such as embodiment, ownership, and bodily integrity. In organ transplantation, the body emerges as something which we simultaneously have and are constituting a whole as well as a set of partial objects that can be transplanted and replaced, donated and sold.
