it was 1942 in amsterdam when isaac and anna staal began noticing their jewish neighbors disappearing some were taken away by dutch police some vanished in the middle of the night as the nazis embarked on a manhunt for dutch jews isaac and anna made the agonizing decision to entrust their children to strangers and seek another hiding place for themselves on may 21 1943 the time had come dazed with sleep philip and his brother were given a last hug by their parents and put in the arms of an aunt who went out the door softly got on her bicycle with the two tiny tots and disappeared in the silent night sixty years later philip was commissioned to work for the restoration of rights in the netherlands when looking through archives and records he discovered the well kept secret of the war orphans guardians organization in his compelling story that weaves between past and present staal not only shares a heartbreaking narrative of his childhood as a toddler separated from his parents during world war ii and forced to live in orphanages after years of hiding but also how he eventually made it his personal mission to reimburse assets and restore rights lost by dutch victims of persecution

and search for the legacies of war orphans parents including his own settling the account shares poignant personal narrative historical facts and one man s determined pursuit to bring justice to dutch jewish war orphans and their murdered parents and resolve the mystery of his past in this worldwide survey clive gamble explores the evolution of the human imagination without which we would not have become a global species he sets out to determine the cognitive and social basis for our imaginative capacity and traces the evidence back into deep human history he argues that it was the imaginative ability to go beyond and to create societies where people lived apart yet stayed in touch that made us such effective world settlers to make his case gamble brings together information from a wide range of disciplines psychology cognitive science archaeology palaeoanthropology archaeogenetics geography quaternary science and anthropology he presents a novel deep history that combines the archaeological evidence for fossil hominins with the selective forces of pleistocene climate change engages with the archaeogeneticists models for population dispersal and displacement and ends with the europeans rediscovery of the deep history settlement of the earth this collection of papers examines key ideas in cultural historical approaches to children s learning and development and the cultural and institutional conditions in which they occur the collection is given coherence by a focus on the intellectual contributions made by professor mariane hedegaard to

understandings of children s learning through the prism of the interplay of society institution and person she has significantly shaped the field through her scholarly consideration of foundational concepts and her creative attention to the fields of activity she studies the book brings together examples of how these concepts have been employed and developed in a study of learning and development the collection allows the contributing scholars to reveal their reactions to hedegaard s contributions in discussions of their own work in the field of children s learning and the conditions in which it occurs the history of the settlement project of the massachusetts bay company in early new england this book offers a critical reading of the settler history of its first governor john winthrop in 1948 william w remington was one of the bright young men in the truman administration he was tall and handsome a product of dartmouth and columbia from 1940 on he had risen through government ranks serving on wartime boards the president s council of economic advisors and eventually as a major official in the department of commerce with a promising future ahead by 1954 however remington was dead assassinated in his cell by a team of inmates in a high security federal prison in un american activities historian gary may tells the fascinating story of william remington a story of intrigue injustice government corruption and anti communist hysteria may labored for eight years in reconstructing remington s case searching through fbi files government documents and waging an epic battle against then u s

attorney rudy guiliani to become the first historian to obtain access to grand jury records the result is a brilliant account of one man s tragic odyssey and a government run amok remington s future collapsed in 1948 when he was charged with being a communist and a soviet spy the accuser was elizabeth bentley an admitted ex communist herself and a former courier for soviet spymasters remington s life fell into a whirlpool as he fought government improprieties illegalities and the assumption he was guilty cleared by government loyalty boards he was indicted by a grand jury whose foreman was secretly helping elizabeth bentley prepare her memoirs remington suffered through two trials for perjury and the chief witness against him was his own embittered ex wife he was convicted and sentenced to the federal penitentiary at lewisburg pennsylvania where his reputation as a communist preceded him but may s account also offers fascinating insight into the depth of soviet penetration into wartime america as he follows remington s life from the radical circles at dartmouth and the tennessee valley authority in the 1930s through his washington career he finds that remington may well have been guilty of the charges against him gary may is one of the leading historians writing about postwar america his first book china scapegoat won the allan nevens prize and was hailed as as well as a novel as powerful as a good film by the the los angeles times here he brings his analytical and narrative skills to bear on one of the forgotten stories of the mccarthy era uncovering a gripping tale

of espionage corruption and personal tragedy considers problems of radioactive waste disposal and the precautions safeguards and standards to ensure safe handling of these wastes includes numerous nongovernmental reports on the sources and types of radioactive wastes the mormons had just arrived in utah after their 1 300 mile exodus across the great plains and over the rocky mountains food was scarce the climate shocking in its extremes and local indian bands uneasy despite the challenges brigham young and his counselors in the first presidency sent church members out to establish footholds throughout the great basin but the church leaders felt they had a commission to do more than simply establish zion in the wilderness they had to invite the nations to come up to the mountain of the lord s house in these critical early years when survival in utah was precarious missionaries were sent to every inhabited continent the 14 general epistles sent out from the first presidency from 1849 to 1856 provide invaluable perspectives on the events of mormon history as they unfolded during this complex transitional time woven into each epistle are missionary calls and reports from the field giving the mormons a glimpse of the wider world far beyond their isolated home at times the epistles are a surprising mixture of soaring doctrinal expositions and mundane lists of items needed in salt lake city such as shoe leather and nails settling the valley proclaiming the gospel collects the 14 general epistles with introductions that provide historical religious and environmental contexts for the letters

including how they fit into the christian epistolary tradition by which they were inspired tailings are produced from the processing of mineral ores and are commonly stored within embankment dams the design of the dams requires application of sound engineering principles and an understanding of the properties of the tailings this bulletin provides a framework for classifying different types of tailings ranging from ultra fine to coarse based on their geotechnical properties and provides typical geotechnical parameters for the different tailings types technologies for dewatering tailings to reduce the risk of storage continue to be developed and the different technologies from thickening to filtration and re application of old technologies are presented to illustrate the options available and where appropriate typical in situ properties this bulletin is directed towards a wide audience of stakeholders designers owners regulators communities and various organizations and provides a reference for communicating tailings properties and the benefits and limitations of technologies all mining operations and thereby tailings operations are unique there is no one solution fits all tailings dam designs need to account for site specific conditions such as climate physiography geochemistry geomorphology seismology mining processes environment and community setting with the application of technologies playing an important role in developing safe sustainable tailings facilities les stériles miniers sont produits à partir du traitement des minerais et sont généralement stockés derrière des

paul diderich worked in five new organizations dedicated to transforming
american schools the ohio state university lab school the eight year study a
harvard institute to revamp english language instruction the university of chicago s
board of examiners and the educational testing service throughout his career he
wrote critiques of american high schools and set forth many proposals to make
them more flexible without sacrificing academic excellence this anthology
resurrects 14 diderich essays eight of them never before published the scope
ranges from visions of social justice to the details of the daily schedule like his
heroes benjamin franklin and thomas jefferson he combined a passion for utopian
speculation with a fascination for practical problems a combination that is rare in
the world of school reform today

Natural Liberation 1997

the only book to deal comprehensively with insect feeding was published by c t
brues in 1946 his insect dietary was an account of insect feeding habits since that
time there has been a revolution in biology and almost all aspects of our
understanding of insect feeding have expanded to an extent and into areas that
would have been unthinkable in brues day yet our book does not replace insect
dietary but instead complements it because our aim is to bring together
information on the mechanisms by which food quality and quantity are regulated
we deliberately focus attention on the feeding process to include food finding
would have required a much larger book and would have moved the focus away
from more proximate mechanisms this book is dedicated to the late vincent g
dethier as a pioneer in studying the physiological basis of animal behavior he
focused on regulation of feeding in flies and caterpillars his work on the blowfly
together with that by his many students and co workers still provides the most
completely described mechanism of insect feeding the citation of his work in
almost every chapter in this book illustrates the importance of his findings and
ideas to our current understanding of regulation of insect feeding the authors in
this book provide many innovative and stimulating ideas typifying dethier s
approach to the study of feeding behavior
