martin bucer s de vera et falsa caenae dominicae administratione marks the collapse of his hopes for a negotiated settlement of the reformation in germany he completed the work in march 1546 as fresh negotiations between catholic and protestant theologians reached an impasse in regensburg as the second session of the council of trent was meeting and as charles v prepared to make war on the protestant league of schmalkalden at one level the work deals with the church s authority to regulate the celebration of the lord s supper but at a more fundamental level it challenges moderate catholics such as the humanist scholar bartholomaeus latomus to decide whether their ultimate loyalties lie with pope and council or with christ and his gospel

paul c h lim offers an insightful examination of the polemical debates about the doctrine of the trinity in seventeenth century england showing that this philosophical and theological re configuration significantly impacted the politics of religion in the early modern period through analysis of these heated polemics lim shows how trinitarian god talk became untenable in many ecclesiastical and philosophical circles which led to the emergence of unitarianism he also demonstrates that those who continued to embrace trinitarian doctrine articulated their piety and theological perspectives in an increasingly secularized culture of discourse drawing on both unexplored manuscripts and well known treatises of continental and english provenance he unearths the complex layers of the polemic from biblical exegesis to reception history of patristic authorities from popular religious radicalism during the civil war to puritan spirituality from continental socinians to english anti trinitarians who avowed their relative independent theological identity from the notion of the platonic captivity of primitive christianity to that of plato as mores atticus among this book s surprising conclusions are the findings that anti trinitarian sentiment arose from a puritan ambience in which biblical literalism overcame rationalistic presuppositions and that theology and philosophy were not as unconnected during this period as previously thought mystery unveiled will fill a significant lacuna in early modern english intellectual history

chris schabel presents a detailed analysis of the radical solution given by the franciscan peter auriol to the problem of reconciling divine foreknowledge with the contingency of the future and of contemporary reactions to it auriol s solution appeared to many of his contemporaries to deny god s knowledge of the future altogether and so it provoked intense and long lasting controversy schabel is the first to examine in detail the philosophical and theological background to auriol s discussion and to provide a full analysis of auriol s own writings on the question and the immediate reactions to them this book sheds new light both on one of the central philosophical debates of the middle ages and on theology and philosophy at the university of paris in the first half of the 14th century a period of parisian intellectual life which has been largely neglected until now

this sentence is false is that true the liar paradox embodied in those words exerted a particular fascination on the logicians of the western later middle ages and along with similar insoluble problems forms the subject of the first group of articles in this volume in the following parts professor spade turns to medieval semantic theory views on the relationship between language and thought and to a study of one particular genre of disputation that known as obligationes the focus is on the oxford scholastics of the first half of the 14th century and it is the name of william of ockham which dominates these pages a thinker with whom professor spade finds himself in considerable philosophical sympathy and whose work on logic and semantic theory has a depth and richness that have not always been sufficiently appreciated

## **Albert of Saxony's Twenty-Five Disputed Questions on Logic 1981**

le concezioni filosofiche tradizionali e predominanti sulla natura della filosofia e della conoscenza affondano le loro radici nel pensiero di pensatori radicalmente antinaturalisti la logica occupa un posto centrale nella riflessione filosofica e rappresenta un baluardo dell antinaturalismo dunque dato che la concezione della filosofia che si adotta dipende strettamente dalla concezione della logica che si adotta fino a quando non si sarà in grado di elaborare una concezione naturalista adeguata della logica non si sarà in grado di elaborare una posizione naturalista adeguata il presente volume intende mostrare come sia possibile elaborare una concezione naturalista in

grado di rispondere in modo adeguato alle obiezioni che le vengono mosse dai sostenitori delle concezioni tradizionali solo a patto di accettare di ripensare radicalmente la relazione che sussiste tra la logica la matematica le scienze naturali e la filosofia

what defined the crusades in contrast to other wars was the opportunity for warriors to win a spiritual reward the indulgence in the crusade indulgence spiritual rewards and the theology of the crusades c 1095 1216 ane l bysted examines the theological and institutional development of the indulgence from the proclamation of the first crusade to pope innocent iii this first comprehensive study of crusade indulgences in more than a hundred years challenges some earlier interpretations and demonstrates how theologians popes and crusade preachers in the 12th century formed the concept of indulgences and argued that fighting for christ and the church was meritorious in the sight of god and thus worthy of a spiritual reward proclaimed by the church

## **Calvin's Tormentors 1980**

this volume presents two leibnizian writings the specimen of philosophical questions collected from the law and the dissertation on perplexing cases these works originally published in 1664 and 1666 constitute respectively leibniz s thesis for the title of master of philosophy and his doctoral dissertation in law besides providing evidence of the earliest development of leibniz s thought and amazing anticipations of his mature views they present a genuine intellectual interest for the freshness and originality of leibniz s reflections on a striking variety of logico philosophical puzzles drawn from the law the specimen addresses puzzling issues resulting from apparent conflicts between law and philosophy the latter broadly understood as comprising also mathematics as well as empirical sciences the dissertation addresses cases whose solution is puzzling because of the convoluted logical form of legal dispositions and contractual clauses or because of conflicting priorities between concurring parties in each case leibniz dissects the problems with the greatest ingenuity disentangling their different aspects and proposing solutions always reasonable and sometimes surprising and he does not refrain from peppering his intellectual acrobatics with some humorous comments
