there are two ages in the history of television before hbo and after hbo before the launch of home box office in 1972 the industry had changed little since the birth of broadcast network television in the late 1940s the arrival of the premium cable channel began a revolution in the business and programming of tv for the generation that has grown up with the vast array of viewing choices available today it is almost inconceivable that our ever expanding media universe began with a few hours of unimpressive programming on a single cable channel written by an insider this is the story of hbo s reconfiguration of television and the company s continual reinvention of itself in a competitive and dynamic industry

this volume deals primarily with absentology an ontological and social scientific epistemological mode dedicated to the analysis of absence the book is drawn by manifestations of absence wherever they may be encountered it deals with three terms the shadow economy corruption and pollution while constructing a non-realist ontology predicated upon the emptiness of all predicates as expounded by certain strands of hindu and buddhist philosophy according to the absentological viewpoint there is nothing outside beyond below or above relations relations exist on their own enchain'd within an immense infinite regress opening and closing upon one another absentology is by consequence of its nonattachment to phenomena a form of social inquiry fundamentally alien to each and every social form and it abandons any illusions about the possibility of an escape from the realm of relationality this book will appeal to students and academics interested in ontological philosophy

in popular imagination the warfare of the early middle ages is often obscure unstructured and unimaginative lost between two military machines the romans and the normans which saw the country invaded and partitioned in point of fact we have a considerable amount of information at our fingertips and the picture that should emerge is one of english ability in the face of sometimes overwhelming pressures on society and a resilience that eventually drew the older kingdoms together in new external responses which united the english in a common sense of purpose this is the story of how the saxon kingdoms which had maintained their independence for generations were compelled to unite their forces to resist the external threat of the viking

incursions the kingdoms of east anglia mercia northumbria kent essex sussex and wessex were gradually welded into one as wessex grew in strength to become the dominant saxon kingdom from the weak Æthelred to the strong alfred rightly deserving the epithet great to the strong but equally unfortunate harold this era witnessed brutal hand to hand battles in congested melees which are normally portrayed as unsophisticated but deadly brawls in reality the warriors of the era were experienced fighters often displaying sophisticated strategies and deploying complex tactics our principal source replete with reasonably reliable reportage are the anglo saxon chronicles comprehensive in collation though subject to oral distortion and mythological excursions the narrative of these does not appear to flow continuously leaving too much to imagination but by creating a complementary matrix of landscapes topography and communications it is possible to provide convincing scenery into which we can fit other archaeological and philological evidence to show how the english nation was formed in the bloody slaughter of battle
