modernist texts and writings of protest have until now received most of the critical attention of literary scholars of the first world war popular literature with its penchant for predictable storylines melodramatic prose and patriotic rhetoric has been much maligned or at the very least ignored boys in khaki girls in print women s literary responses to the great war redresses the balance it turns the spotlight on the novels and memoirs of women writers many of whom are now virtually forgotten that appealed to a british reading public hungry for amusement news and above all encouragement in the face of uncertainty and grief the writers of 1914 18 had powerful models for interpreting their war as a consideration of texts from the anglo boer war of 1899 1902 shows they were also bolstered by wartime publishing practices that reinforced the sense that their books whether fiction or non fiction were not simply light entertainment but a powerful agents of propaganda generously illustrated boys in khaki girls in print is a scholarly yet accessible illumination of a hitherto untapped resource of women s writing and is an important new contribution to the study of the literature of the great war

every four years journalists propel a presidential campaign into the national consciousness new candidates and issues become features of the political landscape while familiar rituals are reshaped by the unpredictability of personalities and events underlying this apparent process of change however is a recurrent cycle of political themes and social attitudes a pulse of politics that locks the process of choosing a president into a predictable pattern in this bold and brilliant examination of modern presidential politics james david barber reveals the dynamics of this cycle and shows how the pattern of drift and reaction may be broken in this most critical of political choices barber probes beneath the surface of campaigns to detect a steady rhythm of major political motifs the theory he advances in colorful narrative chapters is that three dominant themes conflict conscience conciliation recur in foreseeable twelve year cycles a combative campaign truman vs dewey in 1948 is followed four years later by a moral crusade eisenhower vs stevenson in 1952 which in turn is succeeded by a contest to unify the nation the eisenhower stevenson rematch in 1956 the pattern is then renewed the fierce combat between kennedy and nixon in 1960 was followed in 1964 by the contest of principle between johnson and goldwater in 1968 richard nixon defeated hubert humphrey by promising to bring the nation together monitoring shifting national political moods is a new elite the journalists barber makes the case that the party system increasingly clumsy and inflexible can no longer pick up the beat of politics instead it is through newspapers magazines and television that the main themes of a campaign are sounded created and destroyed this new edition of the pulse of politics provides a timely guide to the themes of the 1992 presidential campaign and to future elections it will be of special interest to political scientists historians media analysts and journalists

in the last twenty five years americans have gained considerable freedom in thier personal lives relationships are now more flexible and self development has become a primary goal for both men and women most scholars have criticized this trend to greater freedom arguing that it undermines family bonds and promotes

selfishness and extreme independence francesca cancin is more optimistic in this book she shows that many american couples succeed in combining self development with commitment and that interdependence not independence is their ideal in interdependent relationships love and self development do not conflict but reinforce each other love in america compares traditional forms of marriage with these newer forms of close relationships starting with the nineteenth century cancin shows how gender roles became polarized with love which was identified with emotional expression no practical help being the responsibility of women while self development was regarded as a masculine concern these traditional images of love and relationships are still held by many americans today even though as cancin points out this can lead to marital conflict and individual stress and illness by contrast new images of love emphasizing self development for men and women and flexible androgynous roles began to emerge around 1900 accelerating in the 1960s she concludes that this trend to self development and androgyny will continue but that whether it will lead to more interdependent relationships or to more independence and isolation depends partly on economic and political changes in the wider society the evidence for cancin s argument comes from sociological historical and psychological sources her book will interest readers in these disciplines as well s appeal to a wide general audience

an innovative deeply researched history of chinese medicine in america and the surprising interplay between eastern and western medical practice chinese medicine has a long history in the united states with written records dating back to the american colonial period in this intricately crafted history tamara venit shelton chronicles the dynamic systems of knowledge therapies and materia medica crossing between china and the united states from the eighteenth century to the

present chinese medicine she argues has played an important and often unacknowledged role in both facilitating and undermining the consolidation of medical authority among formally trained biomedical scientists in the united states practitioners of chinese medicine as racial embodiments of irregular medicine became useful foils for western physicians struggling to assert their superiority of practice at the same time chinese doctors often embraced and successfully employed orientalist stereotypes to sell their services to non chinese patients skeptical of modern biomedicine what results is a story of racial constructions immigration politics cross cultural medical history and the lived experiences of asian americans in american history
