488 understanding planets their effects each planet emanates certain energy while moving through the zodiac circle some planets move faster like sun moon mercury mars and venus these are called inner planets and they affect us in a more personal and rapid manner influencing our daily life impulses and mood all planets in solar system are revolving around sun in a predefined pattern that s how we know when to wake up and when to go to bed planets however govern a lot more than just occurrence of day and night or eclipses and tides planets have a direct impact on us despite being several light years away while the position of planets does not dictate our everyday actions it does have a profound and close influence on our life and destiny understanding planets their effects much like nobody forces moon to orbit earth humans are also under no force to act in a certain way but everything in the universe is correlated and works in sync so naturally the movement of planets affects our actions as a result much like our actions affect the environment human body is in fact made of elements present in the universe the structure of our brain is very much similar to the structure of universe everything that happens to the universe happens to us our own magnetic field aligns with the earth s magnetic field each object in the universe be it humans earth planets and stars in our galaxy move in a precise symphony so we have to connect ourselves to these energy sources to receive the vibrations and function better each planet emanates certain energy while moving through the zodiac circle some planets move faster like sun moon mercury mars and venus these are called inner planets and they affect us in a more personal and rapid manner influencing our daily life impulses and mood the outer planets move slowly in the sky some even take as much as 2 5 years to change a sign these include jupiter saturn rahu and ketu and these planets have a more profound and long lasting impact on us unlike say moon astrological significance of planets every planet rules a zodiac sign except rahu and ketu which are in fact not actual planets but two reference points in the sky rahu and ketu are the points where the paths of the sun and moon intersect with each other rahu is the north lunar node the head of the dragon as per mythology and ketu is the south lunar node the qualities of the zodiac signs somewhat align with the characteristics of the planets for instance impulsive and active aries is ruled by fiery mars dreamy pisces is ruled by spiritual jupiter emotional cancer is ruled by motherly moon while confident leo is ruled by masculine sun in our lives at some point of time we may come across certain situations which may take our peace of mind in order to move ahead or get rid of that rut this all happens due to our past karmic influences as a human beings in spite of all efforts we struck there and helplessly looking for someone to lend their hand to come out of it but very few people come to us at that point of time to help us and many times we need to undergo severe pains and sufferings to move forward here comes the astrology the divine cosmic science which helps us to read and understand our karmic structure through the natal horoscope chart in order to understand our karma either we need to go to an astrologer or one has to learn depend upon their natural significations and their basic characters planets of contrary characteristics usually display inharmony when in aspect however the lordships of planets have a great say in moulding the planets considerably when in aspect this change in nature and characteristics is particularly noticeable during their dasas and bhuktis thus we see that in vedic astrology the results of aspects of planets depend upon their natural characteristics and lordships in western astrology it is the angle between the planets that decides harmonious or inharmonious aspects the planets at 90 or 120 apart are supposed to be in harmony or create a harmonious aspect tend to enhance each other's good significations modify and retard the bad significations if the angle is 90 or 180 or placed in 6th 8th to each other then they are said to be in inharmonious aspects they tend to irritate and block each other's significations they give bad results for the houses they are posited in and for the houses ruled by them we propose to discuss here the harmonious and inharmonious aspects between the sets of two planets in a general sense these aspects are pliable for various horoscopes according to lordships and natural characteristics of planets involved and other aspects to these planets the chronicles of hindu astrology the concept of overlapping is a detailed research work on imposed planetary influences to predict our life events planetary influence is not a new word in the language of astrology generally we judge a native's horoscope with the individual's natal chart and dasha system we compute all the planetary influences and associations present in the specific janma kundali but practically each and every event of a native's life gets influenced by the activities of his environment and the people around him specially some qualities like motivation demoralization moral support and financial support from others may create a huge change in the lifestyle of a native also it is observed that sometimes some special events like marriage child birth may create huge change in native's fate overlapping is a very significant but simple way to understand the mutual effects of various surrounding charts over the main natal chart of a native exactly which happens in calculation of the effects of transit the transitional planets introduce beneficial or malefic effects depending upon their relative position with respect to the natal planets a beneficial and friendly planet introduces more strength and positivity when passing over the beneficial places like trikona any person carries the properties and effects of planetary placements in his or her birth chart when he or she makes a close relationship with another person these effects create some influence on that person these effects are called overlapping concept of overlapping theory is a new idea in predictive astrology which is based on traditional and general vedic astrological concepts and ideas the rules and functionalities of parasharian astrology adopted here but this is totally a new thought and very much effective for prediction and remedial measures without any external remedy an authoritative primer to jyotish or vedic astrology this book draws on the author's extensive study of the tradition andrew mason explains in detail the practical applications of jyotish introduces the planets signs and houses as well as the many rich and highly entertaining mythologies of the system with an explanation of how to interpret them he also covers vedic astrology's sister science ayurveda and describes how they interact to provide insight into celestial timing sustained health and general wellbeing with sample charts that show the applications throughout the book provides a complete and accessible resource on jyotish for students of indian astrology and ayurveda practitioners it will also be of interest to anyone with a passion for astrology this book is about accordingly and move in the right direction to get the desired result and improve his relationships and living in each chapter the converse charts are taken to describe the events however it is advisable that no prediction should be made by studying the charts on the surface only all factors should be taken into consideration while predicting an event and the reading should be done by scientific approach only a special chapter in the beginning is given for the reader to make him understand the terminology and its role in understanding the chart which will then enable him to understand and improve his relations via vedic astrology easily though the calculative part has been explicitly ignored to make reading easy the combinations the in depth analysis and use of simple understanding planets their effects each planet emanates certain energy while moving through the zodiac circle some planets move faster like sun moon mercury mars and venus these are called inner planets and they affect us in a more personal and rapid manner influencing our daily life impulses and mood all planets in solar system are revolving around sun in a predefined pattern that s how we know when to wake up and when to go to bed planets however govern a lot more than just occurrence of day and night or eclipses and tides planets have a direct impact on us despite being several light years away while the position of planets does not dictate our everyday actions it does have a profound and close influence on our life and destiny understanding planets their effects much like nobody forces moon to orbit earth humans are also under no force to act in a certain way but everything in the universe is correlated and works in sync so naturally the movement of planets affects our actions as a result much like our actions affect the environment human body is in fact made of elements present in the universe the structure of our brain is very much similar to the structure of universe everything that happens to the universe happens to us our own magnetic field aligns with the earth s magnetic field each object in the universe be it humans earth planets and stars in our galaxy move in a precise symphony so we have to connect ourselves to these energy sources to receive the vibrations and function better each planet emanates certain energy while moving through the zodiac circle some planets move faster like sun moon mercury mars and venus these are called inner planets and they affect us in a more personal and rapid manner influencing our daily life impulses and mood the outer planets move slowly in the sky some even take as much as 2 5 years to change a sign these include jupiter saturn rahu and ketu and these planets have a more profound and long lasting impact on us unlike say moon astrological significance of planets every planet rules a zodiac sign except rahu and ketu which are in fact not actual planets but two reference points in the sky rahu and ketu are the points

where the paths of the sun and moon intersect with each other rahu is the north lunar node the head of the dragon as per mythology and ketu is the south lunar node the qualities of the zodiac signs somewhat align with the characteristics of the planets for instance impulsive and active aries is ruled by fiery mars dreamy pisces is ruled by spiritual jupiter emotional cancer is ruled by motherly moon while confident leo is ruled by masculine sun

the vargas are the unique feature of vedic astrology which has given it a definite edge over any other system in vogue the primary aim of studying a varga is two folds to study a particular aspect of human life pertaining to a specific house and to find out the true strength of planets related with the house a horoscope takes into account linear time and vertical declinations of the planets every division of zodiac has a corresponding division of time hence a varga gives projections representing possibilities which might occur in different time frames each chart gives a microscopic view of a particular facet of life seen in the light of dasha sequence there are many tools available to assess the true strength of a planet one set of rules rely on pac of planets their awasthas and yogas formed by them the other nadi system studies the effects of lords of sign nakshatra and sub under which a planet is placed at times these influences change the characteristics of a planet completely in this book an attempt is made to unite the two systems to get the true strength of planets in order to understand a planet and its significations in a better way a comparative study of planets in birth and divisional charts has also been made this book shall add to precision and accuracy of probable events and their qualitative effects on various aspects related to a native and as such will be of great use to serious students of astrology

in vedic astrology harmonious and inharmonious aspects among the planets depend upon their natural significations and their basic characters planets of contrary characteristics usually display inharmony when in aspect however the lordships of planets have a great say in moulding the planets considerably when in aspect this change in nature and characteristics is particularly noticeable during their dasas and bhuktis thus we see that in vedic astrology the results of aspects of planets depend upon their natural characteristics and lordships in western astrology it is the angle between the planets that decides harmonious or inharmonious aspects the planets at 90 or 120 apart are supposed to be in harmony or create a harmonious aspect tend to enhance each other s good significations modify and retard the bad significations if the angle is 90 or 180 or placed in 6th 8th to each other then they are said to be in inharmonious aspects they tend to irritate and block each other s significations they give bad results for the houses they are posited in and for the houses ruled by them we propose to discuss here the harmonious and inharmonious aspects between the sets of two planets in a general sense these aspects are pliable for various horoscopes according to lordships and natural characteristics of planets involved and other aspects to these planets

the chronicles of hindu astrology the concept of overlapping is a detailed research work on imposed planetary influences to predict our life events planetary influence is not a new word in the language of astrology generally we judge a native s horoscope with the individual s natal chart and dasha system we compute all the planetary influences and associations present in the specific janma kundali but practically each and every event of a native s life gets influenced by the activities of his environment and the people around him specially some qualities like motivation demoralization moral support and financial support from others may create a huge change in the lifestyle of a native also it is observed that sometimes some special events like marriage child birth may create huge change in native s fate overlapping is a very significant but simple way to understand the mutual effects of various surrounding charts over the main natal chart of a native exactly which happens in calculation of the effects of transit the transitional planets introduce beneficial or malefic effects depending upon their relative position with respect to the natal planets a beneficial and friendly planet introduces more strength and

positivity when passing over the beneficial places like trikona any person carries the properties and effects of planetary placements in his or her birth chart when he or she makes a close relationship with another person these effects create some influence on that person these effects are called overlapping concept of overlapping theory is a new idea in predictive astrology which is based on traditional and general vedic astrological concepts and ideas the rules and functionalities of parasharian astrology adopted here but this is totally a new thought and very much effective for prediction and remedial measures without any external remedy
