proceedings of the third international conference on frontiers of polymers and advanced materials held in kuala lumpur malaysia january 16 20 1995

Advanced Biomaterials in Biomedical Engineering and Drug Delivery Systems

2012-12-06

first of all i would like to share the great pleasure of the successful five day symposium with every participant in the 5th iketani conference which was held in kagoshima from april 1st tuesday to 22 saturday 1995 outstanding speakers enthusiastically presented their up to the minute results relatively little time was allotted for each presentation to ensure as much time as possible for intensive discussions on the particular topics that had just been presented i was delighted to see that the lectures were of high quality and the discussions were lively exciting and productive in a congenial atmosphere we also had 92 papers in the poster session in which young and relatively young scientists made every effort to present the novel results of their research in advanced biomaterials and drug delivery systems i believe some of the research is most promising and will become noteworthy in the twenty first century it was a privilege for me to deliver a lecture at the special session of the symposium in my introductory remarks i pointed out five key terms in multifaceted biomaterials research materials design concept or methodology devices properties demanded and fundamentals i am confident that innovative progress in device manufacturing for end use e.g. artificial organs vascular grafts and dds can be brought about only through properly designed advanced materials that exhibit the desired functionality at the interface with any living body

important contributions about the treatment modalities of breast cancer are presented in this book the risks and limitations of breast conserving therapy of mammary carcinoma are dealt with newest findings show that this form of therapy has the same outcome as conservative treatment modalities the book also considers controversial issues such as the treatment of mastopathy precancerous and non invasive lesions of the breast new but not yet approved regimes for the prevention of mammary

carcinoma and open questions concerning adequate operative treatment are discussed latest results presented here show that all modern palliative chemotherapy has a certain but limited effect on outcome and that early detection and preventive therapy surgical and hormonal will be of great importance for improved chances of survival of breast cancer

Breast Diseases

a circular and environment friendly economy could displace the linear economy as it is in use around the world this would involve enlarged life cycles for products and an increase in the efficiency of electric and electronic devices the generation of new materials will be essential as well as materials recycling or conversion after use this book discusses new ways of production management recycling and conversion of new and regular materials keywords microplastics lignocellulose based materials food packaging biorefinery solar energy reused materials recycling of plastics biopolymers composites polymeric systems co2 capture anticorrosive polymeric coatings metallic structures scrap for new steel nanomaterials waste from electronic components future of cars raw materials biomaterials bioeconomy circular bioeconomy polymeric electrolytes fuel cells

New Materials for a Circular Economy

2023-09-01

nsa is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976 pre dating the prestigious inis database which began in 1970 nsa existed as a printed product volumes 1 33 initially created by doe s predecessor the u s atomic energy commission aec nsa includes citations to scientific and technical reports from the aec the u s energy research and development administration and its contractors plus other agencies and international organizations universities and industrial and research organizations references to books conference proceedings papers patents dissertations engineering drawings and journal articles from worldwide sources are also included abstracts and full text are provided if available

coatings for functional applications advanced ceramic joining technologies ceramics for machining friction wear and other tribological applications ceramic composites for high temperature aerospace structures and propulsion systems thermal protection materials from retrospect to foresight carbon carbon composites ceramic matrix composites for lightweight construction ultra high temperature ceramics uhtc nanolaminated ternary carbides and nitrides max phases ceramics for heat engine and other energy related applications solid oxide fuel cells sofc armor ceramics next generation bioceramics ceramics for innovative energy and storage systems designing ceramics for electrochemical energy storage devices nanostructured materials and nanotechnology advanced ceramic processing and manufacturing technologies engineering porous ceramics thermal management materials and technologies geopolymers advanced ceramic sensor technology advanced ceramics and composites for nuclear and fusion applications advanced ceramic technologies for rechargeable batteries

Government-wide Index to Federal Research & Development Reports

1965-03

from a political societal and scientific point of view it is imperative to counteract global warming and overcome energy scarcity from a scientific perspective nanostructured materials play a crucial role in achieving these goals e g in the development of energy saving light emitting diodes solar cells rechargeable batteries or gas storage technologies however the potential design of the structure related properties of such nanostructured compounds requires in depth knowledge and strict control of their crystallization processes which can be achieved by monitoring the corresponding chemical reactions in situ this book is aimed at undergraduate and graduate students who wish to gain an overview of the applications synthesis or in situ characterization of inorganic nanostructured compounds such as lanthanide based materials quantum dots magnetic nanoparticles bioceramics battery electrodes and metal organic frameworks

Engineered Ceramics

2016-02-01

corrosion protection at the nanoscale explores fundamental concepts on how metals can be protected at the nanoscale by using both nanomaterials based solutions including nanoalloys noninhibitors and nanocoatings it is an important reference resource for both materials scientists and engineers wanting to find ways to create an efficient corrosion prevention strategy nanostructure materials have been

widely used in many products such as print electronics contact interconnection implant nanosensors and display units to lessen the impact of corrosion traditional methods for protection of metals include various techniques such as coatings inhibitors electrochemical methods anodic and cathodic protections metallurgical design are covered in this book nanomaterials based protective methods can offer many advantages over their traditional counterparts such as protection for early stage higher corrosion resistance better corrosion control this book also outlines these advantages and discusses the challenges of implementing nanomaterials as corrosion protection agents on a wide scale explains the main methods of detection monitoring testing measurement and simulation of corrosion at the nanoscale explores how metals can be protected at the nanoscale using nanotechnology and nanomaterials discusses the major challenges of detecting and preventing corrosion at the nanoscale

Revista de chimie

1979

comprises the proceedings of the tenth cellulose conference held at suny syracuse may 1988 addresses biogenesis and structure of cellulose the cellulose water system chemistry of cellulose and wood surface chemistry of wood and paper and cellulose membranes also considers specialty products and derivatives degradation and analysis

Nanostructured Materials

the need for a vaccine against hiv is obvious but the development of an effective vaccine has met with frustrations the hiv envelope glycoproteins residing in the viral membrane are the sole viral proteins exposed on the outside of virus particles and

Corrosion Protection at the Nanoscale

2020-03-10

this superbly illustrated book provides a thorough up to date overview of diagnostic breast imaging and therapy drs elizabeth morris michael fuchsjäger and thomas helbich three experts in the field have collaborated with colleagues from their institutions and selected medical centers to share their expertise the coverage ranges from basic information on imaging technologies and interventional equipment and how to use them optimally to the application of advanced high end techniques for screening and assessment in any given professional environment readers will find clear instruction

on the various breast interventional procedures guided by stereotaxis ultrasound and magnetic resonance imaging in wide clinical use the management of patients with ductal carcinoma in situ and high risk breast cancer is considered separately furthermore the role of minimally invasive therapy is examined and advice is provided on post therapy evaluation including breast implants a comprehensive diagnostic atlas with hundreds of images completes this volume and addresses the spectrum of various clinical situations

Information & Communications in Japan

2009-03-30

in the past decade since the first edition was published the study of cereal protein chemistry has grown and changed new separation techniques have been introduced while the application of achievements of molecular biology and genetic engineering of proteins has progressed dramatically this new edition includes these advances and updates the chemistry of cereal proteins for all specialists working in theory and practice of cereal grain production and processing

2003-06

semiannual with semiannual and annual indexes references to all scientific and technical literature coming from doe its laboratories energy centers and contractors includes all works deriving from doe other related government sponsored information and foreign nonnuclear information arranged under 39 categories e g biomedical sciences basic studies biomedical sciences applied studies health and safety and fusion energy entry gives bibliographical information and abstract corporate author subject report number indexes

Cellulose and Wood

for more than 30 years the highly regarded secrets series has provided students and practitioners in all areas of health care with concise focused and engaging resources for quick reference and exam review emergency medicine secrets 7th edition offers practical up to date coverage of the full range of essential topics in this dynamic field this highly regarded resource features the secrets popular question and answer format that also includes lists tables pearls memory aids and an easy to read style making inquiry reference and review quick easy and enjoyable the proven secrets series format

gives you the most return for your time succinct easy to read engaging and highly effective fully revised and updated throughout including protocols and guidelines that are continuously evolving and that increasingly dictate best practices new chapter on professionalism and social media applications expanded coverage of cost effective emergency medicine as well as weapons of mass destruction including chemical biologic and radiologic weapons explosives and tactical medicine top 100 secrets and key points boxes provide a fast overview of the secrets you must know for success in practice and on exams bulleted lists mnemonics practical tips from leaders in the field all providing a concise overview of important board relevant content multiple choice questions online provide opportunities for further self assessment portable size makes it easy to carry with you for quick reference or review anywhere anytime

The HIV-1 Envelope Glycoproteins

2003-12-01

this volume deals with some basic considerations of structure and its relation to function after outlining some basic principles in the first chapter including manufacturing effects structural determination is discussed in detail this is important since adequate characterization in terms of molecular size is necessary for a proper understanding and use the theme of interrelationships between structure and properties is developed in the next chapters the second part of the volume deals with selected applications in which the development and use of macromolecular materials in specific applications is described the selection of applications includes synthetic and natural polymers and the range of medical areas involved include orthopedics dialysis drug release macromolecular pharmacology blood contact and plastic surgery since the list could not be completely comprehensive these represent areas of special development or of continuing problems

Breast Imaging

2022-10-31

encyclopedia of environmental health second edition six volume set presents the newest release in this fundamental reference that updates and broadens the umbrella of environmental health especially social and environmental health for its readers there is ongoing revolution in governance policies and intervention strategies aimed at evolving changes in health disparities disease burden trans boundary transport and health hazards this new edition reflects these realities mapping new directions in the field that include how to minimize threats and develop new scientific paradigms that address emerging local national and global environmental concerns represents a one stop resource for scientifically reliable information on environmental health fills a critical gap with information on

one of the most rapidly growing scientific fields of our time provides comparative approaches to environmental health practice and research in different countries and regions of the world covers issues behind specific questions and describes the best available scientific methods for environmental risk assessment
