This volume discusses the effects of globalization on changing power relationships between transnational corporations (TNCs) and transnational capital, the state and subnational groups. TNCs have expanded their power with the deepening of market relations but they are not causing the state to wither away indeed neoliberal changes often occur with the permission or even encouragement of powerful states. Transnational capital has weakened labour groups in order to make production more competitive but the disadvantaged groups may mobilise to counter the power of transnational capital finally globalization is subjecting domestic policies to increased international scrutiny

Power in the Global Era 2000-09-08

In this book ten substantive chapters examine how collisions between technological developments, globalizing forces and thickening populist pressures, localizing dynamics constantly keep reinventing the state in unforeseen and unpredictable ways. We learn of how international organizations have fared and to what extent grass roots grumbles have impacted big picture developments in quite diverse parts of the world. Just placing unfolding crises under the microscope cannot but generate policy solving observations. Treated in corresponding order these crises revolve around adjusting international institutions, absorbing current populist outbursts, shifting from peacekeeping to peacemaking, spying in the global south, absorbing displaced persons, Rwandan land reform, pandemic and RMG readjustments, Bangladesh's democratic transition, Rohingya, Syrian refugees and Mexico's 1990s liberalization. Though overarching observations in the book accent state strength, battling with state porosity, the downward spiraling of global order and the simple lack of any controlling mechanism against globalizing, localizing dynamics in the trenches of everyday life being matched by continued uncertainty on the analytical plane.

while africa is too often regarded as lying on the periphery of the global political arena this is not the case african nations have played an important historical role in world affairs it is with this understanding that the authors in this volume set out upon researching and writing their chapters making an important collective contribution to our understanding of modern africa taken as a whole the chapters represent the range of research in african development and fully tie this development to the global political economy african nations play significant roles in world politics both as nations influenced by the ebbs and flows of the global economy and by the international political system but also as actors directly influencing politics and economics it is only through an understanding of both the history and present place of africa in global affairs that we can begin to assess the way forward for future development

developing a new theory of hegemony called group hegemony the author explains how a few wealthy countries maintain the liberal economic order and how this helps to sustain the economic disparity between the core and the periphery in the post world war ii era the theory proposes that the g7 acts as a global government of last resort a crisis manager when other institutions prove inadequate to sustain the world order the g7 also supplies resources such as large markets foreign investment and funding for international institutions these goods serve to entice the majority of countries to participate in and abide by the rules governing the world economic order without changing the systemic distribution of power the volume develops a theoretical analysis of the g7 s significance in international relations it explains how the g7 countries collaborate to perpetuate the economic order and impart an institutional stability to an inequitable system

this book introduces the editors new concept of awkward powers by undertaking a critical re examination of the state of international relations theorising on the changing nature of the global power hierarchy it draws attention to a number of countries that fit awkwardly into existing but outdated categories such as great power and middle power it argues that conceptual categories pertaining to the apex of the international hierarchy have become increasingly unsatisfactory and that new approaches focusing on such awkward powers can both rectify shortcomings on power theorising whilst shining a much needed theoretical spotlight on significant but understudied states the book s contributors examine a broad range of empirical case studies including both established and rising powers across a global scale to illustrate our conceptual claims through such a novel process we argue that a better appreciation of the de facto international power hierarchy in the 21st century can be achieved
