a nonsimple complex system indicates a mix of crucial and non crucial events with very different statistical properties it is the crucial events that determine the efficiency of information exchange between complex networks for a large class of nonsimple systems crucial events determine catastrophic failures from heart attacks to stock market

crashes this interesting book outlines a data processing technique that separates the effects of the crucial from those of the non crucial events in nonsimple time series extracted from physical social and living systems adopting an informal conversational style without sacrificing the clarity necessary to explain the contents will lead the reader through concepts such as fractals complexity and randomness self organized criticality fractional order differential equations of motion and crucial events always with an eye to helping to interpret what mathematics usually does in the development of new scientific knowledge both researchers and novitiates will find crucial events useful in learning more about the science of nonsimplicity

in the growing field of address research spanish emerges as one of the most complex indo european languages firstly it presents second person variation in its nominal pronominal and verbal systems moreover several spanish varieties have more than two address variants which compete and mix in intricate ways forms of address in the spanish of the americas showcases current research into this unique linguistic situation by presenting the original research of twelve scholars from a variety of theoretical and methodological perspectives the articles cover diachronic change and regional variation pragmatics dialect contact attitudes and identity the contributions are contextualized through an introduction and the responses of three established experts while a conclusion delineates a research agenda for the future this collection in english is meant to reach scholars beyond the confines of hispanic linguistics it should be of interest to romance linguists and specialists on second person variation across languages
