do you know that 30 of primary school students and 65 of high school students have myopia in japan also do you know that progressive myopia leads to blindness now children with myopia are rapidly increasing all over the world it is at a level where you would want to declare it as pandemic however the real cause is unknown here i present you with the breakthrough method to prevent and halt myopia which may overturn the prevailing theory that myopia cannot be prevented expert taken from the chapter introduction do you sense as i do that myopia is increasing among children there seems to be a general uneasiness among parents who suspect that their children in the community are increasingly nearsighted suddenly it seems everybody is nearsighted this uptick in nearsightedness is not just a localized phenomenon in recent years the entire world has seen a rise in myopia the 2013 school health statistics survey by mexth the japan ministry of education culture sports science and technology revealed that primary school students with uncorrected visual acuity va of 0 3 or less had more than tripled since 1979 moreover the percentage of those with unaided vision of less than 0 3 rises with age 33 in 2013 the data showed that 65 of high school students had naked eye vision of less than 1 0 of all the theories proposed to date the only one bearing truth is that outdoor play helps suppress myopia although longer periods of outdoor activity seem preferable researchers disagree on the required duration suggestions range from 1 hour per day to 14 hours per week as nobody knows why playing outdoor helps prevent myopia and its mechanism remains unknown it is impossible to set guidelines on duration
