construct subject headings and provide cross references for the public catalogue subject headings in the complex areas of languages literatures biographical and geographical works are given a chapter each review questions and exercises conclude most chapters a bibliography and glossary are valuable features of this work this bespoke ebook compilation is focused on primary subject knowledge and in particular the core curriculum areas of english and mathematics it has been produced in order to address workload concerns and to offer additional but focused support by presenting a collection of helpful chapters from a wide range of texts to support your learning effectively and ensure that you continue to grow your knowledge base develop your learning and enjoy exploring and researching a wide range of topics in a supportive and accessible way it takes key chapters from a range of popular educational texts each chapter has deliberately been kept in its original format so that you become familiar with a variety of styles and approaches as you progress your studies this two volume set lncs 7902 and 7903 constitutes the refereed proceedings of the 12th international work conference on artificial neural networks iwann 2013 held in puerto de la cruz tenerife spain in june 2013 the 116 revised papers were carefully reviewed and selected from numerous submissions for presentation in two volumes the papers explore sections on mathematical and theoretical methods in computational intelligence neurocomputational formulations learning and adaptation emulation of cognitive functions bio inspired systems and neuro engineering advanced topics in computational intelligence and applications teacher subject identity in professional practice focuses on a key but neglected element of a teacher s identity that of their subject expertise studies of teachers professional practice have shown the importance of a teacher s identity and the extent to which it can affect their resilience commitment and ultimately their effectiveness drawing upon narrative research undertaken with a range of teachers over a period of 14 years the book explores how subject expertise can play a significant role in teacher identity acting as a professional compass guiding teachers at all levels of their professional practice it reveals powerful individual stories of meaning making which highlight the dynamic importance of teachers subject expertise the book s metaphor of a professional compass goes to the heart of teacher professionalism and provides a valuable mechanism to enable teachers to respond to challenges they face in their daily practice it enables teachers to consider the moral dimensions of their practice and can constitute a significant component in professional formation and identity throughout the book the importance of subject expertise for teachers professional practice is explored at a range of scales from the classroom to broad education policy and at different stages of a teacher s career which offers readers a deeper understanding of the importance of subject expertise for teachers teacher subject identity in professional practice makes a significant contribution to an under researched area it identifies the role and significance of teachers subject expertise as a dimension of their teacher identity the book is key reading for teacher educators policy makers and researchers with an interest in teachers professional development and practice this volume provides both a quantitative statistical and qualitative analysis of late northumbrian verbal morphosyntax as recorded in the old

english interlinear gloss to the lindisfarne gospels it focuses in particular on the attestation of the subject type and adjacency constraints that characterise the so called northern subject rule concord system the study presents new evidence which challenges the traditional early middle english dating attributed to the emergence of subject type concord in the north of england and demonstrates that the syntactic configuration of the northern subject rule was already a feature of old english by setting the northumbrian developments within a broad framework of diachronic and diatopic variation in which manifestations of subject type concord are explored in a wide range of varieties of english the author argues that a concord system based on subject type rather than person number features is in fact a far less local and more universal tendency in english than previously believed bringing together established researchers and emerging scholars alike to discuss new readings of husserl and to reignite the much needed discussion of what phenomenology actually is and can possibly be about this volume sets out to critically re evaluate and challenge the predominant interpretations of husserl s philosophy and to adapt phenomenology to the specific philosophical challenges and context of the 21st century what is phenomenology maurice merleau ponty asks at the beginning of his phenomenology of perception and he continues it may seem strange that this question still has to be asked half a century after the first works of husserl it is however far from being resolved even today more than half a century after merleau ponty s magnum opus the answer is in many ways still up for grasp while it may seem obvious that the main subject of phenomenological inquiry is in fact the subject it is anything but self evident what this precisely implies considering the immense variety of different themes and methodological self revisions found in husserl s philosophy from its brentanian beginnings to its transcendental re interpretation and last but not least to its crypto deconstruction in the revisions of his early manuscripts and in his later work one cannot but acknowledge the fact that the subject of phenomenology marks an irreducible plurality of possible subjects paying tribute to this irreducible plurality the volume sets out to develop interpretative takes on the phenomenological tradition which transcend both its naive celebration and its brute rejection to re articulate the positions of other philosophers within the framework of husserl s thought and to engage in an investigative dialogue between traditionally opposed camps within phenomenology and beyond 2024 25 ssc general studies chapter wise topic and subject wise solved papers 1104 1595 e this book contains 957 set papers with detail analytical explanation and based on revised answer key the first comprehensive theoretical treatise on library of congress subject headings this important book provides an analysis of the library of congress subject heading system and its application library of congress subject headings aims to help improve the clarity of the system increase consistency and arrangement increase the number of effective access points facilitate the interaction of the system with the computer and generally to make the library of congress subject heading system and its application of even greater value to the cataloger and the user practicing catalogers library school personnel advanced students and any professional who is very knowledgeable about and seriously interested in library

of congress subject headings will want to read this highly acclaimed volume author william studwell includes theoretical conceptual and philosophical considerations based on 25 years of everyday practical cataloging and indexing work and the knowledge gained from theoretical research for the more than two dozen articles on subject cataloging that he has written in the last decade he presents thought provoking often controversial material in three parts the first section the system deals with the basic philosophical foundations of lc subject headings thirty two principles guidelines and suggestions are offered along with detailed explanations examples and their relationships to other principles the second section application focuses on the matters of subject cataloging practice or interpretation and application of lc subject headings the third section the future looks ahead to future issues relating to subject cataloging such as the development of a theoretical subject heading code the interface of lc subject headings with the computer and some speculation as to the role and nature of lc subject headings in the years to come much recent scholarship has sought to identify the linguistic and social factors that favor the expression or omission of subject pronouns in spanish this volume brings together leading experts on the topic of language variation in spanish to provide a panoramic view of research trends develop probabilistic models of grammar and investigate the impact of language contact on pronoun expression the book consists of three sections the first studies the distributional patterns and conditioning forces on subject pronoun expression in four monolingual varieties dominican colombian mexican and peninsular and makes cross dialectal comparisons in the second section experts explore spanish in contact with english maya catalan and portuguese to determine the extent to which each language influences this syntactic variable the final section examines the acquisition of variable subject pronoun expression among monolingual and bilingual children as well as adult second language learners this book outlines a new conception of the cyborg in terms of consciousness as the parallax gap between physical and digital worlds the contemporary subject constructs its own internal reality in the interplay of the virtual and the real reinterpreting the work of slavoj žižek and gilles deleuze in terms of the psychological and ontological construction of the digital alongside the philosophy of quantum physics this book offers a challenge to materialist perspectives in the fluid cyberspace that is ever permeating our lives the inclusion of the subject in its own epistemological framework establishes a model for an engaged spectatorship of reality through the analysis of online media digital art avatars computer games and science fiction a new model of cyborg culture reveals the opportunities for critical and creative interventions in the contemporary subjective experience promoting an awareness of the parallax position we all occupy between physical and digital worlds this book builds upon and contributes to the growing academic interest in feminism within the field of children s literature studies christie wilkie stibbs draws upon the work of luce irigaray helene cixous julia kristeva and jacques lacan in her analysis of particular children s literature texts to demonstrate how a feminist analysis opens up textual possibilities that may be applied to works of children s fiction in general extending the range of textual

engagements in children's literature through the application of a new poststructural critical apparatus covering each of the core curriculum areas in turn this is a reference on school subject teaching the authors assess the development of teaching within each subject area since the 1944 education act up to the year 2000 future challenges are also explored in the excessive subject a new theory of social change molly anne rothenberg uncovers an innovative theory of social change implicit in the writings of radical social theorists such as pierre bourdieu michel de cerateau judith butler ernesto laclau and slavo j zizek through case studies of these writers work rothenberg illuminates how this new theory calls into question currently accepted views of social practices subject formation democratic interaction hegemony political solidarity revolutionary acts and the ethics of alterity finding a common dissatisfaction with the dominant paradigms of social structures in the authors she discusses rothenberg goes on to show that each of these thinkers makes use of lacan's investigations of the causality of subjectivity in an effort to find an alternative paradigm labeling this paradigm extimate causality rothenberg demonstrates how it produces a nondeterminacy so that every subject bears some excess paradoxically this excess is what structures the social field itself whilst other theories of social change subject formation and political alliance invariably conceive of the elimination of this excess as necessary to their projects the theory of extimate causality makes clear that it is ineradicable to imagine otherwise is to be held hostage to a politics of fantasy as she examines the importance as well as the limitations of theories that put extimate causality to work rothenberg reveals how the excess of the subject promises a new theory of social change by bringing these prominent thinkers together for the first time in one volume this landmark text will be sure to ignite debate among scholars in the field as well as being an indispensable tool for students the subject of rosi braidotti politics and concepts brings into focus the diverse influence of the work of rosi braidotti on academic fields in the humanities and the social sciences such as the study and scholarship in among others feminist theory political theory continental philosophy philosophy of science and technology cultural studies ethnicity and race studies inspired by braidotti's philosophy of nomadic relations of embodied thought the volume is a mapping exercise of productive engagements and instructive interactions by a variety of international outstanding and world renowned scholars with texts and concepts developed by braidotti throughout her immense body of work in braidotti's work traversing themes of engagements emerge of politics and philosophy across generations and continents therefore the edited volume invites prominent scholars at different stages of their careers and from around the world to engage with braidotti's work in terms of concepts and or political practice first published in 1999 expectations placed on middle management have risen sharply in the last few years and their increased importance in the role of managing and developing others have been reflected in the new teacher training authority tta subject leader standards consequently the role of subject leader is one which necessitates careful preparation and development written in line with these standards in an accessible style and format this book supports inset courses and days designed to develop the essential management skills required by

secondary subject leaders provides support for the head of department in developing an more systematic approach to the management of an effective department provides useful information for aspiring heads of department and senior managers who are endeavouring to improve the performance of middle management in their schools this book is a comprehensive treatment of the professionalization and institutionalization of the academic discipline of geography in europe and north america with emphasis on the 20th century and the last quarter of the 19th no other book has ever attempted coverage of this sort it is relevant to geographers practitioners of the social and earth sciences and historians of science and education investigates the universal categories subject theme and agent with special reference to their functional status in modern standard arabic msa and how these three distinct functions may or may not coincide in arabic sentences these functions are inexplicitly characterised by classical and modern arab linguists and arabists alike it has been found that the pre viz sentence initial or post verbal noun phrase np in arabic can be assigned the syntactic function subject but may not necessarily assume the semantic function agent that the pre verbal np which may not necessarily be the subject has the pragmatic function theme and that these distinct functions sometimes cluster around a single np in certain sentences depending on genre it has also been found that in msa the order of sentence constituents is relatively free subject to a verb initial preference especially when needed to prevent ambiguity the present study reveals the fact that although coding features such as word order case marking and cross referencing viz agreement may provide a clear indication of which nps are subjects in msa they do not provide a clear cut indication of semantic relations such as agent the subject position in msa is not necessarily the canonical agent position an interdisciplinary and comprehensive treatment of bodily self consciousness considering representation of the body the sense of bodily ownership and representation of the self the body may be the object we know the best it is the only object from which we constantly receive a flow of information through sight and touch and it is the only object we can experience from the inside through our proprioceptive vestibular and visceral senses yet there have been very few books that have attempted to consolidate our understanding of the body as it figures in our experience and self awareness this volume offers an interdisciplinary and comprehensive treatment of bodily self awareness the first book to do so since the landmark 1995 collection the body and the self edited by josé bermúdez naomi eilan and anthony marcel mit press since 1995 the study of the body in such psychological disciplines as cognitive psychology cognitive neuroscience psychiatry and neuropsychology has advanced dramatically accompanied by a resurgence of philosophical interest in the significance of the body in our mental life the sixteen specially commissioned essays in this book reflect the advances in these fields the book is divided into three parts each part covering a topic central to an explanation of bodily self awareness representation of the body the sense of bodily ownership and representation of the self contributors adrian alsmith brianna beck josé luis bermúdez anna berti alexandre billon andrew j bremner lucilla cardinali tony cheng Frédérique de vignemont francesca fardo alessandro farnè carlotta fossataro shaun gallagher francesca garbarini patrick

Advances in Computational Intelligence 2016-03-31 teacher subject identity in professional practice focuses on a key but neglected element of a teacher s identity that of their subject expertise studies of teachers professional practice have shown the importance of a teacher s identity and the extent to which

it can affect their resilience commitment and ultimately their effectiveness drawing upon narrative research undertaken with a range of teachers over a period of 14 years the book explores how subject expertise can play a significant role in teacher identity acting as a professional compass guiding teachers at all levels of their professional practice it reveals powerful individual stories of meaning making which highlight the dynamic importance of teachers subject expertise the book's metaphor of a professional compass goes to the heart of teacher professionalism and provides a valuable mechanism to enable teachers to respond to challenges they face in their daily practice it enables teachers to consider the moral dimensions of their practice and can constitute a significant component in professional formation and identity throughout the book the importance of subject expertise for teachers professional practice is explored at a range of scales from the classroom to broad education policy and at different stages of a teacher's career which offers readers a deeper understanding of the importance of subject expertise for teachers teacher subject identity in professional practice makes a significant contribution to an under researched area it identifies the role and significance of teachers subject expertise as a dimension of their teacher identity the book is key reading for teacher educators policy makers and researchers with an interest in teachers professional development and practice

Teacher Subject Identity in Professional Practice 2014-07-15 this volume provides both a quantitative statistical and qualitative analysis of late northumbrian verbal morphosyntax as recorded in the old english interlinear gloss to the lindisfarne gospels it focuses in particular on the attestation of the subject type and adjacency constraints that characterise the so called northern subject rule concord system the study presents new evidence which challenges the traditional early middle english dating attributed to the emergence of subject type concord in the north of england and demonstrates that the syntactic configuration of the northern subject rule was already a feature of old english by setting the northumbrian developments within a broad framework of diachronic and diatopic variation in which manifestations of subject type concord are explored in a wide range of varieties of english the author argues that a concord system based on subject type rather than person number features is in fact a far less local and more universal tendency in english than previously believed

Old Northumbrian Verbal Morphosyntax and the (Northern) Subject Rule 2019-12-19 bringing together established researchers and emerging scholars alike to discuss new readings of husserl and to reignite the much needed discussion of what phenomenology actually is and can possibly be about this volume sets out to critically re evaluate and challenge the predominant interpretations of husserl's philosophy and to adapt phenomenology to the specific philosophical challenges and context of the 21st century what is phenomenology maurice merleau ponty asks at the beginning of his phenomenology of perception and he continues it may seem strange that this question still has to be asked half a century after the first works of husserl it is however far from being resolved even today more than half a century after merleau ponty's magnum opus the answer is in many ways still up for grasp while it may seem obvious that the main

subject of phenomenological inquiry is in fact the subject it is anything but self evident what this precisely implies considering the immense variety of different themes and methodological self revisions found in husserl s philosophy from its brentanian beginnings to its transcendental re interpretation and last but not least to its crypto deconstruction in the revisions of his early manuscripts and in his later work one cannot but acknowledge the fact that the subject of phenomenology marks an irreducible plurality of possible subjects paying tribute to this irreducible plurality the volume sets out to develop interpretative takes on the phenomenological tradition which transcend both its naive celebration and its brute rejection to re articulate the positions of other philosophers within the framework of husserl s thought and to engage in an investigative dialogue between traditionally opposed camps within phenomenology and beyond

School Subject Teaching 2013 in the excessive subject a new theory of social change molly anne rothenberg uncovers an innovative theory of social change implicit in the writings of radical social theorists such as pierre bourdieu michel de certeau judith butler ernesto laclau and slavoj žižek through case studies of these writers work rothenberg illuminates how this new theory calls into question currently accepted views of social practices subject formation democratic interaction hegemony political solidarity revolutionary acts and the ethics of alterity finding a common dissatisfaction with the dominant paradigms of social structures in the authors she discusses rothenberg goes on to show that each of these thinkers makes use

of lacan's investigations of the causality of subjectivity in an effort to find an alternative paradigm labeling this paradigm extimate causality rothenberg demonstrates how it produces a nondeterminacy so that every subject bears some excess paradoxically this excess is what structures the social field itself whilst other theories of social change subject formation and political alliance invariably conceive of the elimination of this excess as necessary to their projects the theory of extimate causality makes clear that it is ineradicable to imagine otherwise is to be held hostage to a politics of fantasy as she examines the importance as well as the limitations of theories that put extimate causality to work rothenberg reveals how the excess of the subject promises a new theory of social change by bringing these prominent thinkers together for the first time in one volume this landmark text will be sure to ignite debate among scholars in the field as well as being an indispensable tool for students

The Excessive Subject 2014-09-25 the subject of rosi braidotti politics and concepts brings into focus the diverse influence of the work of rosi braidotti on academic fields in the humanities and the social sciences such as the study and scholarship in among others feminist theory political theory continental philosophy philosophy of science and technology cultural studies ethnicity and race studies inspired by braidotti's philosophy of nomadic relations of embodied thought the volume is a mapping exercise of productive engagements and instructive interactions by a variety of international outstanding and world renowned scholars with texts and concepts developed by braidotti throughout her immense body of work in braidotti's work traversing themes of engagements emerge of politics and philosophy across generations and continents therefore the edited volume invites prominent scholars at different stages of their careers and from around the world to engage with braidotti's work in terms of concepts and or political practice

Effective Subject Leadership in Secondary Schools 2013-06-29 investigates the universal categories subject

theme and agent with special reference to their functional status in modern standard arabic msa and how these three distinct functions may or may not coincide in arabic sentences these functions are inexplicitly characterised by classical and modern arab linguists and arabists alike it has been found that the pre viz sentence initial or post verbal noun phrase np in arabic can be assigned the syntactic function subject but may not necessarily assume the semantic function agent that the pre verbal np which may not necessarily be the subject has the pragmatic function theme and that these distinct functions sometimes cluster around a single np in certain sentences depending on genre it has also been found that in msa the order of sentence constituents is relatively free subject to a verb initial preference especially when needed to prevent ambiguity the present study reveals the fact that although coding features such as word order case marking and cross referencing viz agreement may provide a clear indication of which nps are subjects in msa they do not provide a clear cut indication of semantic relations such as agent the subject position in msa is not necessarily the canonical agent position

Geography: Discipline, Profession and Subject since 1870 2013-10-28 an interdisciplinary and comprehensive treatment of bodily self consciousness considering representation of the body the sense of bodily ownership and representation of the self the body may be the object we know the best it is the only object from which we constantly receive a flow of information through sight and touch and it is the only object we can experience from the inside through our proprioceptive vestibular and visceral senses yet there have been very few books that have attempted to consolidate our understanding of the body as it figures in our experience and self awareness this volume offers an interdisciplinary and comprehensive treatment of bodily self awareness the first book to do so since the landmark 1995 collection the body and the self edited by josé bermúdez naomi eilan and anthony marcel mit press since 1995 the study of the body in such psychological disciplines as cognitive psychology cognitive neuroscience psychiatry and neuropsychology has advanced dramatically accompanied by a resurgence of philosophical interest in the significance of the body in our mental life the sixteen specially commissioned essays in this book reflect the advances in these fields the book is divided into three parts each part covering a topic central to an explanation of bodily self awareness representation of the body the sense of bodily ownership and representation of the self contributors adrian alsmith brianna beck josé luis bermúdez anna berti alexandre billon andrew j bremner lucilla cardinali tony cheng frédérique de vignemont francesca fardo alessandro farnè carlotta fossataro shaun gallagher francesca garbarini patrick haggard jakob hohwy matthew r longo tamar makin marie martel melvin mezue john michael christopher peacocke lorenzo pia louise richardson alice c roy manos tsakiris hong yu wong

The Individual Subject and Scientific Psychology 2017-12-15 single subject research strategies for evaluating change presents an overview of strategies used to evaluate change in single subject research a particular approach referring to time series paradigms in which each subject is used repeatedly these strategies include research design graphical analysis and statistical tests and it will be apparent that

such designs extend beyond those commonly employed in applied behavioral research the book opens with a brief historical perspective of time series and other small group research separate chapters follow covering the analysis of graphic data as being of singular importance in single subject research the units of analysis issue and a nonparametric randomization approach to data analysis and the growing awareness among researchers that understanding the individual characteristics of interacting subjects may be inadequate for understanding the process that has taken place between them the final chapter reviews the advantages and disadvantages of the analytic methods presented in the previous chapters this volume will be of interest to those individuals actively engaged in educational and psychological experimentation for which single subject research strategies are or may prove to be valuable students desiring to supplement their knowledge of a unique and rapidly emerging area of statistical analysis as applied to single subject research designs will also find this volume of importance
