this report presents an up to date description of emerging hybrid electric drive technology for transit buses in the united states the technology and its status benefits life cycle costs and deployment issues are discussed the report is intended to provide transit agencies with information to compare the emissions and fuel economy expected from hybrid electric transit buses with those expected from clean diesel or alternatively fueled buses

## **Automotive Manufacturing & Production**

1999-07

the mechanical engineering curriculum in most universities includes at least one elective course on the subject of reciprocating piston engines the majority of these courses today emphasize the application of thermodynamics to engine efficiency

performance combustion and emissions there are several very good textbooks that support education in these aspects of engine development however in most companies engaged in engine development there are far more engineers working in the areas of design and mechanical development university studies should include opportunities that prepare engineers desiring to work in these aspects of engine development as well my colleagues and i have undertaken the development of a series of graduate courses in engine design and mechanical development in doing so it becomes quickly apparent that no suitable te book exists in support of such courses this book was written in the hopes of beginning to address the need for an engineering based introductory text in engine design and mechanical development it is of necessity an overview its focus is limited to reciprocating piston internal combustion engines both diesel and spa ignition engines emphasis is speci cally on automobile engines although much of the discussion applies to larger and smaller engines as well a further intent of this book is to provide a concise reference volume on engine design and mechanical development processes for engineers serving the engine industry it is intended to provide basic information and most of the chapters include recent references to guide more in depth study
