european communities cec these projects show many interesting and potentially important possibilities for commercial activity in areas ranging from authoring systems designed to help the electronic origination of scientific and mathematical works to developments in the field of storing and transmitting graphical information the analysis assesses major advances in electronic publishing the analysis is constructed by the editor of the report to provide a balanced and comprehensive view of the latest developments in electronic publishing the editor s personal analysis of the subject is supplemented by quotations from the invited papers written by leading authorities on the subject the bibliography is a specially selected compilation of the most important published material on the subject of electronic publishing each key item in the literature is reviewed and annotated to assist in selecting the required information this book discusses the role of mobile network data in urban informatics particularly how mobile network data is utilized in the mobility context where approaches models and systems are developed for understanding travel behavior the objectives of this book are thus to evaluate the extent to which mobile network data reflects travel behavior and to develop guidelines on how to best use such data to understand and model travel behavior to achieve these objectives the book attempts to evaluate the strengths and weaknesses of this data source for urban informatics and its applicability to the development and implementation of travel behavior models through a series of the authors research studies traditionally survey based information is used as an input for travel demand models that predict future travel behavior and transportation needs a survey based approach is however costly and time consuming and hence its information can be dated and limited to a particular region mobile network data thus emerges as a promising alternative data source that is massive in both cross sectional and longitudinal perspectives and one that provides both broader geographic coverage of travelers and longer term travel behavior observation the two most common types of travel demand model that have played an essential role in managing and planning for transportation systems are four step models and activity based models the book s chapters are structured on the basis of these travel demand models in order to provide researchers and practitioners with an understanding of urban informatics and the important role that mobile network data plays in advancing the state of the art from the perspectives of travel behavior research no detailed description available for world databases in geography and geology l element central al voltant del qual gira aquest llibre és el programa de beques científiques que va impulsar el govern francès durant els anys cinquanta i seixanta a espanya s hi analitza l evolució d aquesta política de beques i les repercussions de manera especial entre els estudiants de física de la universitat de barcelona que en van ser els més beneficiats durant el curs de 1961 més de la meitat del total dels estudiants van obtenir una beca del 1956 i fins a la seva mort l any 1964 aquests ajuts els va gestionar l agregat científic attaché scientifique del govern francès a espanya el físic claude colin qui també va donar les primeres classes de mecànica quàntica moderna a la universitat de barcelona el llibre analitza també les activitats científiques dels agregats científics de l institut francès de barcelona anteriors a claude colin l institut francès va ser durant molts anys un catalitzador d aquestes beques i una font de divulgació de la ciència francesa mitjançant les conferències i els articles científics publicats al butlletí l últim capítol revisa la carrera d alguns físics becats que van romandre a França i que han seguit una carrera científica força destacada en aquest país principalment en física nuclear i altes energies aquests físics són lluis bel oriol bohigas xavier campí alfons capella antoni lloret i eduardo de rafael dealing with information is one of the vital skills in the
