it has long been assumed that religion is in decline in the west however it continues to have an important yet contested role in individual lives and in society at large furthermore half a century or so in which religion and belief were barely talked about in public has resulted in a pressing lack of religious literacy leaving many ill-equipped to engage with religion and belief when they encounter them in daily life in relationships law media the professions business and politics among others this valuable book is the first to bring together theory and policy with analysis and expertise on practices in key areas of the public realm to explore what religious literacy is why it is needed and what might be done about it it makes the case for a public realm which is well-equipped to engage with the plurality and pervasiveness of religion and belief whatever the individual's own stance it is aimed at academics policy makers and practitioners interested in the policy and practice implications of the continuing presence of religion and belief in the public sphere
