Chemical Thermodynamics of Americium Advanced Thermoelectrics Design, Fabrication, Properties and

Applications of Smart and Advanced Materials INIS Atomindex            

Chemical Thermodynamics of Americium 1995-10-25 this is the second volume in a series of critical reviews of the chemical thermodynamic data of those elements of particular importance in the safety assessment modeling of high level radioactive waste storage and disposal facilities the objective of these reviews is to provide a set of reliable thermodynamic data that can be used to describe the behaviour of these elements under conditions relevant for radioactive waste disposal systems and the geochemical environments the present volume is a review of experimental data reported in the literature for americium on a few occasions where no data existed comparisons and estimates were made based on experimental data on analog lanthanide elements the basic philosophy was to develop a minimum set of solid phases and solution species of americium that would fit all experimental data being reviewed

Advanced Thermoelectrics 2017-11-06 this book provides an overview on nanostructured thermoelectric materials and devices covering fundamental concepts synthesis techniques device contacts and stability and potential applications especially in waste heat recovery and solar energy conversion the contents focus on thermoelectric devices made from nanomaterials with high thermoelectric efficiency for use in large scale to generate megawatts electricity covers the latest discoveries methods technologies in materials contacts modules and systems for thermoelectricity addresses practical details of how to improve the efficiency and power output of a generator by optimizing contacts and electrical conductivity gives tips on how to realize a realistic and usable device or module with attention to large scale industry synthesis and product development prof zhifeng ren is m d anderson professor in the department of physics and the texas center for superconductivity at the university of houston prof yucheng lan is an associate professor in morgans state

university prof qinyong zhang is a professor in the center for advanced materials and energy at xihua university of china

Design, Fabrication, Properties and Applications of Smart and Advanced Materials 2016-06-22 this book introduces various advanced smart materials and the strategies for the design and preparation for novel uses from macro to micro or from biological inorganic organic to composite materials selecting the best material is a challenging task requiring tradeoffs between material properties and designing functional smart materials the development of smart advanced materials and their potential applications is a burgeoning area of research exciting breakthroughs are anticipated in the future from the concepts and results reported in this book
