House of Debt 2015-05-20 a concise and powerful account of how the great recession happened and what should be done to avoid another one well argued and consistently informative wall street journal the great american recession of 2007 2009 resulted in the loss of eight million jobs and the loss of four million homes to foreclosures is it a coincidence that the united states witnessed a dramatic rise in household debt in the years before the recession that the total amount of debt for american households doubled between 2000 and 2007 to 14 trillion definitely not armed with clear and powerful evidence atif mian and amir sufi reveal in house of debt how the great recession and great depression as well as less dramatic periods of economic malaise were caused by a large run up in household debt followed by a significantly large drop in household spending though the banking crisis captured the public s attention mian and sufi argue strongly with actual data that current policy is too heavily biased toward protecting banks and creditors increasing the flow of credit they show is disastrously counterproductive when the fundamental problem is too much debt as their research shows excessive household debt leads to foreclosures causing individuals to spend less and save more less spending means less demand for goods followed by declines in production and huge job losses how do we end such a cycle with a direct attack on debt say mian and sufi we can be rid of painful bubble and bust episodes only if the financial system moves away from its reliance on inflexible debt contracts as an example they propose new mortgage contracts that are built on the principle of risk sharing a concept that would have prevented the housing bubble from emerging in the first place thoroughly grounded in compelling economic evidence house of debt offers convincing answers to some of the most important questions facing today s economy why do severe recessions happen could we have prevented the great recession and its consequences and what actions are needed to prevent such crises going forward

Prayer: A Force That Causes Change 2009-10-02 healthcare organizations and professionals have long needed a straightforward workbook to facilitate the process of root cause analysis rca while other industries employ the rca tools liberally and train facilitators thoroughly healthcare has lagged in establishing and resourcing a quality culture

presently a growing number of third party stakeholders are holding access to accreditation and reimbursement pending demonstration of a full response to events outside of expected practice an increasing number of exceptions to healthcare practice have precipitated a strong response advocating the use of proven quality tools in the industry in addition the industry has now expanded its scope beyond the hospital walls to many ancillary healthcare facilities with little experience in implementing quality tools this book responds to the demand for a rca workbook written specifically for healthcare yet still broad in its definition of the industry this book contains everything that the typical rca leader in healthcare requires a text specific to healthcare but using the broadest definition of the industry to include not only acute care hospitals but rehabilitation facilities long term care facilities outpatient surgery centers ambulatory services and general office practices a workbook style format that walks through the process step by step straightforward text without sidebars tables and tips worksheets are provided at the end of the book to reduce reader distraction within the text a wide range of real world examples format for use by the most naive of users and most basic of processes as well as a separate section for more advanced users or more complex issues templates both print and electronic included for the reader s use ready to use educational materials with scripting to enable the user to train others and garner support for the use of the techniques background text for users in leadership to understand the tools in the larger context of healthcare improvement up to date information on the latest in the use of rca in satisfying mandatory reporting requirements and slaying the myth that the process is onerous and fraught with barriers background text and tools process are separated to facilitate the readers specific needs healthcare leaders can appreciate the current context and requirements without wading through the actual techniques end users can begin learning the skills without wading through dense administrative text language and tone promoting the use of the tools for improvement of processes that have experienced exceptions as opposed to assigning blame for errors attention to process ownership training and resourcing and most importantly thorough description of the improvement process as well as the analysis
