Works of Thomas Hill Green 1997 kenneth r westphal presents an original interpretation of hume s and kant s moral philosophies he argues that focusing on the differences between these two accounts occludes a decisive shared achievement a constructivist account of the basic principles of justice which does not depend on moral realism nor moral anti realism or irrealism

Early records of an old Glasgow family 1902 this book is a major contribution to the study of the philosopher f h bradley the most influential member of the nineteenth century school of british idealists it offers a sustained interpretation of bradley s principles of logic explaining the problem of how it is possible for inferences to be both valid and yet have conclusions that contain new information the author then describes how this solution provides a basis for bradley s metaphysical view that reality is one interconnected experience and how this gives rise to a new problem of truth

The Nonconformist's Memorial 1803 this book tells the story of idealism in modern philosophy from the seventeenth century to the turn of the twenty first paul guyer and rolf peter horstmann define idealism as the reduction of all reality to something mental in nature rather than distinguishing between metaphysical and epistemological versions of idealism they distinguish between metaphysical and epistemological motivations for idealism they argue that while metaphysical arguments for idealism have only rarely been accepted for example by bishop berkeley in the early eighteenth century and the british idealists bradley and mcTaggart in the late nineteenth and early twentieth centuries epistemological arguments for idealism have been widely accepted even in the so called analytic philosophy of the twentieth century guyer and horstmann discuss many philosophers who have played a role in the development of idealism from descartes hobbes

spinoza leibniz locke berkeley and hume through kant the german idealists fichte schelling and hegel schopenhauer and nietzsche the british and american idealists such as green and royce in addition to bradley and mc taggart g e moore and bertrand russell neo kantians such as ernst cassirer and twentieth century philosophers such as wittgenstein collingwood carnap sellars and mcdowell

How Hume and Kant Reconstruct Natural Law 2016 british literature and the life of institutions charts a literary prehistory of the welfare state in britain around 1900 but it also marks a major intervention in current theoretical debates about critique and the dialectical imagination by placing literary studies in dialogue with political theory philosophy and the history of ideas the book reclaims a substantive reformist language that we have ignored to our own loss this reformist idiom made it possible to imagine the state as a speculative and aspirational idea as a fully realized form of life rather than as an uninspiring ensemble of administrative procedures and bureaucratic processes this volume traces the resonances of this idiom from the victorian period to modernism ranging from mary augusta ward george gissing and h g wells to edward carpenter and e m forster compared to this reformist language the economism that dominates current debates about the welfare state signals an impoverishment that is at once intellectual cultural and political critiquing the shortcomings of the welfare state comes naturally to us but we often struggle to offer up convincing defences of its

principles and aims this book intervenes in these debates by urging a richer understanding of critique speculation this provocative new study suggests does not signify the cancellation of critique but an aspirational moment inherent in critique itself if we want to defend the state kohlmann argues we need to learn to think about it again

The Logical Foundations of Bradley's Metaphysics 2004-11-22 during a period of great religious upheaval anglican philosopher and ecclesiastic henry longueville mansel 1820 1871 became famous for his 1858 bampton lectures which sought to defend traditional faith by employing a skeptical philosophy understanding mansel and the passionate debate that surrounded his career provides insight into the current struggle for ancient religions to articulate their traditions in a modern world in scripture skepticism and the character of god dane neufeld explores the life and thought of the now forgotten nineteenth century theologian examining the ideological differences

between this philosopher and his contemporaries Neufeld makes a case for the coherence of Mansel's position and traces the vestiges of his thought through the generations that followed him. Mansel found himself at the centre of an explosive debate concerning the Christian scriptures and the moral character of the God they described. Though the rise of science is often credited with provoking a crisis of doubt, shifting ideas about humanity and God were just as central to the spiritual unrest of the nineteenth century. Mansel's central argument that the entire Bible must be read as a unified witness to the reality of God provoked disagreement among theologians, churchmen, and free thinkers alike who were uncomfortable with certain aspects of the scriptural portrayal of God's activity and character. Mansel's attempt to reconcile theological skepticism with scripturalism was misunderstood; he was branded a hopeless fideist by the free thinkers and a dangerous skeptic by high-broad and evangelical churchmen alike. Many of the controversies in contemporary Christianity concern the collision between modern morality and biblical renderings of God. Neufeld argues that Henry Mansel, while a deeply polarizing figure, brought clarity and precision to this debate by exposing what was at stake for Christian belief and biblical interpretation in the Victorian period.
