continuous narrative history of latin american art from the years of the independence movements in the 1820s up to the present day exploring both the indigenous roots and the colonial and post colonial experiences of the various countries the book investigates fascinating though little known aspects of nineteenth and twentieth century art and also provides a context for the contemporary art of the continent in collective situations scholars artists and art collectives present a range of socially engaged art practices that emerged in latin america during the pink tide period between 1995 and 2010 this volume s essays interviews and artist s statements many of which are appearing in english for the first time demonstrate the complex relationship between moments of political transformation and artistic production whether addressing human rights in colombia the politics of urban spaces in brazil the violent legacy of military dictatorships in the region or art s intersection with public policy health and the environment the contributors outline the region s long standing tradition of challenging ideas about art and the social sphere through experimentation introducing english language readers to some of the most dynamic and innovative contemporary art in latin america collective situations documents new possibilities for artistic practice collaboration and creativity in ways that have the capacity to foster vibrant forms of democratic citizenship contributors gavin adams mariola v alvarez gustavo buntinx maría fernanda cartagena david gutiérrez castañeda fabian cerejido paloma checa gismero kency cornejo raquel de anda bill kelley jr grant h kester suzanne lacy ana longoni rodrigo martí elize mazadiego annie mendoza alberto muenala prerana reddy maria reyes franco pilar riaño alcalá juan carlos rodríguez traces the development of latin american art from 20 000 bce to modern times from the southern tip of argentina to the rio grande sabotage is the deliberate disruption of a dominant system be it political military or economic yet in recent decades sabotage has also become an artistic strategy most notably in latin america in brazil colombia mexico chile and argentina artists are producing radical unruly or even iconoclastic work that resists state violence social conformity and the commodification of art sabotage art reveals how contemporary latin american artists have resorted to sabotage strategies as a means to bridge the gap between aesthetics and politics the global status of and market for latin american art is growing rapidly this book is essential reading for those who want to understand this new dissident work as well as its mystification co option and commercialisation within current academic historiographies and art world curatorial initiatives this illustrated publication accompanies the exhibition destination latin america modern and contemporary latin american art from the collection of the neuberger museum of art the collection is approached within the framework of certain criteria that reflect contemporary concerns in the study of latin american art as the works range in date from the early decades of the twentieth century to the present day the breadth of the collection offers an opportunity to address significant historical moments and several key topics relevant to latin american art however the idea of latin america as its own entity has been highly debated in recent years how can we speak of such a large geographical space one that covers twenty four countries from north central and south america and that includes approximately 618 million inhabitants speaking spanish portuguese quechua guarani aymara nahuatl maya and hundreds of other native languages it is also clear that latin america is not peripheral to the western world but an integral part of it nonetheless despite the challenges of thinking about such a complex ensemble as a whole there are indeed some overarching aspects of history and aesthetic concerns that can provide a framework for consideration of the art of latin america exemplified by the collection of the neuberger museum of art and discussed in the present catalogue the book offers in sum a multifaceted didactic journey through twentieth and twenty first century latin american art organized in five sections the first includes work by artists affiliated with the artistic revolution that emerged after the mexican revolution of 1910 20 the second features sculpture and painting by key latin american artists exploring color form space and motion the third section features work by caribbean and south american artists inspired by

african art surrealism and magical realism the fourth section addresses the challenges faced by artists living under the dictatorships of the 1960s 70s and 80s when most of south america was under military control and the final section concentrates on contemporary artists looking at themes of history globalization violence and social criticism an exploration of the areas occupied by latin american art and culture between the ongoing traditions of its indigenous inhabitants its colonial heritage and its contemporary relationship to the cultural politics of north america and europe it looks at the way cultural identity has been constructed by artists from the 1940s to the present day and challenges the way art criticism has hitherto dealt with latin american art

centres of lively experimentation in matters of form while countries with large indian populations were more subject to the movement s political influence she also examines the growing latin american avant garde of the 1950s and the subsequent reaction to it that led to a renewal of drawing and printmaking illustrated with more than 100 full colour reproductions of some of the finest works of 20th century latin american art this book should be of interest not only to art historians and students of latin america but to all with an interest in contemporary art
