Learning Mathematics Successfully 2019-09-01

the goal of this book is to bring together the concept of self efficacy theory with practical how to strategies for both teachers and parents to use in heightening their students levels of self efficacy the book examines how self efficacy theory relates to the acquisition of mathematical competence the text also provides specific and practical how to strategies for both teachers and parents in applying these principles to classroom mathematics instruction and activities the self efficacy practices and applications to mathematics are also suitable for families working with learners outside the school environment acquiring mathematical skills requires more than knowing arithmetic tables memorizing rules and knowing proofs it requires a basic belief that one is capable of obtaining this information making sense of it and applying and generalizing it in mathematical problems in addition a student must believe that obtaining these skills leads to a positive outcome whether it is perceived to be a good or passing grade comfort level in tackling mathematical problems being able to advance to the next mathematics course being able to score highly on the math section of the sat and or be competitive for a desired job the ability of students to achieve and exceed grade level competence in mathematics is addressed through the lens of albert bandura s self efficacy theory this theoretical position states that one will persist in mastering a behavior in this case mastering mathematical principles and skills in the face of obstacles or failures to the extent that one believes he or she has the ability to do so and that there is a desired outcome for doing so the research literature on the role of self efficacy in mathematic instruction is examined to demonstrate the validity of using this concept to increase student and parent teacher confidence in learning and applying grade appropriate math content specific teaching methodologies will be provided that infuse self efficacy strategies for students lastly teachers and parents are provided strategies to increase their own self efficacy when it comes to conveying mathematics principles to

their child or student as well as strategies to assess their students level of self efficacy over time teaching and learning mathematics so that students achieve success at their grade level or above can present a variety of challenges one barrier that affects learners is the belief that one is not capable of learning mathematics or not naturally talented in the field not a math person as a result learners may not believe they are capable of a positive outcome for achieving mathematics success this book is an important resource for pre service and in service teachers as well as families in applying the theory of self efficacy to support learners in becoming confident and assured in their ability to understand and apply mathematical principles and procedures coupled with classroom ready mathematics instructional strategies the book provides readers with the background tools and strategies needed to carry content success and confidence forward to remain persistent in solving all future mathematical problems

An Answer to Disenfranchised Students 2016-09-01

many school districts across this great nation are facing serious patterns of underachievement of students who do not fit well in a mainstream educational environment the purpose of this qualitative phenomenological research study was to explore the perceptions and experiences of graduates from a credit recovery nontraditional alternative high school that influenced his or her graduation nationally many high school students are not earning sufficient credits to remain on grade level with their freshman level cohort these at risk students need options with stronger incentives to obtain high school credits and meet graduation requirements credit recovery nontraditional alternative high schools involve an at risk student population who are at a greater risk of academic social and emotional struggles these students benefit from additional support that a nontraditional setting offers this study involved interviewing 12 high school graduates who attended and graduated from a credit recovery nontraditional alternative high school there was a diversified group by age and other demographics representing five graduating classes with this research study the investigator determined graduates perceptions of credit recovery in their nontraditional alternative high school were overwhelmingly positive the lived experiences explored in this study may help school leaders policy makers teachers staff parents and community partners understand the unique needs of this population

1994

describes how a strain of a lethal infectious previously unknown virus showed up in 1989 at a virginia laboratory and the efforts of a military biohazard swat team to identify and prevent the spread of the virus
