Management Accounting and Control 2017-10-30 management accounting has been the basic toolbox in business administration for decades today it is an integral part of all curricula in business education and no student can afford not to be familiar with its basic concepts and instruments at the same time business in general and management accounting in particular is becoming more and more international english clearly has evolved as the lingua franca of international business academics students as well as practitioners exchange their views and ideas discuss concepts and communicate with each other in english this is certainly also true for management accounting and control management accounting is becoming more and more international management accounting and control is a new textbook in english covering concepts and instruments of management accounting at an introductory level primarily at the bachelor level but also suited for general management and mba courses due to a strong focus on practical relevance this textbook covers all topics that are relevant in management accounting in business organizations that are typically covered in german and central european bachelor courses on management accounting and control after a general introduction to the field of management accounting and control the book discusses cost management as an extension of cost accounting typical cost management instruments such as target costing life cycle costing and process based costing approaches are explained in detail differences between anglo american activity based costing abc and german process based costing are highlighted the book then turns to an extensive discussion of planning and budgeting tasks in management accounting with a strong focus on the practical application of the topic such as developing a budget in practice another chapter is dedicated to a comparison of traditional budgeting with modern alternative budgeting approaches a major part of the book is dedicated to the broad area of performance management the relevance of financial statement information for performance management purposes is discussed in detail in addition the most widely spread financial performance indicators are illustrated using real world examples the book also includes detailed content on value based management control concepts in a consecutive chapter performance measurement is linked with strategy while extensively discussing the balanced scorecard as a key tool in strategic performance management the remaining parts of the book deal with management reporting as one of the main operative tasks in management accounting practice the book closes with insight into new fields and developments that currently influence management accounting practices and research and promise to play an increasingly important role in the future

Flood Risk Science and Management 2010-12-01 approaches to avoid loss of life and limit disruption and damage from flooding have changed significantly in recent years worldwide there has been a move from a strategy of flood defence to one of flood risk management flood risk management includes flood prevention using hard defences where appropriate but also requires that society learns to live with floods and that stakeholders living in flood prone areas develop coping strategies to increase their resilience to flood impacts when these occur this change in approach represents a paradigm shift which stems from the realisation that continuing to strengthen and extend conventional flood defences is unsustainable economically environmentally and in terms of social equity flood risk management recognises that a sustainable approach must rest on integrated measures that reduce not only the probability of flooding but also the consequences this is essential as increases in the probability of inundation are inevitable in many areas of the world due to climate change while socio economic development will lead to spiralling increases in the consequences of flooding unless land use in floodplains is carefully planned flood risk science and management provides an extensive and comprehensive synthesis of current research in flood management providing a multi disciplinary reference text covering a wide range of flood management topics its targeted readership is the international research community from research students through to senior staff and flood management professionals such as engineers planners government officials and those with flood management responsibility in the public sector by using the concept of case study chapters international coverage is given to the topic ensuring a world wide relevance

Diplomatic Security: State Should Enhance Its Management of Transportation-Related Risks to Overseas U.S. Personnel 2016-10-04 is the state department doing enough to keep u s personnel safe u s personnel overseas can be targets of terrorism violence and crime particularly while in transit from 1998 to 2015 state department personnel were attacked more than 100 times while traveling outside of embassy compounds with many of the worst attacks occurring while victims were in motorcades official vehicles or other forms of transportation the department of state has taken steps to protect personnel in transit but we found opportunities to enhance transportation policies training and communications and made multiple recommendations to that end what gao found the department of state state has established policies related to transportation security for overseas u s personnel but gaps exist in guidance and monitoring gao reviewed 26 posts and found that all 26 had issued transportation security and travel notification policies however policies at 22 of the 26 posts lacked elements required by state due in part to fragmented implementation guidance on what such policies should include state also lacks a clear armored vehicle policy for overseas posts and procedures for monitoring if posts are assessing their armored vehicle needs at least annually as required by state these gaps limit state s ability to ensure that posts develop clear policies that are consistent with state s requirements and that vehicle needs for secure transit are met while state provides several types of training related to overseas transportation security weaknesses exist in post specific refresher training regional security officers rso receive required training related to transportation security in special agent courses and nonsecurity staff reported receiving relevant training before departing for posts including on topics such as defensive driving and the importance of taking personal responsibility for one s security as well as new arrival briefings at posts at most of the 9 posts gao visited however staff had difficulty remembering key details covered in new arrival briefings or described the one time briefings as inadequate state s requirements for providing refresher briefings are unclear potentially putting staff at greater risk state uses various systems at overseas posts to communicate time sensitive information related to transportation security but several factors hinder its efforts rsos and other post officials are responsible for communicating threat information to post personnel however at 4 of the 9 posts it visited gao learned of instances in which staff did not receive important threat information in a timely manner for various reasons in one case this resulted in an embassy vehicle being attacked with rocks and seriously damaged while traveling through a prohibited area in addition while all 9 of the posts gao visited require that personnel notify the rso before traveling to certain locations personnel at more than half of the 9 posts said they were unaware of these requirements or had difficulty accessing required travel notification systems timely communication is critical for managing transportation security risks and failure to communicate important transportation related information and receive such information promptly could leave overseas personnel facing avoidable security risks why gao did this study u s diplomatic personnel posted overseas continue to face threats to their security according to state personnel and their families are particularly vulnerable when traveling outside the relative security of diplomatic work facilities or residences in many serious or fatal attacks on u s personnel over the last three decades victims were targeted while in motorcades official vehicles or otherwise in transit gao was asked to review how state manages transportation related security risks to u s diplomatic personnel overseas for this report gao evaluated the extent to which state with regard to transportation security at overseas posts has 1 established policies guidance and monitoring 2 provided personnel with training and 3 communicated time sensitive information gao reviewed agency documents and met with key officials in washington d c gao also reviewed policies from a judgmental sample of 26 posts primarily higher threat higher risk locations and conducted fieldwork and met with officials at 9 of these posts this is the public version of a sensitive but unclassified report issued in september 2016 what gao recommends gao is making eight recommendations in this report to help state improve its management of transportation related security risks by enhancing associated policies guidance and monitoring clarifying its requirements for refresher briefings and better communicating time sensitive information state agreed to take steps for all but one recommendation the need to clarify its requirements for refresher briefings gao continues to believe this is needed as discussed in the report
