sources used lubricating oil is a valuable resource this book examines recycling processes for a
range of products with different properties and different criteria it also compares the various
recycling methods and resulting products to conventional products obtained from original refining
processes the reviews data and comparisons provided by the authors allow readers to identify
which processes are likely to produce a product with specific properties and enable them to
combine this with an analysis of the economic data to identify attractive oil recycling propositions
the minerals yearbook is an annual publication that reviews the mineral and material industries of
the united states and foreign countries the yearbook contains statistical data on materials and
minerals and includes information on economic and technical trends and development the
minerals yearbook includes chapters on approximately 90 commodities and over 175 countries this
volume of the minerals yearbook provides an annual review of mineral production and trade and
of mineral related government and industry developments in more than 175 foreign countries
each report includes sections on government policies and programs environmental issues trade and
production data industry structure and ownership commodity sector developments infrastructure
and a summary outlook highly readable and up to date this casebook provides marketing students
with the opportunity to gain valuable experience in case analysis through active participation and
