poetry dedicated to every people living with the burning desire to touch the eternal blazing fire of love in its purest and most original apparition it soars like a cry of pain intense powerful rising from the depth of the abyss of the heart it crosses heaven and the timeless space to become a cry of hope a cry of life and a song of victory that brings us back to this original love which is the mother of harmony erudite and sensitive author michel robin has earned the wisdom that worldly experience of six decades confers on a reflective man but in sixty years young he goes back through time to confront the child that he was and to embrace the ways in which that boy is still who he is now in the tradition of philosophers and poets courageous childhood confessionals yet with an honesty and clarity all his own he gives us a real narrative of childhood seen through un tinted glasses revisiting his boyhood becomes a quest for truth the truth of the man he has become the wider truth of the world as the boy saw it the world that grew up around him the tales of his truths make for episodes at times delightful at times embarrassing and always incisive this is no safe stroll down memory lane the author relives the beauty and tyranny of being a child young michel commands fairness into his universe with toy soldiers shared with the neighbor boy across the fence of social divide he lights matches to the housecat s whiskers he pursues his first love with a barrage of letters and gets punished by the school priest he parries adult intervention with subterfuge or flashes of contrition older michel dissects his world our world with the keen intransigence of the boy it s a dialogue between two selves a protest against malice and hypocrisy a hand held out for love an ode to life it s also an evocation of belgium in the post war years there are tensions among family members around issues of class and religion puritanism contends with fascination for movies fast cars reach and what about a possible third synthesizing option robert w greene discovers that the two apparently divergent intentions in question metalinguistic vs moralistic often paradoxically coexist in french fiction also no doubt because it is more consistently self conscious than that of any previous era the fiction of twentieth century france seems to illustrate this convergence with special brilliance from *Immoralist* 1902 to *Usage de la parole* 1980 greene explores combinations and permutations of moralistic analysis and metalinguistic commentary in a particular sequence of prose narrative along the way he observes gide proust malraux camus duras and sarraute each in his or her own fashion moving ceaselessly back and forth between soundings of the heart and diagnoses of the arthur c clarke in one dazzling decade french novelist jules verne took readers places they d never gone before the age of dinosaurs the undersea realm of atlantis the craters and crevices of the moon and a whirlwind aerial tour of the planet earth though he penned his unforgettable yarns in french verne plunked big parts of them down in america and he himself possessed an american sassiness nerve and sense of humor so americans have returned the compliment we ve released dozens of hollywood films based on his astonishing tales and we ve created the u s s nautilus the nasa space missions and other technological triumphs that have turned verne s visions into practical reality here are jules verne s best loved novels in one convenient omnibus volume but with a huge difference this book science with unprecedented clarity and accuracy capture the wit prankishness and showbiz flamboyance of one of literature s leading humorists and satirists this is a verne almost completely unknown to americans yet a verne who has an uncannily american mindset so these heroes and happenings are part of our heritage phileas fogg chugging across the wild wild west the impossible underground journey of professor lidenbrock the deep sea exploits of secretive captain nemo and a moon shot so realistic it inspired u s astronaut frank borman a full century later jules verne was a science buff with a showbiz background and finally these classic stories have a translator with the same orientation frederick paul walter is one of america s foremost verne scholars but he s also a scriptwriter broadcaster and part time fossil hunter enriched with dozens of classic illustrations the amazing journeys of jules verne will be a family favorite in every home library jules verne was born in 1828 into a french lawyering family in the atlantic coastal city of

nantes though his father sent him off to a paris law school young jules had been writing on the side since his early teens and his pet topics were the theater travel and science predictably enough his legal studies led nowhere so verne took a day job with a stock brokerage in his off hours penning scripts for farces and musical comedies while also publishing short stories and novelettes of scientific exploration and adventure his big breakthrough came when he combined his theatrical knack with his scientific bent and in 1863 published an african adventure yarn five weeks in a balloon after that and till his death in 1905 jules verne was one of the planet s best loved and best selling novelists publishing over sixty books in addition to the five visionary classics in this volume other imaginative favorites by him include the mysterious island hector servadac the begum s millions master of the world and the meteor hunt verne ranks among the five most translated authors in gospel of luke it is also a state of mind he portrays the american emmaus as an ongoing conversion walk of twentieth century christians who attempt to recognize the crucified and risen christ within the complex and pluralistic cultures of the united states he focuses on the connections between being catholic and american at this point in history challenges the church to give witness to the gospel message and shows how it is through liturgy the gathered american community that the church once again takes the walk to emmaus here are insights not only for catholics but for christians of every denomination working from a cultural studies perspective author d k smith here examines a broad range of medieval and renaissance maps and literary texts to explore the effects of geography on tudor stuart cultural perceptions he argues that the literary representation of cartographically related material from the late fifteenth to the early seventeenth century demonstrates a new strain not just of geographical understanding but of cartographic manipulation which he terms the cartographic imagination rather than considering the effects of maps themselves on early modern epistemologies smith considers the effects of the activity of mapping the new techniques the new expectations of accuracy and precision which developed in the sixteenth century on the ways people thought and wrote looking at works by spenser marlowe raleigh and marvell among other authors he analyzes how the growing ability to represent physical space accurately brought with it not just a wealth of new maps but a new array of rhetorical techniques metaphors and associations which allowed the manipulation of texts and ideas in ways never before possible this volume investigates what role colonial communities and diaspora have had in shaping the portuguese empire and its heritage exploring topics such as portuguese migration to africa the ismaili and the swiss presence in mozambique the goanese in east africa
