A Life's Assize; a Novel

1871

Joseph Conrad and Ford Madox Ford's collaborative work *The Nature of a Crime* is a study of human psychology delving into the darkest recesses of human mind. They present idiosyncratic characters fighting with their own overwhelming desires and intuitions. The deep love of the protagonist gives way to even more profound desperation. The feelings of the protagonist as life crumbles around him are expressed profoundly by the two authors.

Emilia Wyndham

1846

The author is well known for her exploration of Melanie Klein's work. The author is very clear and her ideas are easy to follow.

arnold bennett was born in a street called hope street a street less hopeful it would be hard to imagine thus begins margaret drabble s biography of a man whose most famous achievement was to re create in such novels as the old wives tale and clayhanger the life atmosphere and character of the five towns region in which he was born and grew up arnold bennett is a very personal book what interests me writes the author is bennett s background his childhood and origins for they are very similar to my own my mother s family came from the potteries and the bennett novels seem to me to portray a way of life that still existed when i was a child and indeed persists in certain areas so like all books this has been partly an act of self exploration of bennett as a writer drabble says the best books i think are very fine indeed on the highest level deeply moving original and dealing with material that i had never before encountered in fiction but only in life i feel they have been underrated and my response to them is so constant even after years of work on them and constant re readings that i want to communicate enthusiasm of bennett as a man she paints an affectionate portrait not glossing over the irritability dyspepsia and rigidity which at times made him so difficult a companion but reminding us too of his honesty kindness and sensitivity many a time she writes at the end of the book re reading a novel reading a letter or a piece of his journal i have wanted to shake his hand or to thank him to say well done i have written this instead

Encounters with Melanie Klein

this book proposes a new two step approach to the evolution of language whereby syntax first evolved as an auto organizational process for the human conceptual apparatus as a language of thought and this language of thought was then externalized for communication due to social selection pressures anne reboul first argues that despite the routine use of language in communication current use is not a failsafe guide to adaptive history she points out that human cognition is as unique in nature as is language as a communication system suggesting deep links

between human thought and language if language is seen as a communication system then the specificities of language its hierarchical syntax its creativity and the ability to use it to talk about absent objects are a mystery this book shows that approaching language as a system for thought overcomes these problems and provides a detailed account of both steps in the evolution of language its evolution for thought and its externalization for communication
