the term scope 4 is used to describe avoided emissions as well as home working emissions in some situations we explore both concepts and the importance of their consideration in full scope carbon reporting

2024年3月29日 2021年3月25日 2023年11月30日

greenhouse gas emissions are divided into four categories for businesses and organizations scope 1 scope 2 scope 3 and the voluntary category of scope 4 companies will need to cut emissions across all scopes 1 3 to meet internationally agreed targets on global warming

avoided emissions also referred to as scope 4 emissions can be defined as reductions that occur outside of a product s life cycle or value chain but as a result of the use of that product the metric serves a number of purposes

scope 4 emissions allow businesses to share and shed light on how their product or service ceases to impact the environment in a new way that is not represented through the data of their emission reductions ultimately adhering to the reporting scope 4 emissions can help companies to meet both their environmental and sustainability goals

scope 4 emissions also known as avoided emissions represent a relatively new concept in environmental sustainability and carbon accounting this term was introduced by the world resources institute in 2013 and offers a novel perspective in measuring a company s impact on greenhouse gas ghg emissions

2023年11月30日 scope 4 emissions encompass a unique facet of carbon reporting delving into avoided emissions while traditional scopes 1 3 focus on direct and certain indirect emissions within organisational boundaries scope 4 broadens the
