the maveba workshop proceedings held on a biannual basis collect the scientific papers presented both as oral and poster contributions during the conference the main subjects are development of theoretical and mechanical models as an aid to the study of main phonatory dysfunctions as well as the biomedical engineering methods for the analysis of voice signals and images as a support to clinical diagnosis and classification of vocal pathologies

## **Models and analysis of vocal emissions for biomedical applications : 7th international workshop ; August 25 - 27, 2011 2011**

this book examines key issues concerning land acquisition and puts forward policy suggestions land acquisition is one of the most important

issues besetting india s political economy today there have been many conflicts surrounding acquisitions but there have been ample peaceful acquisitions too growth in any economy requires more land hence in india too in the future more and more land will be required for the purposes of infrastructure expansion industrialization urbanization etc the book also examines a number of broader policy issues in the context of land reforms and shows how a successful resolution of the land acquisition matter is vital to attaining a high rate of growth using a case study method the book examines the process of land acquisition in detail and its implications for farmers it finds that the development of acquired land leads to higher growth and higher employment and it also leads to improvements for the dalits the backward class p eople benefits in terms of higher revenues for the government are also observed it argues that if the acquisition process is properly executed those farmers who lose land will not oppose acquisition but will instead become partners in the process of growth
