when photographs documenting the torture and humiliation of prisoners at abu ghraib came to the attention of a horrified public national and international voices were raised in shock asking how this happened at war with metaphor offers an answer arguing that the abuses of abu ghraib were part of a systemic continuum of dehumanization this continuum has its roots in our public discussions of the war on terror and the metaphors through which they are repeatedly framed arguing earnestly and incisively that these metaphors if left unexamined bind us into a cycle of violence that will only be intensified by a responsive violence of metaphor steuter and wills examine compelling examples of the images of animal insect and disease that inform shape and limit our understanding of the war on terror tying these images to historical and contemporary uses of propaganda through a readable accessible analysis of media filters at war with metaphor vividly explores how news media including political cartoons and talk radio are enmeshed in these damaging dehumanizing

metaphors analyzing media through the lenses of race and orientalism it invites us to hold our media and ourselves accountable for the choices we make in talking war and making enemies

an in depth look at the weaponry tactics and combat pilots involved in neutralizing enemy air defenses from the vietnam war to today detecting and destroying enemy surface to air missiles sams and radar is arguably the most dangerous mission that any pilot can undertake tactics differ with air forces but the general principal is to fly a formation of aircraft into an area where the enemy s air defenses are strong wait for their radar to illuminate the aircraft and then launch a volley of anti radiation missiles to destroy the radar and thus blind the sams and air defenses put simply without the suppression of enemy air defenses sead mission the loss of other aircraft will be too high and the effectiveness of attack on the enemy too low despite the undeniable bravery of the aircrews who flew these missions for the united states air force in every conflict since the vietnam war and their colleagues in other air forces across the world who have risked their lives in similar missions the tactics history aircraft and weapons of the sead mission have seldom benefited from rigorous historical examination using interviews with sead pilots industrial experts and historical documents this book for the first time will give a detailed history of the sead mission from the vietnam war to the present day
