Muslims and Political Participation in Britain 2015-05-01

this new volume showcases the latest research into muslim political participation

both in terms of electoral politics and civil society initiatives muslims play a prominent role in british political life yet what do we actually know about the involvement of british muslims beyond the existence of a handful of muslim mps what is unique about political participation in muslim communities all the major parties actively seek to court a muslim electorate but does such a phenomenon exist despite the impact that muslims have had on election campaigns and their roles in various political institutions research on this topic remains scant indeed much of the existing work was couched within the broader areas of the participation of ethnic minorities or the impact of race on electoral politics the chapters in this volume address this lacuna by highlighting different aspects of muslim participation in british politics they investigate voting patterns and election campaigns civil society and grassroots political movements the engagement of young people and the participation of muslims in formal political institutions written in an accessible style this book will be of interest to students and scholars of political participation and religious studies

thousands of people in dozens of countries took to the streets when world food prices spiked in 2008 and 2011 what does the persistence of popular mobilization around food tell us about the politics of subsistence in an era of integrated food markets and universal human rights this book interrogates this period of historical rupture in the global system of subsistence getting behind the headlines and inside the politics of food for people on low incomes the half decade of 2007 2012 was a period of intensely volatile food prices as well as unusual levels of popular mobilization including protests and riots detailed case studies are included here from bangladesh cameroon india kenya and mozambigue the case studies illustrate that political cultures and ways of organizing around food share much across geography and history indicating common characteristics of the popular politics of provisions under capitalism however all politics are ultimately local and it is demonstrated how the historic fallout of a subsistence crisis depends ultimately on how the actors and institutions articulate negotiate and reassert their specific claims within the peculiarities of each policy a key conclusion of the book is that the politics of provisions remain essential to the right to food and that they involve unruliness in other words food riots work the book explains how and why they continue to do so even in the globalized food system of the 21st century food riots signal a state unable to meet a principal condition of its social contract and create powerful pressure to address that most fundamental of failings
