*A Primer on Animal Rights* 2002 philosophy reads humanity against animality arguing that man is man because he is separate from beast deftly challenging this position kelly oliver proves that in fact it is the animal that teaches us to be human through their sex their habits and our perception of their purpose animals show us how not to be them this kinship plays out in a number of ways we sacrifice animals to establish human kinship but without the animal the bonds of brotherhood fall apart either kinship with animals is possible or kinship with humans is impossible philosophy holds that humans and animals are distinct but in defending this position the discipline depends on a discourse that relies on the animal for its very definition of the human through these and other examples oliver does more than just establish an animal ethics she transforms ethics by showing how its very origin is dependent upon the animal examining for the first time the treatment of the animal in the work of heidegger merleau ponty derrida agamben freud lacan and kristeva among others animal lessons argues that the animal bites back thereby reopening the question of the animal for philosophy

**Animal Lessons** 2009 four years ago we began soliciting articles for this volume from authors who were engaged in comprehensive research on whales from the outset we decided not to limit the subject matter to behavior but to also include natural history much of what is known about the behavior of whales arose from studies whose principal aim was not behavior much as it did for other animal groups before behavior was considered a distinct discipline thus in many of the articles behavior is closely intertwined

with natural history and in others is completely overshadowed by a basic natural history approach our aim was to have the articles contain a review of the literature and include research findings not previously published for all intents and purposes this aim has been realized albeit perhaps not in as balanced a fashion in terms of species or subject matter as was originally planned nevertheless we believe the articles present a wide range of informative works with a myriad of approaches and techniques represented we are grateful to the contributors for their patience and understanding in awaiting publication which has taken much longer than we originally expected we are also grateful for the assistance of a number of people especially julie fischer and lois winn for their editorial efforts and jill grover carol samet and lois winn for their help in indexing
