about the book the first edition of nassim nicholas taleb s second mainstream work the black swan the impact of the highly improbable was published by random house in april of 2007 in this book taleb says many many things he warns against the dangers of ignoring outliers and trusting experts he gives advice on how to position oneself to take advantage of the unexpected he creates a fictional narrative about an author s rise to literary stardom and he draws upon the work of some of his favorite as well as his most despised thinkers in the fields of philosophy mathematics and psychology but the thing about the black swan that is most likely to grab the contemporary reader s attention is its apparent prediction of the financial collapse that occurred only a few months after its publication though taleb argues against the validity of economic forecasts he makes some eerily specific critiques of the banking industry just months before the subprime fiasco rocked global markets and led banks to announce at least 208 billion worth of writedowns according to bloomberg news any criticisms of the black swan seem to fade given the uncanny timing of its release in the wake of the financial crisis while other economists cringed at their lack of foresight taleb was hailed as a prophet excerpt from the book while we might prefer to believe that the world operates in a linear fashion taleb assures us this is not so says taleb n onlinear relationships are ubiquitous in life linear relationships are truly the exception we focus on them in classrooms and textbooks because they are easier to understand 89 chapter eight giacomo casanova s unfailling luck in chapter eight taleb introduces the concept of silent evidence like the antilibrary silent evidence emphasizes what is not known over what is essentially silent evidence are those instances which do not produce a black swan and thus do not receive acknowledgement as an example taleb points to the many many talented writers who never get their big break and whose work therefore is never inducted into the literary canon since such works are generally inaccessible we tend to discount their relevance and focus solely on the black swan works that did through some combination of talent and good fortune secure their place in literature in essence we tend to give disproportionate weight to the stories of those who succeed in some manner or another by making a medical breakthrough by becoming a millionaire or in some cases by simply surviving the tendency to ignore silent evidence the failures taleb says results in a distortion bias the difference between what you see and what is there buy the book to continue reading follow hyperink on twitter visit us at facebook com hyperink go to hyperink com to join our newsletter and get awesome freebies chapter outline nassim taleb s the black swan introduction to the black swan introducing nassim nicholas taleb the black swan an introductory overview chapter summaries and much more

birds have always been a popular and accessible subject but most books about medieval birds are an overview of their symbolism generally owl for ill omen the pelican as a eucharistic image and the like the unique selling point of this book is to focus on one bird and explore it in detail from medieval reality to artistic concept this book also traces how and why the medieval perception of the swan shifted from hypocritical to courtly within the medieval period with special attention to the knight of the swan the book traces the rise and popularity of the medieval swan through literature history courtly practices and

art the book uses thoroughly readable language to appeal to a wide audience and explains some of the reasons why the swan holds such resonance today by covering views of the swan from classic to early modern times

the most influential book of the past seventy five years a groundbreaking exploration of everything we know about what we don't know now with a new section called on robustness and fragility a black swan is a highly improbable event with three principal characteristics it is unpredictable it carries a massive impact and after the fact we concoct an explanation that makes it appear less random and more predictable than it was the astonishing success of google was a black swan so was 9 11 for Nassim Nicholas Taleb black swans underlie almost everything about our world from the rise of religions to events in our own personal lives why do we not acknowledge the phenomenon of black swans until after they occur part of the answer according to Taleb is that humans are hardwired to learn specifics when they should be focused on generalities we concentrate on things we already know and time and time again fail to take into consideration what we don't know we are therefore unable to truly estimate opportunities too vulnerable to the impulse to simplify narrate and categorize and not open enough to rewarding those who can imagine the impossible for years Taleb has studied how we fool ourselves into thinking we know more than we actually do we restrict our thinking to the irrelevant and inconsequential while large events continue to surprise us and shape our world in this revelatory book Taleb will change the way you look at the world and this second edition features a new philosophical and empirical essay on robustness and fragility which offers tools to navigate and exploit a black swan world Taleb is a vastly entertaining writer with wit irreverence and unusual stories to tell he has a polymathic command of subjects ranging from cognitive science to business to probability theory elegant startling and universal in its applications the black swan is a landmark book itself a black swan

national bestseller and a globe and mail best book a fascinating larger than life character davies left a treasure trove of stories about him when he died in 1995 expertly arranged here into a revealing portrait from his student days onward robertson davies made a huge impression on those around him he was so clearly bound for a glorious future that some young friends even carefully preserved his letters and everyone remembered their encounters with him later in life as a world famous writer perhaps canada's pre eminent man of letters who looked like jehovah he attracted people eager to meet him who also vividly remembered their meetings so when val ross set out in search of people's memories she was faced with a wonderful embarrassment of riches the one hundred or so contributors here range very widely there are family memories of course and

memories from colleagues in the academic world who knew him as a professor and the founding master of Massey College at the University of Toronto. Predictably, there are other major writers like Margaret Atwood and John Irving. Less predictably, there are people from the world of Hollywood such as Norman Jewison and David Cronenberg who remember Davies on set peering through a camera lens as he researched his newest novel, and we even hear from his barber and from his gardener, Theodor Henkenhaf. Some speakers contribute just a lively paragraph; others, several pages. Yet all of them, through the magic of Val Ross's art, help to create an intriguing, full-colour portrait of a complex man beloved by millions of readers around the world.

Challenging and unsettling their predecessors, modern choreographers such as Matthew Bourne, Mark Morris, and Masaki Wana have courted controversy and notoriety by reimagining the most canonical of classical and romantic ballets. In this book, Vida L. Midgell illustrates the ways in which these contemporary reworkings destroy and recreate their source material, turning ballet from a classical performance to a vital exploration of gender, sexuality, and cultural difference. Reworking the ballet counter-narratives and alternative bodies articulates the ways that audiences and critics can experience these new versions, viewing them from both practical and theoretical perspectives, including eroticism and the politics of touch, performing gender, cross-casting, and cross-dressing, reworkings, and intertextuality, cultural exchange, and hybridity.

The Turkish economy is very dynamic and growing at phenomenal speeds. For instance, Turkey's first quarter GDP growth rate was 11 percent in 2011. This growth brings its own risks and benefits. The lessons learned from surviving and thriving in such an environment can be applied to supply chains in any country. Packed with interesting and timely examples from industries such as automotive, airline, and manufacturing, *Risk-Intelligent Supply Chains* shows how leading Turkish companies thrive in the age of fragility. Presents strategic insights from various leading Turkish companies regarding their management of supply chain risks. Çağrı Haksöz brings the risk-intelligent supply chain concept to life for the first time. It answers the question of how to become a risk-intelligent supply chain. He proposes the iQuartet model with four essential roles: integrator, inquirer, improviser, and ingenious. That any supply chain network must play to become risk-intelligent. The book also presents never-before-published cases and practices of leading Turkish companies that thrive globally in the age of fragility with their supply chain risk intelligence. While providing real-life examples, the book also shares insights obtained in various scientific disciplines. It provides not only an industry focus but also details numerous industry approaches, analyzing their similarities and differences in a manner that allows each industry to learn from the other.

cinema suffering and psychoanalysis explores psychological disorder as common to the human condition using a unique three angled approach psychoanalysis recognises the inherent suffering encountered by each subject due to developmental phases psychology applies specific categorisation to how this suffering manifests cinema depicts suffering through a combination of video and aural elements functioning as a culturally reflexive medium the six feature films analysed including black swan 2010 and the machinist 2004 represent some of the most common psychological disorders and lived experiences of the contemporary era this book enters uncharted terrain in cinema scholarship by combining clinical psychology s diagnostic and statistical manual five dsm v to organise and diagnose each character and psychoanalysis to track the origin mechanism and affect of the psychological disorder within the narrative trajectory of each film lacan s theories on the infantile mirror phase the imaginary and the symbolic Žižek s theories on the real the big other and the event and kristeva s theories on abjection and melancholia work in combination with the dsm s classification of symptoms to interpret six contemporary pieces of cinema by taking into consideration that origin mechanism affect and symptomatology are part of an interconnected group this book explores psychological disorder as part of the human condition something which contributes to and informs personal identity more specifically this research refutes the notion that psychological disorder and psychological health exist as a binary instead recognising that what has traditionally been pathologised may instead be viewed as variations on human identity
