at a time when theories of evolution are undergoing renewed controversy the study of the eonic effect can break the deadlock by looking at world history in the light of evolution the assumption that evolution occurs at random is the crux of the dispute and one confused with issues of religion and secularism we can detect a non random pattern in the record of civilization itself to see evolution in action on a stupendous scale we live in the first generations with enough data to detect this phenomenon in the confusion of evolutionary theories the unexpected discovery of deep level structure can allow us to deconstruct fl at history and assess claims of directionality in evolution in the process the theory of natural selection applied to human evolution is seen to fail a photo finish test the book provides a new model for the study of the overlap of history and evolution and a critique of current views of the descent of man

this book provides an important study of the theology of thomas f torrance who is generally considered to have been one of the most significant theologians writing in english during the twentieth century with a view toward showing how his theological method and all his major doctrinal views were shaped by his understanding of the doctrine of the trinity torrance pursued a theology that was realist because he attempted to think in accordance with the unique nature of the object that is known in holding to such a methodology he drew an analogy between theology and natural science this book demonstrates how for torrance god relates with humanity within time and space so that creation finds its meaning in relation to god and not in itself this enabled him to avoid many theological pitfalls such as agnosticism subjectivism and dualism while explaining the positive implications of various christian doctrines in a penetrating and compelling manner this book offers an important resource for students of theology and for scholars who are interested in seeing how serious dogmatic theology shapes and should shape our understanding of the christian life

winner of grawemeyer award in this remarkable and timely work in many ways the culmination of his systematic theology world renowned theologian jurgen moltmann stands christian eschatology on its head moltmann rejects the traditional approach which focuses on the end an apocalyptic finale as a kind of christian search for the final solution

he centers instead on hope and god's promise of new creation for all things christian eschatology he says is the remembered hope of the raising of the crucified christ so it talks about beginning afresh in the deadly end yet moltmann's novel framework deeply informed by jewish and messianic thought also fosters rich and creative insights into the perennially nettling questions of eschatology are there eternal life and personal identity after death how is one to think of heaven hell and purgatory what are the historical and cosmological dimensions of christian hope what are its social and political implications in a heartbreakingly fragile and fragment world moltmann's comprehensive eschatology surveys the christian vista bravely envisioning our horizons of expectation for personal social even cosmic transformation in god

this book discusses some of the most urgent current debates over the study commemoration and politicization of the holocaust through key critical perspectives omer bartov adeptly assesses the tensions between holocaust and genocide studies which have repeatedly both enriched and clashed with each other whilst convincingly arguing for the importance of local history and individual testimony in grasping the nature of mass murder he goes on to critically examine how legal discourse has served to both uncover and deny individual and national complicity genocide the holocaust and israel palestine outlines how first person histories provide a better understanding of events otherwise perceived as inexplicable and lastly draws on the author s own personal trajectory to consider links between the fate of jews in world war ii and the plight of palestinians during and in the aftermath of the establishment of the state of israel bartov demonstrates that these five perspectives rarely if ever previously discussed in a single book are inextricably linked and shed much light on each other thus the holocaust and other genocides must be seen as related catastrophes in the modern era understanding such vast human tragedies necessitates scrutinizing them on the local and personal scale this in turn calls for historical empathy accomplished via personal biographical introspection and true open minded and rigorous introspection without which historical understanding tends toward obfuscation brings to light uncomfortable yet clarifying connections such as that between the holocaust and the nakba the mass flight and expulsion of the palestinians in 1948

History and System represents the first contemporary volume on Hegel's philosophy of history to be published in English. The editor notes that with the possible exceptions of Augustine and Vico, no philosopher before Hegel had such a deep sense of the mutual penetration of history and philosophy as did Hegel. Historical reflection influenced his reading of other philosophers and philosophical reason penetrated his views of past events and eras. Reflecting the best of Hegelian scholarship, the papers here focus on the sources of Hegel's philosophy of history, its internal structure and relation to other parts of his system, analyses of specific aspects of his philosophy of history and its influence on subsequent thinkers. In its breadth and depth, the volume attests to the continued and growing importance of Hegel's thought for contemporary philosophy.

revolutionaries counter revolutionaries and reformers the world over appeal to democracy to justify their actions but when political factions compete over the right to act in the people s name who is to decide although the problem is as old as the great revolutions of the seventeenth and eighteenth centuries events from the arab spring to secession referendums suggest that today it is hardly any closer to being solved this book defends a new theory of democratic legitimacy and change that provides an answer christopher meckstroth shows why familiar views that identify democracy with timeless principles or institutions fall into paradox when asked to make sense of democratic founding and change solving the problem he argues requires shifting focus to the historical conditions under which citizens work out what it will mean to govern themselves in a democratic way the only way of sorting out disputes without faith in progress is to show in socratic fashion that some parties claims to speak for the people cannot hold up even on their own terms meckstroth builds his argument on provocative and closely argued interpretations of plato kant and hegel suggesting that familiar views of them as foundationalist metaphysicians misunderstand their debt to a method of radical doubt pioneered by socrates recovering this tradition of antifoundational argument requires rethinking the place of german idealism in the history of political thought and opens new directions for contemporary democratic theory the historical and socratic theory of democracy the book defends makes possible an entirely new way of approaching struggles over contested notions of progress popular sovereignty political judgment and democratic change
