for many years intensive care has focused on avoiding immediate death from acute life threatening conditions however there are increasing reports of a number of lingering consequences for those who do indeed survive intensive care examples include on going high

risk of death neurocognitive defects significant caregiver burden and continued high healthcare costs surviving intensive care written by the world's experts in this area is dedicated to better understanding the consequences of surviving intensive care and is intended to provide a synopsis of the current knowledge and a stimulus for future research and improved care of the critically ill seven in ten americans over the age of age of sixty who require medical decisions in the final days of their life lack the capacity to make them for many of us our biggest life and death decisions literally will therefore be made by someone else they will decide whether we live or die between long life and quality of life whether we receive heroic interventions in our final hours and whether we die in a hospital or at home they will determine whether our wishes are honored and choose between fidelity to our interests and what is best for themselves or others yet despite their critical role we know remarkably little about how our loved ones decide for us speaking for the dying tells their story drawing on daily observations over more than two years in two intensive care units in a diverse urban hospital from bedsides hallways and conference rooms you will hear in their own words how physicians really talk to families and how they respond you will see how decision makers are selected the interventions they weigh in on the information they seek and evaluate the values and memories they draw on the criteria they weigh the outcomes they choose the conflicts they become embroiled in and the challenges they face observations also provide insight into why some decision makers authorize one aggressive intervention after the next while others do not even on behalf of patients with similar problems and prospects and they expose the limited role of advance directives in structuring the process decision makers follow or the outcomes that result research has consistently found that choosing life or death for another is one of the most difficult decisions anyone can face sometimes haunting families for decades this book shines a bright light on a role few of us will escape and offers steps that patients and loved ones health care providers lawyers and policymakers could undertake before it is too late the final frca structured oral examination is the last step before earning the initials frca and becoming a fellow of the royal college of anaesthetists this comprehensive revision aid has been compiled by two talented authors who have been running a course on this subject for three years motivated to make the cases as close as possible to the exam they have collected a vast database of questions from their trainees and the book reflects a variety of commonly asked themes in addition there are contributions from 11 consultants and registrars who are all experts in their fields the clear layout and easy to read style prepares students for the examination environment and focuses on the specific areas and responses examiners look for the style of questions mimics the exam and there are added tutorials for ecg interpretation and radiology which will benefit trainees immensely in their preparation with concise full color coverage of this rapidly enlarging field critical care handbook of the massachusetts general hospital seventh edition
