The Private Self

1993

the concept of the self is the subject of intense debate in psychoanalysis as it is in neuro science cognitive science and philosophy in the private self arnold modell a leading thinker in american psychoanalysis studies selfhood from the inside by examining variations on the theme of the self in freud and in the work of object relations theorists self psychologists and neuro scientists his significant contribution is an interdisciplinary perspective in formulating a theory of the private self modell contends that the self is fundamentally paradoxical in that it is both dependent and autonomous dependent upon social affirmation but autonomous in generating itself from within we create ourselves by selecting values that are endowed with private meanings modell presents an extensive view of these self generative and self creative aspects the private self is an embodied self the psychology of the self is rooted in biology by thinking of the unconscious as a neurophysiological process and the self as the subject and object of its own experience modell is able to explain how identity can persist in the flux of consciousness in arriving at his unique synthesis of psychoanalytic observations and neurobiological theory modell draws on the contributions of donald winnicott in psychoanalysis william james in philosophy and gerald edelman in neurobiology the private self boldly explores the frontier between psychoanalysis and biology in replacing the instinct driven self and the attachment oriented self with the self generating self the author offers an exciting and original perspective for our understanding of the mind and the brain

Public Self and Private Self

2012-12-06

psychology has worked hard to explore the inner self modern psychology was born in wundt s laboratory and freud s consulting room where the inner self was pressed to reveal some of its secrets freud in particular devoted most of his life to exploring the hidden recesses inside the self hidden even from the conscious mind he said from freud s work right down to the latest journal article on self schemata or self esteem psychologists have continued to tell us about the inner self more recently psychology has turned some of its attention to the outer self that is the self that is seen and known by other people various psychologists have studied how the outer self is formed impression formation how people control their outer selves impression management and so forth but how is the outer self related to the inner self there is an easy answer but it is wrong the easy answer is that the outer self is mostly the same as the inner self put another way it is that people reveal their true selves to others in a honest and straightforward fashion and that others accurately perceive the individual as he or she really is sometimes it works out that way but often it does not the issue is far too complex for the easy answer

Governing the Soul

1999

governing the soul is now widely recognized as one of the founding texts in a new approach to analyzing the links between political power expertise and the self this governmentality perspective has had important implications for a range of academic disciplines including criminology political theory sociology and psychology and has generated much theoretical innovation and empirical investigation the second edition contains a new introduction which sets out the methodological and conceptual bases of this approach also a new final chapter has been added that considers some of the implications of recent developments in the government of subjectivity

Self-Handicapping

2013-11-11

the concept of self handicapping can be legitimately anchored in a variety of intellectual contexts some old and some newer as this volume reminds us alfred adler was perhaps the first to articulate the significance of

various self defeating claims and gestures for protecting the self concept thus the apparent paradox of defeat in the interests of protection more recently but still more than 30 years ago heider's naive psychology added attributional rhetoric to the description of self defeating strategies while predominantly cognitive in its thrust the attributional approach incorporated several motivational influences especially those involving egocentric concerns heider hardly violated our common sense when he suggested that people are inclined to attribute their performances in a self serving manner the good things i caused the bad things were forced upon me the notion of self handicapping strategies proposed by berglas and myself a little more than a decade ago capitalized on these homely truths while adding a particular proactive twist we not only make excuses for our blunders we plan our engagements and our situational choices so that self protective excuses are unnecessary in doing so we use our attributional understanding to arrange things so that flawed and failing performances will not be interpreted in ways that threaten our self esteem

Anxiety and Self-Focused Attention

2015-09-25

first published in 1991 this book consists of 13 articles that were originally published in the journal anxiety research they address the topic of anxiety and self focused attention from a variety of perspectives representing recent advances in social clinical and personality psychology at the time as a whole the book poses a stimulating theoretical challenge to traditional anxiety research which had been dominated by psychometric issues clinical case studies and stable personality constructs the contributors share the view that anxiety is an emotional state of distress dependent upon specific antecedent cognitive processes such as self awareness perceived role discrepancy or unfavourable expectancies

Expressing the Self

2018

the book addresses different linguistic and philosophical aspects of referring to the self in a wide range of languages from different language families it offers an interdisciplinary understanding of expressing the self that comprises philosophy of mind at one end of the spectrum and cross cultural pragmatics of self expression at the other

Routledge International Handbook of Consumer Psychology

2016-11-18

this unique handbook maps the growing field of consumer psychology in its increasingly global context with contributions from over 70 scholars across four continents the book reflects the cross cultural and multidisciplinary character of the field chapters relate the key consumer concepts to the progressive globalization of markets in which consumers act and consumption takes place the book is divided into seven sections offering a truly comprehensive reference work that covers the historical foundations of the discipline and the rise of globalization the role of cognition and multisensory perception in consumers judgements the social self identity and well being including their relation to advertising social and cultural influences on consumption including politics and religion decision making attitudes and behaviorally based research sustainable consumption and the role of branding the particularities of online settings in framing and affecting behavior the routledge international handbook of consumer psychology will be essential reading for anyone interested in how the perceptions feelings and values of consumers interact with the decisions they make in relation to products and services in a global context it will also be key reading for students and researchers across psychology and marketing as well as professionals interested in a deeper understanding of the field

The Self Explained

2021-12-13

the idea of the self is immediately familiar to everyone yet elusive to define and understand from pioneering

researcher roy f baumeister this volume synthesizes a vast body of knowledge to provide a panoramic view of the human self how it develops and functions why it exists and what problems it encounters on the journey through life what are the benefits of self knowledge and how attainable is it do we have one self or many what is the relationship of self and society in 28 concise chapters baumeister explains complex concepts with clarity and insight he reveals the central role played by the self in enabling both individuals and cultures to thrive

Self-care

2004-06-02

this book examines the widespread cultural and political consequences of the proliferation of popular health advice it provides a key theoretical contribution to the sociological study of health and embodiment by illuminating the processes of social change that have transformed how individuals care for themselves and the ways in which power and desire now shape health behaviour self care will be of essential interest to students and academics working within the fields of sociology health and social welfare

The Origins of Self

2019-07-22

the origins of self explores the role that selfhood plays in defining human society and each human individual in that society it considers the genetic and cultural origins of self the role that self plays in socialisation and language and the types of self we generate in our individual journeys to and through adulthood edwardes argues that other awareness is a relatively early evolutionary development present throughout the primate clade and perhaps beyond but self awareness is a product of the sharing of social models something only humans appear to do the self of which we are aware is not something innate within us it is a model of our self produced as a response to the models of us offered to us by other people edwardes proposes that human construction of selfhood involves seven different types of self all but one of them are internally generated models and the only non model the actual self is completely hidden from conscious awareness we rely on others to tell us about our self and even to let us know we are a self

Exploring the Self, Subjectivity, and Character across Japanese and Translation Texts

2022-01-17

this study investigates our multiple selves as manifested in how we use language applying philosophical contrastive pragmatics to original and translation of japanese and english works the concept of empty yet populated self in japanese is explored

Changing the Self

1994-10-11

this book examines the varieties of self exchange and factors that can influence it it takes a much needed step toward linking the concerns of the academic self researcher and the consumer of research pertaining to changing the self throughout the book understanding and accounting for change in the self emerges as a vitally important concern across a wide range of human experience

Public and private self in Japan and the United States

1973

widely regarded as the authoritative reference in the field this volume comprehensively reviews theory and research on the self leading investigators address this essential construct at multiple levels of analysis from

neural pathways to complex social and cultural dynamics coverage includes how individuals gain self awareness agency and a sense of identity self related motivation and emotion the role of the self in interpersonal behavior and self development across evolutionary time and the lifespan connections between self processes and psychological problems are also addressed new to this edition incorporates significant theoretical and empirical advances nine entirely new chapters coverage of the social and cognitive neuroscience of self processes self regulation and health self and emotion and hypoegeic states such as mindfulness

Handbook of Self and Identity

2012-01-01

distinguished scholars discuss the problem of self deception or rather self and deception

Self and Deception

1996-01-01

leading theoreticians and researchers present current thinking about the role played by group memberships in people s sense of who they are and what they are worth the chapters build on the assumption developed out of social identity theory that people create a social self that both defines them and shapes their attitudes and behaviors the authors address new developments in the theoretical frameworks through which we understand the social self recent research on the nature of the social self and recent findings about the influence of social context upon the development and maintenance of the social self

The Psychology of the Social Self

2014-04-04

this volume is currently the only textbook devoted to the study of the self republished in its original form by psychology press in 2007 it carefully documents the changing conceptions and the value accorded the self in psychology over time

The Self

2014-06-03

michel foucault s writing about the panopticon in discipline and punish has dominated discussions of the prison and the novel and recent literary criticism draws heavily from foucauldian ideas about surveillance to analyze metaphorical forms of confinement policing detection and public scrutiny and censure but real victorian prisons and the novels that portray them have few similarities to the panopticon sean grass provides a necessary alternative to foucault by tracing the cultural history of the victorian prison and pointing to the tangible relations between victorian confinement and the narrative production of the self the cell examines the ways in which separate confinement prisons with their demand for autobiographical production helped to provide an impetus and a model that guided novelists explorations of the private self in victorian fiction

Between Public and Private

1979

rewriting the self is an exploration of ideas of the self in the western cultural tradition from the renaissance to the present the contributors analyse differing religious philosophical psychological political psychoanalytical and literary models of personal identity they examine these models from a number of viewpoints including the history of ideas contemporary gender politics and post modernist literary theory rewriting the self offers a challenge to the received version of the ascent of western man lively and controversial the book broaches big

questions in an accessible way rewriting the self arises from a seminar series held at the institute of contemporary arts in london the contributors include prominent academics from a range of disciplines

The Self in the Cell

2014-01-27

in this book a study is presented on the attitudes of 12 to 20 year old youngsters towards social limits imposed by their social and educational environment by means of laws rules values norms or expectations the study is part of a research programme on the course and treatment of juvenile delinquency which started at the rijksuniversiteit groningen during the eighties young people s attitudes towards social limits are assessed by the standard reaction instrument a critical incident technique is used to elicit young people s knowledge behavioral intentions and motivations in ten hypothetical situations including social limits the instrument was administered from youngsters in secondary schools and from same aged detained youngsters who have committed at least one criminal offence which has been recorded by police or judicial authorities the responses of both groups are compared in order to test the validity of the instrument further the relationship is tested between the youngsters attitudes towards social limits and self reported delinquent and aggressive behavior finally a comparison is made between the responses of flemish and dutch youngsters starting point of the empirical study is a social psychological view on juvenile delinquency in this view which is based on the self presentation paradigm developed by the sociologist ervin goffman and the early symbolic interactionists juvenile delinquency is considered as a means of social communication towards significant others parents teachers peers society special attention is paid to the development maintenance and management of social reputation by the juvenile delinquent

Rewriting the Self

2002-09-09

the purloined self interpersonal perspectives in psychoanalysis brings together nineteen essays in updated form still as relevant witty and informative today as when the book originally published edgar levenson is a key figure in the development of interpersonal psychoanalysis and his ideas remain influential this book covers his seminal writing on theoretical topics such as models of psychoanalysis harry stack sullivan s theories and the nature of change as well as his more familiar focus on practical analytic topics such as transference supervision and the use of the self in psychoanalytic clinical work the content ranges from more technical articles on psychoanalysis and general systems theory the holographic dimensions of psychoanalytic change on to issues of metapsychology and then to articles devoted to examining the nuances of the therapeutic praxis the general thrust of the book is in the interpersonal tradition and is a major contribution to a contemporary elaboration of post sullivanian interpersonalism and of the two person model of psychoanalysis that has come to permeate the entire field with a new foreword by donnel stern himself a major name in current interpersonal analysis this book gives a comprehensive overview of levenson s work and its continued relevance in contemporary psychoanalytic thought the purloined self is highly readable the author s witty essayist style and original perspective on its material has made it appealing across a wide range of readerships it will appeal to psychoanalysts and psychoanalytic psychotherapists as well as undergraduate and advanced postgraduate students in these fields

Attitudes Towards Social Limits, Undersocialized Behavior, and Self-presentation in Young People

1999

in communicative exchange psychotherapy and the resonant self anthony korner demonstrates how important communication and resonance are to the development of a sense of self this process of realization is embedded in social relatedness and is intrinsically tied to language uniquely presenting a collaborative approach to research this book illuminates the potential for change that lies in therapy that engages both heart and mind between patient and therapist as well as demonstrating how language and relating are fundamental to

psychotherapy korner explains how language engenders growth through communicative processes that shape lives and personality korner helps the reader see how communicative exchanges can be transformative brimmed with emotive clinical material literary illustrations and reports of first hand life experience korner demonstrates how the combination of knowledge and evocation of feeling in human connection is central to psychotherapeutic process an intersubjective approach to research is put forward as exemplar of how the minds of both patient and therapist might be employed in furthering understanding of psychotherapeutic process this book will be an essential resource for mental health clinicians involved in psychodynamic psychotherapy as well as more generally to people interested in understanding human connections

The Purloined Self

2016-10-04

the self which is not one women s life writing in french assembles articles on women s life writing from diverse areas of the francophone world it is comprised of nine chapters that discuss female writers from north africa sub saharan africa the caribbean and europe in addition to french writers the idea of the self is currently attracting widespread interest in academia most notably in the arts and humanities the development of postmodernism supposes a fragmented subject formed from the network of available discourses rather than a stable and coherent self jacques derrida for example wrote that there is no longer any such things as a full subject and julia kristeva now insists that the individual is a subject in process the growing importance of psychoanalytic theory particular in french studies has also impacted upon this development the basic tenet of psychoanalytic theory is that the individual is formed of a duality the conscious and unconscious parts of the self which prevent the individual from ever fully knowing her himself and which thus insists upon a plural incomplete self developments in the field of postcolonial studies have also made us aware of different ways of approaching the self in different parts of the world and eroded the idea of a stable conscious and complete self as scholars examine these new ways of approaching the self autobiography has been the subject of renewed interest several academic books have appeared in recent years that study the ways in which autobiographers represent the self as incomplete evolving and elusive in particular a number of books have appeared on the subject of women s autobiography and female subjectivity such as works by sidonie smith julia watson and nancy miller and several volumes interrogate postcolonial women s autobiography such as texts by françoise lionnet gayatri spivak carole boyce davies and chandra mohanty our volume unites these strands of criticism by examining ways that female autobiographies write the self as a fragmented plural construct across the francophone world this will be the first book length study of this important development this volume will be of interest primarily to students and scholars working in the areas of life writing french and francophone studies postcolonial studies and gender studies the volume contributes to multiple areas that are currently garnering substantial interest in academe postcolonial studies francophone studies gender studies and women s writing by comparing works from across the francophone world our volume takes a global approach to the genre of autobiography and its inflections by women writers the self that is not one in women s autobiography in french therefore represents a timely intervention in several interlinking academic fields and will thus garner substantial interest

Communicative Exchange, Psychotherapy and the Resonant Self

2020-07-12

over one billion people use the internet globally psychologists are beginning to understand what people do online and the impact being online has on behaviour it s making us re think many of our existing assumptions about what it means to be a social being for instance if we can talk flirt meet people and fall in love online this challenges many of psychology s theories that intimacy or understanding requires physical co presence the oxford handbook of internet psychology brings together many of the leading researchers in what can be termed internet psychology though a very new area of research it is growing at a phenomenal pace in addition to well studied areas of investigation such as social identity theory computer mediated communication and virtual communities the volume also includes chapters on topics as diverse as deception and misrepresentation attitude change and persuasion online internet addiction online relationships privacy and trust health and leisure use of the internet and the nature of interactivity with over 30 chapters written by experts in the field the range and depth of coverage is unequalled and serves to define this emerging area of research uniquely

this content is supported by an entire section covering the use of the internet as a research tool including qualitative and quantitative methods online survey design personality testing ethics and technological and design issues while it is likely to be a popular research resource to be dipped into as a whole volume it is coherent and compelling enough to act as a single text book the oxford handbook of internet psychology is the definitive text on this burgeoning field it will be an essential resource for anyone interested in the psychological aspects of internet use or planning to conduct research using the net

This "Self" Which Is Not One

2010-03-08

in this highly informative and interdisciplinary exploration of the relationship between culture and psyche de munck provides a substantive introduction to pertinent issues theory and empirical studies that lie at the junction of psychology sociology and anthropology this engagingly written text reviews various approaches to such questions as where is culture located inside or outside the head what is the self is there a single unified self or do many selves inhabit the body do institutional structures form to meet our needs or are our everyday lives simply a result of institutional structures what is meaning and how do we study it de munck's examination of these different approaches illuminates the importance of the topic expands readers understanding of human life and points to psychological anthropology's relevance in affecting public policies

Oxford Handbook of Internet Psychology

2009-02-12

this book examines the public assertion of self by men and women in england france and germany from the renaissance to romanticism

Culture, Self, and Meaning

2000-07-14

this handbook explores the cognitive motivational interpersonal clinical and applied aspects of personal uncertainty it showcases both the diversity and the unity that defines contemporary perspectives on uncertainty in self within social and personality psychology the contributions to the volume are all written by distinguished scholars in personality social psychology and clinical psychology united by their common focus on the causes and consequences of self uncertainty chapters explore the similarities and differences between personal uncertainty and other psychological experiences in terms of their nature and relationship with human thought emotion motivation and behavior specific challenges posed by personal uncertainty and the coping strategies people develop in their daily life are identified there is an assessment of the potential negative and positive repercussions of coping with the specific experience of self uncertainty including academic health and relationship outcomes throughout strategies specifically designed to assist others in confronting the unique challenges posed by self uncertainty in ways that emphasize healthy psychological functioning and growth are promoted in addition the contributions to the handbook touch on the psychological social and cultural context of the new millennium including concepts such as friedman's flat world confidence the absence of doubt in world leaders the threat of terrorism since 9 11 the arts doubt and religious belief and views of doubt as the universal condition of humankind the handbook is an invaluable resource for researchers practitioners and senior undergraduate and graduate students in social and personality psychology clinical and counseling psychology educational psychology and developmental psychology

Representations of the Self from the Renaissance to Romanticism

2000-04-27

private self theory and practice of women's autobiographical writings

Handbook of the Uncertain Self

2013-05-13

with social networking and reality television self help columns and daytime talk shows there s an infinite array of platforms to both expose our deepest thoughts and examine the thoughts of others in this age of non stop communication one s privacy is subject to unrelenting examination intrusion and attack from the media the government friends family and complete strangers so what are we trying to hide and what are we trying to find out about others practicing psychoanalyst and professor of literature josh cohen tackles those questions in his study of privacy and personality the most vulnerable and indestructible region of your self using sigmund freud s theories on identity and the ego as a foundation cohen weaves through time and place to study an extensive variety of people who unearthed and revealed the rawest form of their selves from adam and eve to the ballerinas in the hit 2010 film black swan from hester prynne to british celebrity katie price cohen finds freud s ideas in both fiction and reality alike yet even with all the times that we ve exposed the inner workings of our psyches cohen is sure to emphasize that some part of every individual will always remain hidden like freud once wrote the ego is not master in its own house in a culture that floods our lives with light how is it that we remain so helplessly in the dark

Senate Bill

1983

this work examines the role of language in forging the modern subject focusing on the idea of the new man that has animated all revolutionaries the present volume asks what it meant to define oneself in terms of one s class origins gender national belonging or racial origins

The Private Self

1988

drawing from scholarship across law history politics and philosophy self defence in international and criminal law provides a broad and interdisciplinary approach to the doctrine of self defence in both domestic criminal and international law it focuses on the requirement of imminence which deals with the question of when individuals or states may legitimately resort to defensive force against a serious danger or harm in both national and international law the imminence requirement if strictly applied renders any defensive measure taken in anticipation of a would be attack illegal recently however attempts have been made to relax the temporal requirement of the self defence doctrine imminence with a view to allowing individuals or states to employ deadly force to arrest an anticipated threat when they believe that using pre emptive lethal force would be the only way to thwart an expected harm in domestic criminal law it has been argued that it is necessary to relax the rule of imminence in domestic violence cases where women employ lethal force against their abusive partners when there is no imminent threat to justify defensive force at the international level while there has long been controversy as to the justifiability of pre emptive force in non confrontational settings following the september 11 attacks the bush administration s war on terror policy radically shifted the focus from the notion of anticipation to that of prevention making it clear that if necessary it would invoke unilateral force against emerging threats before they are fully formed the book surveys the roots role rationale and objectives of self defence and questions whether the requirement of imminence should be removed from the traditional contours of the self defence doctrine in national and international law

The Private Life

2015-04-14

a collection of work by leading feminist scholars engaging with the question of the political status of poststructuralism within feminism and affirming the contemporary debate over theory as politically rich and consequential

Language and Revolution

2004-08-02

moving beyond self interest is an interdisciplinary volume that discusses cutting edge developments in the science of caring for and helping others in part i contributors raise foundational issues related to human caregiving they present new theories and data to show how natural selection might have shaped a genuinely altruistic drive to benefit others how this drive intersects with the attachment and caregiving systems and how it emerges from a broader social engagement system made possible by symbiotic regulation of autonomic physiological states in part ii contributors propose a new neurophysiological model of the human caregiving system and present arguments and evidence to show how mammalian neural circuitry that supports parenting might be recruited to direct human cooperation and competition human empathy and parental and romantic love part iii is devoted to the psychology of human caregiving some contributors in this section show how an evolutionary perspective helps us better understand parental investment in and empathic concern for children at risk for or suffering from various health behavioral and cognitive problems other contributors identify circumstances that differentially predict caregiver benefits and costs and raise the question of whether extreme levels of compassion are actually pathological the section concludes with a discussion of semantic and conceptual obstacles to the scientific investigation of caregiving part iv focuses on possible interfaces between new models of caregiving motivation and economics political science and social policy development in this section contributors show how the new theory and research discussed in this volume can inform our understanding of economic utility policies for delivering social services such as health care and education and hypotheses concerning the origins and development of human society including some of its more problematic features of nationalism conflict and war the chapters in this volume help readers appreciate the human capacity for engaging in altruistic acts on both a small and large scale

Self-Defence in International and Criminal Law

2011-05-11

the aim of this volume is to discuss recent research into self experience and its disorders and to contribute to a better integration of the different empirical and conceptual perspectives among the topics discussed are questions like what is a self what is the relation between the self givenness of consciousness and the givenness of the conscious self how should we understand the self disorders encountered in schizophrenia and what general insights into the nature of the self can pathological phenomena provide us with most of the contributions are characterized by a distinct phenomenological approach the chapters by butterworth strawson zahavi and marbach are general in nature and address different psychological and philosophical aspects of what it means to be a self next eilan parnas and sass turn to schizophrenia and ask both how we should approach and understand this disorder and more specifically what we can learn about the nature of selfhood and existence from psychopathology the chapters by blakemore and gallagher present a defense and a criticism of the so called model of self monitoring respectively the final three chapters by cutting stanghellini schwartz and wiggins represent anthropologically oriented attempts to situate pathologies of self experience series b

Feminists Theorize the Political

2013-10-28

reflecting recent advancements security of self organizing networks manet wsn wmn vanet explores wireless network security from all angles it begins with a review of fundamental security topics and often used terms to set the foundation for the following chapters examining critical security issues in a range of wireless networks the bo

Moving Beyond Self-Interest

2011-10-26

more than ten years on from its original publication concepts of the self still mesmerizes with its insight comprehensiveness and critique of debates over the self in the social sciences and humanities anthony elliot has written a new preface to this third edition to address some of the most recent developments in the field and offers a powerful challenge to what he describes as the emergence of anti theories of the self the first two editions have proven exceptionally popular among students and teachers worldwide anthony elliot provides a scintillating introduction to the major accounts of the self from symbolic interactionism and psychoanalysis to post feminism and postmodernism this new edition has been extensively revised and updated to take account of more recent theoretical developments and a new chapter has been added on individualization which focuses on how the self becomes an agent of do it yourself autobiographical reconstruction in an age of intensive globalization concepts of the self remains the most lively lucid and compelling introduction to contemporary controversies over the self and self identity in the social sciences and humanities written by an author of international reputation it connects debates about the self directly to identity politics the sociology of personal relationships and intimacy and the politics of sexuality and will continue to be an invaluable introductory text for students in of social and political theory sociology social psychology cultural studies and gender studies

Exploring the Self

2000-01-01

the immune self is the first extended philosophical critique of immunology

Security of Self-Organizing Networks

2016-04-19

self consciousness is a topic of considerable importance to a variety of empirical and theoretical disciplines such as developmental and social psychology cognitive neuroscience psychiatry and philosophy this volume presents essays on self consciousness by prominent psychologists cognitive neurologists and philosophers some of the topics included are the infants sense of self and others theory of mind phenomenology of embodiment neural mechanisms of action attribution and hermeneutics of the self a number of these essays argue in turn that empirical findings in developmental psychology phenomenological analyses of embodiment or studies of pathological self experiences point to the existence of a type of self consciousness that does not require any explicit i thought or self observation but is more adequately described as a pre reflective embodied form of self familiarity the different contributions in the volume amply demonstrate that self consciousness is a complex multifaceted phenomenon that calls for an integration of different complementary interdisciplinary perspectives series b
