Personality in Politics 1976 excerpt from politics and personalities with other essays I was lately addressing an audience of working men on the ethical aspects of war after the address there was a discussion and the question which excited the keenest debate was what are we to do with the Kaiser when the war is over in vain I reminded my friends of the adage about catching your hare before you cook him some a few were for St Helena the great majority were for capital punishment either by shooting as befits an officer and a gentleman or by hanging as the appropriate doom of one who has placed himself outside the pale of humanity these interesting dissertations turned my thoughts to the venerable theme of tyrannicide to those who have practised it and to those others who in prose or in verse have extolled it about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Behind the Scenes in American Government 1979 whatever you think about the widening divide between Democrats and Republicans ideological differences do not explain why politicians from the same parties who share the same goals and policy preferences often argue fiercely about how best to attain them this perplexing misalignment suggests that we are missing an important piece of the puzzle political scientists have increasingly drawn on the relationship between voters personalities and political orientation but there has been little empirically grounded research looking at how legislators personalities influence their performance on Capitol Hill with more than a feeling Adam J Ramey Jonathan D Klingler and Gary E Hollibaugh Jr have developed an innovative framework incorporating what are known as the big five dimensions of personality openness to experience conscientiousness extraversion agreeableness and neuroticism to improve our understanding of political behavior among members of Congress to determine how strongly individuals display these traits the authors identified correlates across a wealth of data including speeches campaign contributions and expenditures committee involvement willingness to filibuster and even Twitter feeds they then show how we might expect to see the influence of these traits across all aspects of Congress members political behavior from the type and quantity of legislation they sponsor and their style of communication to whether they decide to run again or seek a higher office they also argue convincingly that the types of personalities that have come to dominate Capitol Hill in recent years may be contributing to a lot of the gridlock and frustration plaguing the American political system
